LETTERS PATENT.

Dated 22nd March, 1881.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, Empress of India : To all to whom these Presents shall come, greeting.

WHEREAS, under and by virtue of the provisions of three Acts of the Legislature of South Australia, respectively known as "The Adelaide University Act," "The Adelaide University Act Amendment Act," and "The University of Adelaide Degrees Act," a University consisting of a Council and Senate has been incorporated and made a body politic with perpetual succession, under the name of "The University of Adelaide," with power to grant the several Degrees of Bachelor of Arts, Master of Arts, Bachelor of Medicine, Doctor of Medicine, Bachelor of Laws, Doctor of Laws, Bachelor of Science, Doctor of Science, Bachelor of Music, and Doctor of Music :

And whereas the Chancellor, Vice-Chancellor, and Council of the said University, by their humble petition under the common seal of the University, have prayed Us to the effect following (that is to say) :

To grant Our Letters Patent, declaring that the aforesaid Degrees already conferred or hereafter to be conferred by the University of Adelaide shall be recognized as academic distinctions and rewards of merit, and be entitled to rank, precedence, and consideration within Our Dominions as fully as if the said Degrees had been conferred by any University in Our United Kingdom of Great Britain and Ireland ; and that such recognition may extend to Degrees conferred on Women :

Now know ye that We, having taken the said petition into Our Royal consideration, do, by virtue of Our prerogative and of Our special grace, certain knowledge, and mere motion, by these presents, for Us, Our heirs and successors, will and ordain as follows :

I. The Degrees of Bachelor of Arts, Master of Arts, Bachelor of Medicine, Doctor of Medicine, Bachelor of Laws, Doctor of Laws, Bachelor of Science, Doctor of Science, Bachelor of Music, and Doctor of Music, heretofore granted or conferred and hereafter to be granted or conferred by the said University of Adelaide on any person, male or female, shall be recognized as academic distinctions and rewards of merit, and be entitled to rank, precedence, and consideration in Our United Kingdom and in Our Colonies and Possessions throughout the World, as fully as if the said Degrees had been granted by any University of Our said United Kingdom.

II. No variation of the constitution of the said University which may at any time, or from time to time, be made by any Act of the Legislature of South Australia shall in any manner annul, abrogate, circumscribe, or diminish the privileges conferred on the said University by these Our Letters Patent, nor the rank, rights, privileges, and considerations conferred by such Degrees, so long as the standard of knowledge now established, or a like standard, be preserved as a necessary condition for obtaining the aforesaid Degrees.

III. Any such standard shall be held sufficient for the purposes of these Our Letters Patent if so declared in any proclamation issued by Our Governor of South Australia for the time being.

In witness whereof We have caused these Our Letters to be made Patent. Witness Ourselves at Westminster, the 22nd day of March, in the Forty-fourth year of Our Reign.

By Warrant under the Queen's Sign Manual.

PALMER.

ACT OF INCORPORATION.

The Adelaide University Act.

No. 20 OF 1874.

Preamble.

WHEREAS it is expedient to promote sound learning in the Province of South Australia, and with that intent to establish and incorporate, and endow an University at Adelaide, open to all classes and denominations of Her Majesty's subjects: And whereas Walter Watson Hughes, Esquire, has agreed to contribute the sum of Twenty Thousand Pounds towards the endowment of two chairs or professorships of such University, upon terms and conditions contained in a certain Indenture bearing date the twenty-fourth day of December, one thousand eight hundred and seventy-two, and made between the said Walter Watson Hughes and Alexander Hay, Esquires, representing an Association formed for the purpose of establishing such University, a copy of which said Indenture is set forth in the Schedule hereto; he it therefore enacted by the Governor of the Province of South Australia, with the advice and consent of the Legislative Council and House of Assembly of the said Province, in this present Parliament assembled, as follows:

University to consist of Council and Senate.

1. An University, consisting of a Council and Senate, shall be established at Adelaide, and when duly constituted and appointed according to the provisions of this Act, shall be a body politic and corporate by the name of "The University of Adelaide," and by such name shall have perpetual succession, and shall adopt and have a common seal, and shall by the same name sue and be sued, plead and be impleaded, answer and be answered unto in all Courts in the said province, and shall be capable in law to take, purchase, and hold all goods, chattels, and personal property whatsoever, and shall also be able and capable in law to receive, take, purchase, and hold for ever, not only such lands, buildings, and hereditaments, and possessions, as may from time to time be exclusively used and occupied for the immediate requirements of the said University, but also any other lands, buildings, hereditaments, and possessions whatsoever, situated in the said Province, or elsewhere, and shall be able and capable in law to grant, demise, alien, or otherwise dispose of all or any of the property, real or personal, belonging to the University, and also to do all other matters and things incidental or

appertaining to a body politic and corporate : Provided always, that until the Senate of the said University shall have been constituted as herein enacted, the said University shall consist of a Council only : Provided further, that it shall not be lawful for the said University to alien, mortgage, charge, or demise any lands, tenements, or hereditaments, of which it shall have become seised, or to which it may become entitled by grant, purchase, or otherwise, unless with the approval of the Governor of the said Province for the time being, except by way of lease for any term not exceeding twenty-one years from the time when such lease shall be made, in and by which there shall be reserved during the whole of the term the highest rent that can be reasonably obtained for the same, without fine.

First Council by whom appointed. Election of Chancellor and Vice-Chancellor.

2. The first Council of the said University shall be nominated and appointed by the Governor within three months after the passing of this Act, and shall consist of twenty councillors, and the said Council shall elect a Chancellor and a Vice-Chancellor ; and whenever a vacancy shall occur in the office of Chancellor or Vice-Chancellor, either by death, resignation, expiration of tenure, or otherwise, the said Council shall elect a Chancellor or Vice-Chancellor, as the case may be, instead of the Chancellor or Vice-Chancellor occasioning such vacancy, the Vice-Chancellor in all cases shall be elected by the said Council out of their own body, and the Chancellor, if not a member of the said Council at the time of his election, shall, from and after his election, become a member of the said Council during the term of his office, and in any such case, and for such period, the Council shall consist of twenty-one councillors. Each Chancellor and Vice-Chancellor shall hold his office for five years, or, except in the case of the first Chancellor and Vice-Chancellor, for such other term as shall be fixed by the statutes and regulations of the University made previously to the election : Provided that there shall never be more than four ministers of religion members of the said Council at the same time.

Vacancies in the Council, how created and filled.

3. At the expiration of the third year, and thereafter at the expiration of each year, the five members of the Council who shall have been longest in office shall retire, but shall be eligible for re-election, and if more members shall have been in office for the same period, the order of their retirement shall be decided by ballot, and all vacancies which shall occur in the said Council by retirement, death, resignation, or otherwise, shall be filled as they may occur, by the election of such persons as the Senate shall at meetings to be duly convened for that purpose elect ; or, if the Senate shall not have been constituted, such vacancies shall be forthwith reported by the Chancellor to the Governor, who shall within

three months after such report nominate persons to fill such vacancies, or if the Senate shall fail to elect within six months, then the Governor shall nominate persons to fill such vacancies.

Senate how constituted.

4. As soon as the said Council shall have reported to the Governor that the number of graduates admitted by the said University to any of the degrees of Master of Arts, Doctor of Medicine, Doctor of Laws, Doctor of Science, or Doctor of Music, and of graduates of three years' standing, is not less than fifty, and such report shall have been published in the *Government Gazette*, the Senate shall be then constituted, and shall consist of such graduates, and of all persons thereafter admitted to such degrees, or who may become graduates of three years' standing, and a graduate of another University admitted to a degree in The University of Adelaide shall reckon his standing from the date of his graduation in such other University, and the Senate shall elect a Warden out of their own body annually, or whenever a vacancy shall occur.

Questions how decided, quorum.

5. All questions which shall come before the said Council or Senate respectively shall be decided by the majority of the members present, and the chairman at any such meeting shall have a vote, and in case of an equality of votes, a casting vote, and no question shall be decided at any meeting of the said Council unless six members thereof be present, or at any meeting of the said Senate unless twenty members thereof be present.

Chairmanship of Council and Senate.

6. At every meeting of the Council the Chancellor, or in his absence the Vice-Chancellor, shall preside as chairman, and at every meeting of the Senate the Warden shall preside as chairman, and in the absence of the Chancellor and Vice-Chancellor, the members of the Council present, and in the absence of the Warden the members of the Senate present shall elect a chairman.

Council to have entire management of the University.

7. The said Council shall have full power to appoint and dismiss all professors, lecturers, examiners, officers, and servants of the said University, and shall have the entire management and superintendence over the affairs, concerns, and property thereof, subject to the statutes and regulations of the said University.

Council to make statutes and regulations with approval of the Senate.

8. The said Council shall have full power to make and alter any statutes and regulations (so as the same be not repugnant to any existing law or to the provisions of this Act) touching any election or

the discipline of the said University, the number, stipend, and manner of appointment and dismissal of the professors, lecturers, examiners, officers, and servants thereof, the matriculation of students, the examination for fellowships, scholarships, prizes, exhibitions, degrees, or honours, and the granting of the same respectively, the fees to be charged for matriculation, or for any such examination or degree, the lectures or classes of the professors and lecturers, and the fees to be charged, the manner and time of convening the meetings of the said Council and Senate and in general touching all other matters whatsoever regarding the said University : Provided always that so soon as the Senate of the said University shall have been constituted, no new statute or regulation, or alteration or repeal of any existing statute, shall be of any force until approved by the said Senate.

Colleges may be affiliated, and boarding-houses licensed.

9. It shall be lawful for the said University to make any statutes for the affiliation to or connection with the same of any college or educational establishment to which the governing body of such college or establishment may consent, and for the licensing and supervision of boarding-houses intended for the reception of students, and the revocation of such licenses : Provided always that no such statutes shall affect the religious observances or regulations enforced in such colleges, educational establishments, or boarding-houses.

Statutes and Regulations to be allowed by Governor.

10. All such statutes and regulations as aforesaid shall be reduced to writing, and the common seal of the said University having been affixed thereto, shall be submitted to the Governor to be allowed and countersigned by him, and if so allowed and countersigned, shall be binding upon all persons members of the said University, and upon all candidates for degrees to be conferred by the same.

Limitation of the powers of Council as regards the chairs founded by W. W. Hughes.

11. The powers herein given to the Council shall, so far as the same may affect the two chairs or professorships founded by the said Walter Watson Hughes, and the two professors appointed by him, and so far as regards the appropriation and investment of the funds contributed by him, be subject to the terms and conditions of the before-mentioned indenture.

University to confer Degrees.

12. The said University shall have power to confer, after examination, the several Degrees of Bachelor of Arts, Master of Arts, Bachelor of Medicine, Doctor of Medicine, Bachelor of Laws, Doctor of Laws, Bachelor of Science and Doctor of Science, Bachelor of Music and Doctor of Music, according to the statutes and regulations of the said

University : Provided always that it shall be lawful for the said University to make such statutes as they may deem fit for the admission, without examination, to any such degree, of persons who may have graduated at any other University.

Students to be in residence during term.

13. Every undergraduate shall, during such term of residence as the said University may by statute appoint, dwell with his parent or guardian, or with some near relative or friend selected by his parent or guardian, and approved by the Chancellor or Vice-Chancellor, or in some collegiate or educational establishment affiliated to or in connection with the University, or in a boarding-house licensed as aforesaid.

No religious test to be administered

14. No religious test shall be administered to any person in order to entitle him to be admitted as a student of the said University, or to hold office therein, or to graduate thereat, or to hold any advantage or privilege thereof.

Endowment by annual grant.

15. It shall be lawful for the Governor by warrant under his hand, addressed to the Public Treasurer of the Province, to direct to be issued and paid out of the General Revenue an annual grant, equal to Five Pounds per centum per annum on the said sum of Twenty Thousand Pounds contributed by the said Walter Watson Hughes, and on such other moneys as may from time to time be given to and invested by the said body corporate upon trusts for the purposes of such University, and on the value of property real or personal, securely vested in the said body corporate, or in trustees, for the purposes of the said University, except the real property mentioned in clause 16 of this Act ; and such annual grant shall be applied as a fund for maintaining the said University, and for defraying the several stipends which may be appointed to be paid to the several professors, lecturers, examiners, officers, and servants to be appointed by such University, and for defraying the expense of such fellowships, scholarships, prizes, and exhibitions, as shall be awarded for the encouragement of students in such University, and for providing a library for the same, and for discharging all necessary charges connected with the management thereof : Provided that no such grant shall exceed Ten Thousand Pounds in any one year.

Endowment in Land.

16. The Governor, in the name and on behalf of Her Majesty, may alienate, grant, and convey in fee-simple to such University or may reserve and dedicate portions of the waste lands of the said Province, not exceeding fifty thousand acres, for the purpose of the University and the further endowment thereof ; and the Governor may in like

manner, and on behalf of Her Majesty, alienate, grant, and convey in fee-simple to such University, or may reserve and dedicate a piece of land in Adelaide, east of the Gun Shed and facing North-Terrace, not exceeding five acres, to be used as a site* for the University buildings and for the purposes of such University: Provided that the lands so granted shall be held upon trust for the purposes of such University, such trusts to be approved by the Governor.

University of Adelaide included in Ordinance No. 17 of 1844.

17. The University of Adelaide shall be deemed to be an University within the meaning of section 1† of Ordinance No. 17 of 1844, entitled "An Ordinance to define the qualifications of Medical Practitioners in this Province for certain purposes."

Council or Senate to report annually to the Governor.

18. The said Council or Senate shall, during the month of January in every year, report the proceedings of the University during the previous year to the Governor, and such report shall contain a full account of the income and expenditure of the said University, audited in such manner as the Governor may direct, and a copy of every such report, and of all the statutes and regulations of the University, allowed as aforesaid by the Governor, shall be laid in each year before the Parliament.

Governor to be Visitor.

19. The Governor for the time being shall be the Visitor of the said University, and shall have authority to do all things which appertain to Visitors as often as to him shall seem meet.

Short Title.

20. This Act may be cited as "The Adelaide University Act."

S.A. INSTITUTE ACT AMENDMENT ACT OF 1879.

No. 151 of 1879.

Preamble.

Whereas it is expedient that the University of Adelaide should be represented on the Board of the South Australian Institute, and that the said University should for that purpose be empowered to elect two members of that Board—Be it therefore enacted by the Governor of the Province of South Australia, by and with the advice and consent of the Legislative Council and House of Assembly of the said Province, in this present Parliament assembled, as follows :

South Australian Institute Board increased to nine.

*1. From and after the passing of this Act the Board of Governors of the South Australian Institute shall, notwithstanding anything contained in the South Australian Institute Act, 1863, consist of nine members, of whom two shall be members of, and shall be elected by, the said University.

Council to convene meetings to elect. Tenure of persons elected Filling occasional vacancies.

2. So soon as conveniently may be after the passing of this Act, and thereafter in each succeeding month of October, the Council of the said University shall convene in the prescribed manner a meeting in Adelaide of the said University to elect two members of the said Board, and the members elected at any such meeting shall (except in the event herein-after provided for) hold office until the election in the next succeeding month of October. Whenever the office held by any member so elected shall during the year or other period for which he was elected become vacant, the said Council shall in the prescribed manner convene a meeting of the University to elect in his room another member, who shall hold office only until the next annual election.

Power to make Statutes and Regulations to carry out the Act.

3. The said University is hereby empowered to make all such Statutes and Regulations as shall be deemed necessary or proper for prescribing the time and mode of nominating candidates for the said offices, of convening each such meeting, and of transacting the business and conducting the election thereat ; for prescribing the place in Adelaide at which such meetings shall be held, the members of the University who must be present in order to constitute a valid meeting, and other Statutes and Regulations dealing with all other matters of every kind which, in the opinion of the said University, ought to be made for the purpose of carrying out this Act in the most efficient manner.

* This Section has been repealed by the Public Library, Museum and Art Gallery Act of 1883-4, Section 51.

If meeting not constituted in fifteen minutes after appointed hour, Council to elect for that occasion.

4. Notwithstanding any other provision herein contained, whenever the prescribed number of members of the University is not present within fifteen minutes after the time appointed for holding any such meeting, the Council shall, as soon as conveniently may be thereafter, elect in such manner as they shall think proper a member or (as the case shall require) two members of the said University to be members of the said Board.

Governors elected under this Act to have same rights, &c., as the others.

*5. Members of the said Board of Governors elected under this Act shall during their tenure of office enjoy equal rights and powers with the other members of the said Board.

Title.

6. This Act may be cited for all purposes as the "South Australian Institute Act Amendment Act, 1879."

PUBLIC LIBRARY, MUSEUM, AND ART GALLERY ACT,
1883-4; No. 296 OF 1884.

Constitution of Board.

Under Section 7 of this Act it is enacted that :—

The Board of Governors of the Public Library, Museum, and Art Gallery of South Australia shall consist of sixteen members of whom

1. The Governor shall appoint eight members.
2. The South Australian Society of Arts shall elect one member, who shall be a member of the said Society.
3. The University of Adelaide shall elect two members, who shall be members of the said University.
4. The Royal Society of South Australia shall elect one member, who shall be a member of the said Society.
5. The Adelaide Circulating Library, as hereinafter established, shall elect one member, who shall be a member of the said Library.
6. The Institutes shall elect three members.

This Section further enacts that :—

The elections of members of the Board by the several bodies of persons or societies mentioned in this Section shall take place and be conducted in the manner prescribed by the rules and regulations contained in the first schedule hereto, or such other rules and regulations as may from time to time be made in addition to, or in substitution for, or in amendment of, those rules and regulations; and the expressions "Board" and "Board of Governors" used in the South Australian Institute Act Amendment Act, 1879, and in any statutes or regulations made thereunder, shall refer to the Board constituted by this Act. Upon the appointment and election of members of the Board, and thereafter in the month of November in each year, the Government shall cause to be published in the *Government Gazette* a list of the members of the Board, which *Gazette* shall be *prima facie* evidence that the persons named therein are the members of the Board as therein specified.

Election of members of the Board.

Section 9 enacts that :—

The first appointment by the Governor of members of the Board, and the first elections of members of the Board by the several bodies of persons or societies mentioned in Section 7 of this Act, shall be made and take place respectively within one calendar month from the coming

into operation of this Act ; and thereafter, in the month of October in every year, the Governor and the several bodies of persons or societies mentioned in Section 7 of this Act shall appoint and elect members of the Board ; and every appointed or elected member of the Board shall hold office until the election or appointment of his successor, and shall then retire, but shall be eligible for re-election.

All members to be on same footing.

Section 10.—All the members of the Board, whether appointed or elected, shall have and exercise the same rights, privileges, and powers, and be under and subject to the same liabilities.

Casual vacancy, how filled.

Section 11.—The Governor may appoint a member of the Board upon any casual vacancy occurring through the death, resignation, or removal of any member of the Board appointed by him, and any casual vacancy caused by the death or resignation of any member of the Board elected by any of the several bodies of persons or societies mentioned in Section 7 of this Act may be filled by the election of a person by the body of persons or society who shall have elected the member so dying or resigning. Any member of the Board elected under this Section shall hold office for the same period as the member so dying or resigning would have held office had no such vacancy occurred. Every appointment or election under this Section shall be notified by the Governor in the *Government Gazette*, and such *Gazette* shall be *prima facie* evidence of the appointment or election so notified.

On failure to elect, the Governor may appoint.

Section 12.—If the University of Adelaide, the Royal Society of South Australia, the Adelaide Circulating Library, or the Institutes, or any of them, shall fail or neglect to exercise their right of election given by this Act, the Governor may appoint a member or members of the Board, who shall hold office for the same period and in all respects as if he or they had been elected by the body of persons or society so making default. The provision of this Section shall also apply to any casual vacancy caused by the death or resignation of any elected member of the Board.

Repeal.

Section 51 repeals Sections 1 and 5 of the Act No. 151 of 1879 intituled "The South Australian Institute Act Amendment Act."

The following is the portion of the *First Schedule* (referred to in Clause 7) which regulates the election of members of the Board by the University of Adelaide :—

Rules and Regulations for the election of members of the Board.

ELECTION BY THE UNIVERSITY OF ADELAIDE.

1. The members of the Board to be elected by the University of Adelaide shall be elected in manner prescribed by the "South Australian Institute Act Amendment Act, 1879," and the statutes and regulations made or to be hereafter made thereunder for the election by the University of Adelaide of members of the Board of Governors of the South Australian Institute ; and the expressions "Board" and "Board of Governors" used in that Act and in the statutes and regulations made thereunder shall refer to the Board of Governors of the Public Library, Museum, and Art Gallery of South Australia. The result of every such election shall be certified to the Governor, under the hand of the Chancellor or Vice-Chancellor of the University, whose certificate shall be conclusive as to the validity of such election.

STATUTES.

Under the powers given by the S.A. Institute Act Amendment Act of 1879 the following Statutes have been made :

1. Meetings of the University to elect members of the Board of Governors of the South Australian Institute shall be held in Adelaide at such places as the Council shall from time to time appoint.
2. So soon as conveniently may be after these Statutes shall have been allowed and countersigned by the Governor, the Council shall convene a meeting of the University to elect two members of the said Board.
3. The Council shall also convene the University to meet on some day in each month of October to elect two members of the said Board.
4. Whenever the office held by any member of the said Board elected by the University shall become vacant during the period for which he was elected, the Council shall, so soon as conveniently may be thereafter, convene a meeting of the University to elect another member in his room.
5. Every meeting of the University for the election of a member of the said Board shall be convened not less than ten days before the day appointed for the meeting by the Registrar by a circular, specifying the place and time of meeting, and sent by post to the last known address in South Australia of, or delivered to, all members of the University who are resident in the Province.

6. Candidates shall be nominated in writing signed by two members of the University, and sent to the Registrar so as to reach him at least two days before the day appointed for the meeting, and no candidate will be eligible for election unless his written consent to act, if elected, reaches the Registrar not later than two days before the day of meeting.

7. If only the required number of members shall be eligible, the Chairman of the meeting shall declare such member or members elected.

8. If more than the required number of members be eligible, a printed voting paper containing the names of such members shall be given to each member present at the meeting, who may vote for the required number of candidates by striking out the names of the members for whom he does not vote.

9. The votes so given shall be counted by two tellers appointed by the Chairman before the election is proceeded with. The number of votes given for each candidate shall be reported in writing by the tellers to the Chairman, who shall then declare the result of the election.

10. At every such meeting the Chancellor, or in his absence the Vice-Chancellor, or in their absence the Warden of the Senate (if present) shall preside as Chairman, and in the absence of the Chancellor, Vice-Chancellor, and Warden, the members of the University present shall elect a Chairman.

11. No such meeting shall be constituted unless at least twelve members of the University be present within fifteen minutes after the time appointed for holding the meeting. At every such meeting all questions shall be decided by the majority of the members present. In case of an equality of votes on any question or for any candidate, the Chairman shall give a casting vote.

12. The proceedings of and elections made by each such meeting shall be recorded by the Registrar in a book kept for that purpose, and shall be signed by the Chairman.

29. By the indulgence of the Senate a member may explain matters of a personal nature, although there be no question before the Senate, but such matters may not be debated.

Rules of Debate.

30. No member may speak twice to a question before the Senate except in explanation or reply; but a member who has merely formally seconded a motion or amendment shall not be deemed to have spoken.

31. A member who has spoken to a question may again be heard to explain himself in regard to some material part of his speech, but shall not introduce any new matter.

32. A reply shall be allowed to a member who has made a substantive motion, but not to any member who has moved an amendment.

33. No member may speak to any question after it has been put by the Warden and the show of hands has been taken thereon.

34. No member shall reflect upon any vote of the Senate except for the purpose of moving that such vote be rescinded.

35. In the absence of a member who has given notice of a ^{Of Motions.} motion any member present may move such motion.

36. A motion may be amended by the mover with leave of the Senate.

37. Any member proposing an amendment may be required to ^{Motions and Amendments must be seconded.} deliver it in writing to the Warden.

38. Any motion or amendment not seconded shall not be further ^{Withdrawal of questions.} discussed, and no entry thereof shall be made on the Minutes.

39. A member who has made a motion or amendment may withdraw the same by leave of the Senate, granted without any negative voice.

40. No motion or amendment shall be proposed which is the same in substance as any question which during the same evening has been resolved in the affirmative or the negative.

41. The Senate may order a complicated question to be divided.

42. When amendments have been made the main question as amended shall be put.

43. When amendments have been proposed but not made, the question shall be put as originally proposed.

44. A question may be suspended—

(a) By a motion, "That the Senate proceed to the next ^{Suspension of questions.} business."

(b) By the motion "That the Senate do now adjourn."

45. A debate may be closed by the motion "That the question be now put," being proposed, seconded, and carried, and the question shall be put forthwith without further amendment or debate.

C. DIVISIONS

46. So soon as a debate upon a question shall be concluded, ^{Division.} the Warden shall put the question to the Senate.

47. A question being put shall be decided in the first instance by a show of hands.

48. The Warden shall state whether in his opinion the "Ayes" or the "Noes" have it, but any member may call for a division.

49. When a division is called the Warden shall again put the question, and shall direct the "Ayes" to the right and the "Noes" to the left, and shall appoint a teller for each party.

50. The vote of the Warden shall be taken before the other votes, without his being required to leave the chair.

51. Every member present when a division is taken must vote, except as hereinafter provided.

52. No member shall be entitled to vote in any division unless he be present when the question is put.

53. No member shall be entitled to vote upon any question in which he has a direct pecuniary interest, and the vote of any member so interested shall be disallowed if the Warden's attention be called to it at the time.

Warden to have
casting Vote.

54. In case of an equality of votes the Warden shall give a casting vote, and any reasons stated by him shall be entered in the Minutes.

55. An entry of the lists of divisions shall be made by the Clerk in the Minutes.

56. In case of confusion or error concerning the numbers reported, unless the same can be otherwise corrected, the Senate shall proceed to another division.

57. While the Senate is dividing, members can speak only to a point of order.

D. ELECTIONS.

Elections of Warden
and Clerk and Mem-
bers of Council.

58. The annual election of Warden and of Clerk shall take place at the ordinary meeting in November.

Nominations to
vacancies.

58A.* Whenever an extraordinary vacancy shall occur in the office of Warden, the Senate, at its next meeting and without previous nomination being required, shall elect one of its members as Warden, and the member so elected shall hold office till the next November meeting.

59. Members of the Council shall be elected at the first meeting held after the vacancy shall have become known to the Warden.

60. The members of the Senate shall be informed by circular when any vacancy occurs in the office of Warden, Clerk, or Member of Council, and such circular shall state the date up to which nominations will be received.

61. Every nomination shall be signed by at least two members of the Senate.

62. No person shall be proposed for election whose name has not appeared on the Notice-paper.

Nominations,
how cancelled

63. Any person nominated as a candidate for any office may by letter request the Clerk to cancel his nomination, and the receipt of such letter shall be held to cancel such nomination.

* Passed by Senate, 28th March, 1894.

64. In all elections if no more than the required number of persons be nominated, the Warden shall declare them elected.

65. If more than the required number of persons be nominated, voting papers shall be distributed and every member present shall vote for the required number of candidates ; but no member who has a direct pecuniary interest in the result of the election shall be allowed to vote.

66. When the voting papers have been distributed the doors shall be closed until such time as the papers shall have been collected.

67. The Warden shall appoint from the members present as scrutineers as he shall think proper, and shall assign them their duties.

68. The votes shall be counted by the scrutineers, and the number of votes given for each candidate shall be reported to the Warden, who shall then declare the result of the election.

E. QUESTIONS.

69. Questions touching the affairs of the University may be put to the Warden or to the Representative of the Council in the Senate.

70. The Warden may disallow any question which he thinks ought not to be put, and may alter and amend any question which is not in accordance with the Standing Orders, or which is in his opinion injudiciously worded.

71. The Warden or Representative of the Council to whom a question is put, may without reason assigned decline to answer at all or until notice thereof has been duly given.

72. By permission of the Senate any member may put a question in the absence of the member who has given notice of it.

73. By permission of the Senate a member may amend in writing a question of which he has given notice and put it as amended.

74. In putting any question no argument or opinion shall be offered nor shall any facts be stated except so far as may be necessary to explain such question.

75. In answering any question the matter to which it refers shall not be debated.

76. Replies to questions, of which notice has been given, shall be in writing, and having been read, shall be handed to the Clerk, and recorded in the Minutes.

77. Questions not on the Notice Paper shall not be recorded in the Minutes, nor shall the answers thereto.

F. COMMITTEE OF THE WHOLE SENATE.

78. A Committee of the whole Senate is appointed by a resolution "That the Senate do now resolve itself into a Committee of the whole."

Warden to be Chairman unless unwilling to act.

79. The Warden shall be Chairman of such Committee unless he be unwilling to act, in which case any other member may be voted to the chair.

80. When the matters referred to the Committee have been disposed of the Senate resumes, and the report of the Committee is at once proposed to the Senate for adoption.

81. When the matters so referred have not been disposed of, the Senate having resumed and having received a report of the Committee to the effect that the matters have not been fully disposed of, may appoint a future day for the Committee to sit again.

82. A member may speak more than once to each question.

83. A motion need not be seconded.

V. SELECT COMMITTEES.

Select Committees, —Quorum.

84. Select Committees, unless it be otherwise ordered, shall consist of five members, who shall elect their own Chairman, and of whom three shall be a quorum.

85. The Chairman shall have both a deliberative and a casting vote.

Reports of Select Committees

86. At the time of the appointment of the Committee the Senate shall instruct the Committee as to the matters to be reported on by them, and their report shall be confined to such matters.

87. The Chairman shall present the report of the Committee to the Senate, and it shall be forthwith discussed or postponed for future consideration.

VI. SUSPENSION OF STANDING ORDERS.

88. Any of these Standing Orders may be suspended for the time being on motion made with or without notice, provided that a quorum shall be present, and that such motion shall have the concurrence of at least two-thirds of the members present.

The above Standing Orders were adopted by the Senate at a meeting held on the 2nd day of December, 1885, the previous code having been rescinded.

December 2nd, 1885.

FREDERIC CHAPPLE,

WARDEN.

# ANNUAL REPORT FOR THE YEAR 1896.

---

To His Excellency Sir Thomas Fowell Buxton, Bart., K.C.M.G.,  
Governor and Commander-in-Chief in and over the Province  
of South Australia and the Dependencies thereof, &c.,  
&c., &c.

The Council of the University of Adelaide have the honour to  
present to your Excellency the following Report of the Proceed-  
ings of the University during the year 1896.

## I. THE COUNCIL AND OFFICERS.

It is with deep grief that the Council have to record the death  
of the late Vice-Chancellor, John Anderson Hartley. Mr. Hartley  
was a member of the first Council appointed in 1874, and from that  
time till his death devoted himself with untiring energy and zeal  
to the best interests of the University.

He was elected Vice-Chancellor on the 1st December, 1893,  
and was re-elected on the 29th November, 1895.

To the regret of the Council F. A. Pennefather, B.A., LL.D.,  
in July last, in consequence of illness, resigned his position as  
Professor of Laws.

On the 25th September the Council elected William Barlow,  
B.A., LL.D., to be Vice-Chancellor.

In November

James Henderson, B.A.

William Austin Horn, J.P.

The Rev. David Paton, M.A., D.D.

Sir Charles Todd, K.C.M.G., M.A., F.R.S.

The Venerable Archdeacon Farr, M.A., D.D.

in conformity with the provisions of the University Act, ceased to  
hold office as members of the Council.

On the 25th November the Senate elected the undermentioned  
gentlemen to fill the vacancies thereby occasioned in the  
Council—

Paton, The Reverend David, M.A., D.D.

Smith, Robert Barr, J.P.

Henderson, James, B.A.

Stirling, John Lancelot, LL.B., M.L.C.

Todd, Sir Charles, K.C.M.G., M.A., F.R.S.

## STATUTES.

---

### CHAPTER I.—OF THE CHANCELLOR AND VICE-CHANCELLOR.

1. The Chancellor shall hold office until the ninth day of November in the fifth year from the date of his election.
  2. The Vice-Chancellor shall hold office until the day preceding that on which he would have retired from the Council if he had not been Vice-Chancellor.
- 

### CHAPTER II.—OF THE COUNCIL.

1. The Council shall meet for the dispatch of business at least once a month.
  2. The Chancellor or Vice-Chancellor shall have power to call a Special Meeting for the consideration and dispatch of business, which either may wish to submit to the Council.
  3. The Chancellor or Vice-Chancellor, or in their absence the Registrar shall convene a meeting of the Council upon the written requisition of four members, and such requisition shall set forth the objects for which the meeting is required to be convened. The meeting shall be held within fourteen days after the receipt of the requisition.
  4. The Council shall have power to make, amend, and repeal Standing Orders for the regulation of its proceedings.
- 

### CHAPTER III.—OF THE SENATE.

1. The Senate shall meet at the University on the fourth Wednesday in the months of March, July, and November respectively; but if the Warden is of opinion that there is not sufficient business to bring before the Senate, he may direct notice to be issued that the meeting shall for that time lapse.
2. The Warden may at any time convene a meeting of the Senate.
3. Upon a requisition signed by twenty members of the Senate, setting forth the objects for which they desire the meeting to be convened the Warden shall convene a Special Meeting to be held within not less

than seven nor more than fourteen days from the date of the receipt by him of such requisition.

4. The Senate shall have power from time to time to make, amend, and repeal Standing Orders for the regulation of its proceedings. Until amended or repealed the Standing Orders of the Senate adopted on the 2nd December, 1885, shall remain in force.

---

CHAPTER IV.—OF PROFESSORS AND LECTURERS.

1. There shall for the present be the following Professors, that is to say
  - a. The Hughes Professor of Classics and Comparative Philology and Literature.
  - b. The Hughes Professor of English Language and Literature and Mental and Moral Philosophy.
  - c. The Elder Professor of Pure and Applied Mathematics, who shall also give instruction in Physics.
  - d. The Elder Professor of Natural Science.
  - e. The Elder Professor of Anatomy, who shall also give instruction in Comparative Anatomy, shall be the Director of the Anatomical Museum, and shall prepare specimens of Anatomy, Pathology, and Microscopic Anatomy for the same.
  - f. The Angas Professor of Chemistry, who shall be the Director of the Chemical Laboratory, shall conduct classes in Practical Analysis, and shall, if required, give special instruction in the various methods employed in the detection of poisons and in the adulteration of foods and drugs. Nothing contained in these Statutes shall prevent the Angas Professor of Chemistry from accepting any public appointment, with the sanction of the Council.
  - g. The Professor of Music, whose term of office expires on the last day of December, 1889. \*
  - h. The Professor of Laws. †
2. There shall be such Lecturers as the Council shall from time to time appoint.
3. Each Professor and Lecturer shall hold office on such terms as have been or may be fixed by the Council at the time of making the appointment.
4. Whenever sickness or any other cause shall incapacitate any Professor or Lecturer from performing the duties of his office, the Council may appoint a substitute to act in his stead during such

incapacity, and such substitute shall receive such proportion not exceeding one-half of the salary of the Professor or Lecturer so incapacitated as the Council shall direct.

5. The Council may at its discretion dismiss from his office or suspend for a time from performing the duties and receiving the salary thereof any Professor whose continuance in his office or in the performance of the duties thereof shall in the opinion of the Council be injurious to the progress of the students or to the interests of the University: Provided that no such dismissal shall have effect until confirmed by the Visitor.

6. No Professor shall sit in Parliament or become a member of any political association; nor shall he (without the sanction of the Council) give private instruction or deliver lectures to persons not being students of the University.

7. The Professors and Lecturers shall take such part in the University Examinations as the Council shall direct, but no Professor or Lecturer shall be required to examine in any subject which it is not his duty to teach.

8. During Term, except on Sundays and public holidays, the whole time of the Professors shall be at the disposal of the Council for the purposes of the University: Provided that the Council may for sufficient reason, on the application of any Professor, exempt him altogether, partly, or on particular occasions, from this Statute, and may at pleasure rescind any such exemption.\*

---

#### CHAPTER V.—OF THE REGISTRAR.

1. There shall be a Registrar of the University, who shall perform such duties as the Council may from time to time appoint. The Registrar shall also be the Librarian of the University.

2. The Council may at any time appoint a deputy to act in the place of the Registrar for such period as they may think fit, and assign to him any of the duties of Registrar.

---

#### CHAPTER VI.—OF LEAVE OF ABSENCE.

1. The Council may at its discretion grant to any Professor or Lecturer, or any officer of the University, leave of absence for any time not exceeding one year, on such Professor or Lecturer or other officer providing a substitute, to be approved by the Council.

---

#### CHAPTER VII.—OF THE SEAL OF THE UNIVERSITY.

The Chancellor and Vice-Chancellor shall be the Custodians of the

---

CHAPTER VIII.—OF TERMS.

1. The Academical Year shall be divided into three terms for all the Faculties, except Medicine.

2. The first term shall commence on the second Tuesday in March, and the third term shall terminate on the second Tuesday in December in each year.

3. The Council shall year by year fix the commencement of the second and third and the termination of the first and second terms, and there shall be two vacations of a fortnight each during the Academical Year.

---

CHAPTER IX.—OF MATRICULATION AND DEGREES.

1. Every person not being less than sixteen years of age who has complied with the conditions for admission to the course of study for a degree in the Faculty in which he proposes to become a student, and who in the presence of the Registrar or other duly appointed person signs his name in the University Roll Book to the following declaration, shall thereby become a Matriculated Student of the University. The declaration shall be in the following form :

“I do solemnly promise that I will faithfully obey the Statutes and Regulations of the University of Adelaide so far as they may apply to me, and that I will submit respectfully to the constituted authorities of the said University, and I declare that I believe myself to have attained the full age of sixteen years.”

2. Students who shall have fulfilled all the conditions prescribed by the Statutes and Regulations for any Degree may be admitted to that Degree at a meeting of the Council and Senate, to be held at such time as the Council shall determine.

3. Any person who has been admitted to a Degree in any University recognized by the University of Adelaide, may be admitted *ad eundem gradum* in the University of Adelaide.

4. Every candidate for admission to a Degree in the University shall be presented by the Dean of his Faculty ; but candidates may be admitted *in absentia* with the permission of the Council.

5. Persons who have completed the whole or part of their undergraduate course in any University or College of a University recognised by the University of Adelaide, may with the permission of the Council be admitted *ad eundem statum* in the University of Adelaide.

6. The following shall be the forms of Presentation for Admission to Degrees :

#### CHAPTER X.—OF THE FACULTIES.

1. There shall be Faculties of Arts, Science, Law, and Medicine.
2. The Faculty of Law shall consist of the Chancellor and Vice-Chancellor, of all members of the Council who shall be Judges of the Supreme Court, of two other members of the Council, to be annually appointed by the Council, and of the Professors and Lecturers in Law. Each of the other Faculties shall consist of the Chancellor and Vice-Chancellor, three other members of the Council, to be annually appointed by the Council, and of the Professors and Lecturers in the subjects of the Course of the Faculty.
3. Each Faculty shall advise the Council on all questions touching the studies, lectures, and examinations in the Course of the Faculty.
4. Each Faculty shall annually elect one of their number to be Dean of the Faculty.
5. The Dean of each Faculty shall perform such duties as shall from time to time be prescribed by the Council, and (amongst others) the following :—

- a. He shall, at his own discretion, or on the written request of the Chancellor or Vice-Chancellor, or of two members of the Faculty, convene meetings of the Faculty.
  - b. He shall preside at all meetings of the Faculty at which he shall be present.
  - c. Subject to the control of the Faculty he shall exercise a general superintendence over its administrative business.
6. When the Dean is absent from a meeting, the Faculty shall elect a Chairman for that occasion.
7. The Board of Examiners in the subjects of the Course of each Faculty shall consist of the Professors and Lecturers in those subjects, together with such Examiners as may be appointed by the Council.
8. The appointment of examiners in Law in the subjects necessary for admission to the Bar shall be subject to approval by the Judges of the Supreme Court.
- 

#### CHAPTER XL.—OF THE BOARD OF MUSICAL STUDIES.

1. There shall for the present be a Board of Musical Studies, consisting of the Chancellor and Vice-Chancellor, of three members of the Council, to be annually appointed by the Council, and of the Professors and Lecturers in the School of Music. The Council may also annually appoint other persons, not exceeding two, to be members of the Board.
2. The Board shall advise the Council upon all questions touching the studies, lectures, and examinations in Music.
3. The Board shall annually elect a Chairman.
4. The Chairman shall perform such duties as shall from time to time be prescribed by the Council and (amongst others) the following :—

He shall, at his own discretion, or upon the written request of the Chancellor or Vice-Chancellor, or of two members of the Board, convene meetings of the Board.

He shall preside at the meetings of the Board.

Subject to the control of the Board, he shall exercise a general control over its administrative business.
5. When the Chairman is absent from a meeting, the Board shall elect one of their number to preside.
6. The Council shall, when necessary, appoint a sufficient number of Examiners, who, together with the Professors and Lecturers of the School of Music, shall constitute the Board of Examiners in Music.

CHAPTER XII.—OF THE BOARD OF DISCIPLINE.

1. There shall be a Board of Discipline consisting of the Chancellor, the Vice-Chancellor, the Deans of the various Faculties, the Chairman of the Board of Musical Studies, and such Professors or Lecturers as may be appointed by the Council.

2. The Board shall annually elect a Chairman. When the Chairman is absent from a meeting, the Board shall elect a Chairman for that occasion.

3. The Chairman shall perform such duties as shall from time to time be prescribed by the Council, and (amongst others) the following :—

He shall at his own discretion, or upon the written request of the Chancellor or Vice-Chancellor, or of two members of the Board, convene meetings of the Board.

He shall preside at the meetings of the Board.

Subject to the control of the Board, he shall exercise a general control over the discipline of the University.

4. Subject to the approval of the Council the Board may make Rules for the conduct of students on the premises of the University.

5. It shall be the duty of the Board to enquire into any complaint against a student, and the Board shall have the power

- (a) To dismiss such complaint.
- (b) To admonish the Student complained against.
- (c) To inflict a fine on such Student not exceeding forty shillings.
- (d) To administer a reprimand either in private or in the presence of any Class attended by such Student.
- (e) To suspend such Student temporarily from attendance on any course of instruction in the University.
- (f) To exclude such Student from any place of recreation or study in the University for any time not extending beyond the current Academical Year.
- (g) To expel from the University such Student.

Every such decision of the Board shall be reported to the Council, who may reverse, vary, or confirm the same.

6. Any Professor or Lecturer may dismiss from his class any student whom he considers guilty of impropriety, but shall on the same day report his action and the ground of his complaint to the Chairman.

CHAPTER XIII.—OF THE “ANGAS ENGINEERING SCHOLARSHIP” AND THE “ANGAS ENGINEERING EXHIBITIONS.”

of the Angas  
Engineering  
Scholarship.

1. The Scholarship shall be tenable for three years, and shall be of the annual value of £200.

2. Each Candidate for the Scholarship must be under twenty-eight years of age on the first day of the month in which he shall compete for it, and must have resided in South Australia for at least five years.

3. Candidates for the Scholarship must have graduated in Arts or Science at the University of Adelaide.

4. The Scholarship shall be competed for triennially, in the month of March ; but if on any competition the Examiners shall not consider any candidate worthy to receive it, the Scholarship shall for that year lapse, but shall be again competed for in the month of March next ensuing.

5. The examination shall be in the following subjects :

(1) *Mathematics.*

(2) *Physics.*

(3) *Geology.*

(4) *Chemistry.*

\* (5) *Mechanical and Engineering Drawing.*

And in such other subjects as the Council shall from time to time direct.

Schedules defining the scope of the examination in the above subjects shall be drawn up by the Faculty of Science, subject to the approval of the Council, and shall be published in the University Calendar of each year.

6. Within such time after gaining the Scholarship as the Council shall in each case allow, the Scholar must proceed to the United Kingdom and there spend the whole of the time, during which the Scholarship is tenable, in articles to a Civil Engineer, or as a Student in a College or University there, or partly in articles to a Civil Engineer and partly as a Student in a College or University, such Civil Engineer, College, or University to be approved by the Council. Provided that any such Scholar may by special permission of the Council spend part of his time in study or practical training outside the United Kingdom.

7. Payment of the Scholarship, computed from the first day of April next succeeding the award thereof, shall be made quarterly, at the Office of the Agent-General in London, or at such other place or places as the Council shall from time to time direct, subject to the previous receipt of

\* The Council have now added **Machine Design** For details see page 88.

satisfactory evidence of good behaviour and continuous progress in Engineering Studies, according to the course proposed to be followed by the Scholar.

8. Whenever such evidence is not satisfactory, the Council may altogether withhold, or may suspend for such time as they may deem proper, payment of the whole or of such portion as they may think fit of any moneys due, or to accrue due, to the Scholar on account of the Scholarship, or may deprive him of his Scholarship.

9. On his returning to settle in South Australia within five years from the time of gaining the Scholarship, and in possession of such Degree, Diploma, or Certificate as a Civil Engineer as the Council shall approve, and upon his writing to the approval of the Council a report of his proceedings and engineering work, the Scholar shall receive the further sum of £100 towards his travelling expenses.

10. Should any successful candidate not retain the Scholarship for the full period of three years, notice of the vacancy shall be published by the Council in the Adelaide daily papers; and an examination shall be held in the month of March next ensuing.

11. There shall also be three "Angas Engineering Exhibitions," of which one may be awarded in each year after 1888. Each Exhibition shall be of the annual value of £60, and tenable for three years, computed from the first day of March in the year in which it shall be awarded.

Of the Angas  
Engineering  
Exhibitions

12. In March, 1888, the Honorable John Howard Angas shall be entitled to appoint one Exhibitioner, who may or may not be a student of the University.

13. In March in each year after 1888 one of the Angas Engineering Exhibitions shall be open for competition at a special examination in subjects prescribed one year previously by the Council; but the Exhibition will not be awarded unless the Examiners are satisfied that one of the candidates is worthy to receive it.

14. Each candidate must have passed the Senior Public Examination, or such other examination as the Council shall from time to time prescribe, and must have been not more than eighteen years of age on the first day of the month in which he shall compete for the Exhibition.

15. Each Exhibitioner must within one month after he has become such enrol himself as a matriculated student in Science, and must thenceforward prosecute with diligence his studies for the Degree of Bachelor of Science, and attend the lectures and pass the Examination proper to each year of the course for that Degree.

Failure by any Exhibitioner (including the appointee of the Honorable John Howard Angas, in case he shall not already be a student of the

University) to enrol himself as a matriculated student in Science within one month after he has become an Exhibitioner, or to pass any one of the Examinations for the Degree of Bachelor of Science shall cause an absolute forfeiture of his Exhibition, unless such failure shall, in the opinion of the Council, have been caused by ill-health or other unavoidable cause.

16. Payment of the Exhibitions will be made quarterly out of the income (when received) of the money hereinafter mentioned; but payment need not be made to any Exhibitioner whose conduct as a student throughout the quarter has not been in every respect satisfactory to the Council. Whenever any Exhibitioner's conduct, either in any particular quarter or during any longer period, has not been satisfactory, the Council may altogether withhold or may suspend or postpone for such time as they may deem proper payment of the whole or of such portion as they may deem fit of any moneys due or to accrue due to any Exhibitioner on account of his Exhibition, or may deprive him of his Exhibition.

17. Should any Exhibitioner not retain his Exhibition for three years the Council may, if they think proper, give notice of the vacancy, and that a special examination to fill it will be held at a specified date, and such Exhibition shall be open for competition at that examination in such subjects as the Council shall on each occasion prescribe. The Exhibition will not be awarded unless the examiners are satisfied that one of the candidates is worthy to receive it; and, if awarded, shall (notwithstanding anything in these Statutes contained) be held only from the date of the award until the expiration of the three years during which it would have been held had the vacancy not occurred.

18. No Exhibitioner shall, save by permission of the Council, hold-concurrently with his Exhibition, any other Exhibition or any Scholarship.

Notice of entry  
and fee for  
Scholarship  
and  
Exhibition.

19. Candidates for the Scholarship and Exhibitions shall give at least three calendar months' notice, in the prescribed form, of their intention to compete, and shall with their notices forward to the Registrar evidence satisfactory to the Council of having fulfilled the conditions stated in these Statutes, and each Candidate for the Scholarship shall with his notice forward to the Registrar an Examination Fee of £5 5s.

20. The Statutes contained in this Chapter shall come into operation on the receipt by the University from the Honorable John Howard Angas, his executors or administrators, of the sum of £4,000, which shall be invested in such a manner as to entitle the University to an annual grant, equal to five pounds per centum per annum thereon, under the Fifteenth Section of the Adelaide University Act. The income (including such grant) to be derived from that sum, or so much of such income as shall be sufficient, shall be applied in paying the said

Exhibitions, the Angas Engineering Scholarship, and the sum of £100 mentioned in the ninth of the Statutes in this chapter, and so much of such income as in any year shall not be so applied, shall be at the disposal of the Council for the purposes of the University.

CHAPTER XIV.—OF THE JOHN HOWARD CLARK  
SCHOLARSHIPS.

Whereas various persons have subscribed and have agreed to pay to  
the University of Adelaide a sum of money for the purpose of consti-  
tuting a fund for founding the Scholarships hereinafter named : And the  
Council of the said University have agreed to invest that sum, when  
received by them, and to apply the income thereof, in the manner  
specified in these Statutes : And whereas it has been agreed that the  
word “income” shall include as well interest to accrue from investments  
of the said fund as grants to be received from the Government in respect  
thereof :

It is hereby provided that from and after the receipt by the said  
Council of the said sum :

1. There shall be two Scholarships, tenable for two years each,  
one of which shall be competed for in the month of April in each  
year by Matriculated Students of the University who shall, at  
the next preceding Ordinary or Supplementary Ordinary Exami-  
nation, have completed the first year of their course for the  
Bachelor of Arts Degree. The Scholarships shall be called the  
“John Howard Clark” Scholarships.

2. Each Scholarship shall be competed for at a special exami-  
nation in English Literature in subjects prescribed by the Council  
one year previously, but if on any competition the Examiners  
shall not consider any candidate worthy to receive the Scholarship  
it shall for that year lapse.

3. Only one Scholarship shall be awarded in any one year so  
long as there are only two Scholarships.

4. Each scholar shall pass the Ordinary Examinations proper to  
his year, and shall also pass in the month of April at the end of  
the first year of his Scholarship such examination in the subjects

thereof as the Council shall from time to time prescribe. Those subjects shall be published by the Council twelve months before the examination.

5. Every such scholar shall be in all respects subject to the discipline and to the Statutes and Regulations for the time being of the University.

6. Each scholar shall receive one half of the annual income so long as that income does not exceed sixty pounds. Whenever the annual income shall exceed sixty pounds, each scholar shall receive thirty pounds per annum.

7. The Fund for founding the Scholarships shall be invested by the Council in such a manner as will entitle the Council to claim from the Government an annual grant in respect thereof. Any surplus interest, and any sums accumulating from the non-awarding of the Scholarships, shall be considered part of the Fund and be invested in the like manner until there shall have accumulated a sum sufficient to found a third Scholarship, which shall be competed for and awarded at such times as the Council shall direct: Provided that no portion of the annual grant shall be so accumulated. All subsequent accumulations shall be applied at the discretion of the Council towards the carrying out of the general objects of the John Howard Clark Scholarships.

#### CHAPTER XV.—OF THE STOW PRIZES AND SCHOLAR.

The Statutes of the Stow Prizes and Scholar, allowed by the Governor on the 18th December, 1886, are hereby repealed and the following substituted therefor:—

Whereas a sum of Five Hundred Pounds has been subscribed with the intention of founding Prizes in memory of the late Randolph Isham Stow, sometime one of the Justices of Her Majesty's Supreme Court of this province; and it has been agreed to pay that sum to the University for the purposes and considerations and upon the conditions mentioned in the following Statutes: It is hereby provided that from and after, and in consideration of, the receipt by the University of that sum:

\*1. There shall be annual prizes, to be called "The Stow Prizes," for which Students studying for the Degree of Bachelor of Laws may compete at the Examinations in Laws in the third term in each academic year.

2. Each of the Stow Prizes shall consist of the sum of Fifteen Pounds, or (at the option of the prizeman) of books to be selected by him to the value of that sum.

\* Allowed 15th December, 1892.

3. After the Examinations, the Board of Examiners shall report to the Council the names of the Students who (having passed the Examinations proper to their respective years) have been most successful in the law subjects at such Examinations and are, in the opinion of the Board, worthy to receive prizes ; and Stow Prizes shall be awarded to such Students accordingly.

4. Every Student who at Three Examinations passed by him (Two of which shall be the Third and Fourth Year Examinations), shall win a Stow Prize, shall receive a gold medal, and in the certificate of his degree shall be styled the "Stow Scholar."

5. Students, who have already graduated in Arts or obtained the University's Final Certificate of having passed in the subjects qualifying for admission as a Practitioner of the Supreme Court, are eligible as Candidates for the Stow Prize only in the event of their proceeding to the LL.B. Degree under the Regulations prescribed for Students who have not already graduated in Arts or obtained the above mentioned Certificates.

6. No Student, who claims exemption from any subject in an Examination on the ground of having previously passed in it, can compete for the Stow Prize in that Examination.

#### CHAPTER XVI.—OF THE COMMERCIAL TRAVELLERS' ASSOCIATION SCHOLARSHIP.

Whereas a sum of One Hundred and Fifty Pounds has been paid to the University by the Commercial Travellers' Association (Incorporated) for the purpose of founding a Scholarship, it is hereby provided that

1. The said Scholarship shall be awarded by the said University to any matriculated student thereof, who being a son or daughter of a member of the said Association shall be nominated by the Committee of Management of the said Association, and such student so nominated shall hold such scholarship for one or more consecutive years, as the Committee of Management of the said Association shall from time to time declare ; and it shall be lawful for the Committee of Management of the said Association from time to time, at the end of any academical year, to substitute another student for the holder of the said Scholarship for the time being, and such substitute shall thereupon have all the advantages connected with the holding of such Scholarship.

2. The holder of the said Scholarship shall have the following advantages, that is to say : he shall be exempt from payment of all University fees during such time as he shall hold the Scholarship up to and including the fees payable on taking the Degree

of Bachelor of Arts, Bachelor of Science, or Bachelor of Music; but in case any student shall cease to hold the Scholarship, such student shall not be exempt from payment of such fees after the time at which he shall cease to hold such Scholarship. And any holder of such Scholarship taking the Degree of Bachelor of Arts, Bachelor of Science, or Bachelor of Music while holding such Scholarship shall be entitled to have the fee paid by him on matriculation or on entering for the Senior Public Examination returned to him.

3. Every such scholar shall be in all respects subject to the discipline and to the Statutes and Regulations for the time being of the said University.

4. Save by permission of the Council of the said University, no such scholar shall be entitled to exemption from University fees during more than nine consecutive Academic Terms, computed from the day next preceding the commencement of the Academic year in which, or in the vacation preceding which, he or she becomes a scholar.

---

#### CHAPTER XVI.A.—OF THE EVERARD SCHOLARSHIP.\*

Whereas the late William Everard has bequeathed the sum of £1,000 to the University, for the purpose of founding a Scholarship to be called by his name, and the Council of the University of Adelaide have agreed to invest that sum and to apply the income thereof in the manner specified in these statutes, It is hereby provided that in consideration of the receipt by the University of the above-mentioned sum—

1. The Scholarship shall be called "The Everard Scholarship," and shall be competed for annually.

2. The Scholarship shall be of the value of Fifty Pounds, and shall be paid to the Scholar in one sum at the Commemoration at which the Scholar is entitled to take his Degree.

3. The Scholarship shall be awarded to the Student who shall be placed first in the Class List of the Final Examination for the Degrees of Bachelor of Medicine and Bachelor of Surgery; provided that he shall have passed through the whole of his medical course at this University and that he shall be considered worthy by the Board of Examiners.

4. The Scholar so appointed shall in the certificate of his Degree be styled the Everard Scholar.

\* Allowed 13th November, 1890.

CHAPTER XVII.—OF CONDUCT AT EXAMINATIONS.

1. If during any examination, any candidate use any book or notes, or give assistance to another candidate, or through culpable negligence allow any other candidate to copy from or otherwise use his papers, or accept assistance from any other candidate, or use any manuscript of any other candidate, he shall lose that examination, and shall be liable to such further punishment by exclusion from future examinations or otherwise as the Council shall determine.

2. Whenever any of the foregoing acts of misconduct shall be detected, or whenever any breach of good order or propriety shall be committed during any examination, any Examiner present may at once exclude the candidate so misbehaving from the Examination Room.

---

\*CHAPTER XVIII.—OF ACADEMIC DRESS.

Chapter XVIII. of the Statutes of Academic Dress, allowed by the Governor on the 18th December 1886, is hereby repealed and the following Statute is substituted therefor :—

1. At all lectures, examinations, and public ceremonies of the University, Graduates and Undergraduates must appear in academic dress.

2. The academic dress shall be :

For Undergraduates—A plain black stuff gown and trencher cap.

For all Graduates—A black trencher cap with black silk tassel; and

For Bachelors and Doctors of Laws, Bachelors and Doctors of Medicine, Bachelors and Masters of Surgery, Bachelors and Masters of Arts, Bachelors and Doctors of Science, Bachelors and Doctors of Music—Black gowns similar in shape and material to those used at Cambridge for the same Degrees; and hoods of the same shape as those used at that University.

The hoods for Bachelors to be of black silk or stuff lined to a width of six inches with silk. The colour of such lining to be, for Bachelors of Laws, blue; for Bachelors of Medicine and Bachelors of Surgery, rose; for Bachelors of Arts, grey; for Bachelors of Science, yellow; and for Bachelors of Music, green.

The hoods for Masters to be of black silk lined entirely with silk of a darker shade of the colour used for the hoods for Bachelors of the same faculty.

The hoods for Doctors to be of silk of a darker shade of the colour

\* Allowed 9th December, 1891.

used for the hoods of Bachelors of the same faculty, lined entirely with silk of the lighter shade of the same colour.

The colours above referred to shall accord with specimens attached to a document marked A, to which the seal of the University has been affixed.

3. Notwithstanding anything contained herein, members of the Senate who have been admitted *ad eundem gradum* may at their option wear the academic dress appropriate to the Degree in virtue of which they have been so admitted.

#### CHAPTER XIX.—SAVING CLAUSE AND REPEAL.

1. The Chancellor, Vice-Chancellor, Professors, Lecturers, Registrar, and other officers of the University at the time of the allowance, and countersignature by the Governor of these statutes shall have the same rank, precedence, and titles, and hold their offices by the same tenure, and upon, and subject to the same terms and conditions, and (save the Chancellor and Vice-Chancellor) receive the same salaries and emoluments, and be subject to dismissal from their offices and suspension for a time from performing the duties and receiving the salaries thereto as if these statutes had not been made.

2. From and after the allowance and countersignature by the Governor of these statutes there shall be repealed :—

The statutes allowed and countersigned by the Governor on each of the undermentioned days, viz :—

1. The 28th day of January, 1876.
2. The 7th day of November, 1881.
3. The 12th day of December, 1882.
4. The 16th day of September, 1885.

And the Regulations allowed and countersigned by the Governor on the 21st day of August, 1878.

Provided that—

I. This repeal shall not affect—

a. Anything done or suffered before the allowance and countersignature by the Governor of these statutes under any statute or regulation repealed by these statutes ; or

b. Any right or status acquired, duty imposed, or liability incurred by or under any statute hereby repealed ; or

c. The validity of any order or regulation made under any statute or regulation hereby repealed ; and

II. In particular, but without prejudice to the generality of the foregoing provisions, the repeal effected by these Statutes shall not alter the rank, precedence, titles, duties, conditions, restrictions, rights, salaries, or emoluments attached to the Chancellorship or Vice-Chancellorship or to any Professorship, Lectureship, Registrarship, or other office held by the present Chancellor or Vice-Chancellor, or by any existing Professor, Lecturer, Registrar, or other officer.

Allowed the 18th December, 1886.

---

**\*CHAPTER XX.—OF THE ROBY FLETCHER SCHOLARSHIP.**

Whereas a sum of one hundred and sixty pounds has been paid to the University by various subscribers for the purpose of founding a Scholarship in memory of the late Rev. William Roby Fletcher, M.A., formerly Vice-Chancellor of the University, it is hereby provided that—

I. The Scholarship shall be awarded to such matriculated student of the second year in the Faculty of Arts or the Faculty of Laws as shall be the most distinguished in the class of Mental and Moral Philosophy, provided that in the opinion of the Council such student is of sufficient merit.

II. The holder of the Scholarship shall be exempt from payment of fees for instruction during the third year of the course in the Faculty of Arts or the Faculty of Laws.

III. This Statute may be varied from time to time.

\* Allowed 11th December, 1895.

---

**\*\*CHAPTER XXI.—OF THE DR. DAVIES-THOMAS SCHOLARSHIPS.**

Whereas Mrs. Davies-Thomas has given the sum of £400 for the present purpose of founding two Scholarships to be called after the late Dr. Davies-Thomas, and the Council of the University of Adelaide have agreed to invest that sum and to apply the income thereof in the manner specified in these Statutes. It is hereby provided that in consideration of the receipt by the University of the above-mentioned sum :—

- I. The Scholarships shall be called the Dr. Davies-Thomas Scholarships, and shall be competed for annually.
  - II. Each Scholarship shall be of the value of £10 and shall be awarded to the best student in each of the Third and Fourth years of the M.B. course who shall be placed in the First Class.
  - III. Each scholar shall be credited with the said sum of £10 towards payment of his or her fees.
- \*\* Allowed 15th December, 1896.
-

## EVENING CLASSES.

- I. The Council will, from year to year, arrange for Evening Classes to be held in such subjects as may be deemed expedient.
- II. The number of lectures in each subject will be 25 or 50 according as the classes are held once or twice a week.
- III. No student will be enrolled who is under sixteen years of age.
- IV. The fees will be £1 for each of the shorter courses and £1 10s. for each of the longer courses (except where otherwise stated). No entrance fee will be charged.
- V. The Council may, from year to year, fix the minimum number of students who must pay their fees before a class is formed in any subject.
- VI. The fees are to be paid to the Registrar, and no student shall be enrolled in the class-list unless he presents to the Lecturer the Registrar's receipt.
- VII. The Lecturer appointed for each Class will keep a roll of attendances, and a statement of the attendance will be laid before the Council at the conclusion of each term.
- VIII. If, in the opinion of the Lecturer, any intending student does not possess the necessary knowledge to enable him to profit by the Lectures, the name of such student shall not be entered on the Class List, and the fees shall be returned to him.
- IX. The students attending Evening Classes shall be subject to the general regulations of the University.

## ARRANGEMENTS FOR 1897.

## SCHOLARSHIPS.

---

### UNIVERSITY SCHOLARSHIPS.

---

The following Regulations have been made by the Minister of Education :—

#### A.—FOR DAY STUDENTS.

##### I.—ENTRANCE SCHOLARSHIPS.

- I. Three scholarships, of the value of £35, £30, and £25 respectively, will be offered for competition annually. Each Scholarship will be tenable for one year.
- II. Candidates must have been resident in the colony for at least one year immediately preceding the examination, and must be under eighteen years of age on the 31st of December in the year in which the examination is held. They must not previously have attended any part of the day undergraduate course at the University.
- III. The award of the scholarships shall be decided by the result of the Senior Public Examination of the University, together with such further examination as may, if necessary, be prescribed by the University Council.
- IV. The particular subjects of examination and the relative value of each shall be fixed by the University Council, subject to the approval of the Minister.
- V. The scholarships will not be awarded unless the Board of Examiners of the University certify that in their opinion the candidates show such special ability as to justify their further education at the University.
- VI. Successful candidates must enter the University as undergraduate students in either Arts or Science in the March following the examination. Except in case of illness or other sufficient cause, they must attend all the lectures, and pass all the examinations required by the University in the selected course.
- VII. Payment of the scholarships will be made in three equal instalments at the end of the three University terms. Each scholar must present a certificate of diligence and proficiency in a form to be prescribed by the Minister, and payment may be reduced or withheld altogether if such certificate is not satisfactory to the Minister.
- VIII. No person may hold one of these scholarships in conjunction with any other tenable at the University, except the John Howard Clark scholarship.

## II. UNDERGRADUATE SCHOLARSHIPS.

- IX. Three scholarships, of the value of £35, £30, and £25 respectively, will be offered for competition in 1894, and following years, among undergraduates who have completed the first year of their University course in Arts or Science, and three of like value in 1895, and following years, among undergraduates who have similarly completed the second year.
- X. Candidates may be undergraduates who have either held a scholarship during the year or were eligible to compete for one at the beginning of the year.
- XI. The scholarships will be divided between the Arts and Science schools in the proportion of the number of scholars studying in those schools respectively during the year for which the scholarships are offered.
- XII. The scholarships will be awarded according to the results of the terminal and final University examinations for the year, provided that no scholarship shall be awarded to any candidate unless he has passed with credit in at least one subject at the final examination, and the examiners report to the Minister that his work is of such a nature as to justify his appointment to a scholarship.
- XIII. Notwithstanding anything contained in these regulations, the examiners may recommend the Minister to vary the number and amount of the scholarships in any one year, provided that no one scholarship shall exceed £35 and that the total shall not exceed £90.
- XIV. Successful candidates must continue their undergraduate course in the following year in the school in which they have entered. Except in case of illness or other sufficient cause, they must attend all the lectures and pass all the examinations required by the University in the selected course.
- XV. Payment of the scholarships will be made in three equal instalments at the end of the three University terms. Each scholar must present a certificate of diligence and proficiency, in a form to be prescribed by the Minister; and payment may be reduced or withheld altogether if such certificate is not satisfactory to the Minister.
- XVI. No person may hold one of these scholarships in conjunction with any other tenable at the University except the John Clark scholarship.

B.—FOR EVENING STUDENTS.

I.—ENTRANCE SCHOLARSHIPS.

- XVII. Five scholarships will be offered for competition to students entering on the evening course of study for a degree in Arts or Science, five to students who have completed the first year, four to students who have completed the second year, and four to students who have completed the third year. The value of each of these scholarships will be £10.
- \*XVIII. Candidates for the entrance scholarships must have been resident in the colony for at least one year immediately preceding the examination, and must be between sixteen and twenty-one years of age on the 31st of December immediately preceding the date of the examination. Candidates for the other scholarships must comply with similar conditions, one year of age being added for each year of the University course.
- XIX. The subjects of examination for the entrance scholarships shall be fixed by the University Council, subject to the approval of the Minister. The examination shall be qualifying, not competitive, and the scholarships shall be awarded to such candidates as in the opinion of the Board of Examiners show the most promise, due allowance being made for their previous opportunities.
- XX. The subjects of examination for the scholarships to be awarded at the end of each year shall be such portions of the Arts or Science course as have been studied in the evening classes during the year.
- XXI. The scholarships shall be divided between the Arts and Science schools in the proportion of the number of scholars studying in those schools respectively during the year for which the scholarships are offered.
- XXII. Such portion of the scholarship as may be necessary to pay the University fees shall be paid on the certificate of the Registrar at the beginning of the University year, and the balance shall be paid at the close of the year on production of a certificate from the Registrar that the scholar has diligently and regularly attended the prescribed lectures.
- 
- XXIII. Should any difficulty arise in the interpretation of the Regulations referring to University scholarships the question shall be referred to the Minister, whose decision shall be final.

\* NOTE.—The Hon. the Minister of Education has agreed to raise the maximum age to 25.

### THE ANGAS ENGINEERING SCHOLARSHIP.

The Hon. J. H. Angas has founded in connection with the University a Scholarship, of which the object is to "Encourage the training of Scientific men, and especially Civil Engineers, with a view to their settlement in South Australia."

For the conditions upon which the Scholarship has been founded see Statutes, Chapter XIII. "Of the Angas Engineering Scholarship," page 66.

An examination for this Scholarship will be held in March, 1898, and should the Scholarship not be awarded, an examination for this Scholarship will, if required, be held in March, 1899.

For form of notice by candidates of intention to compete for the Scholarship. (*Vide* page 69).

The following schedule has been drawn up in accordance with No. 5 of the Statutes concerning this Scholarship:—

1. MATHEMATICS.—The Mathematical subjects of the course of the B.Sc. Degree.

2. PHYSICS.—The subjects in Physics of the course of the B.Sc. Degree.

3. GEOLOGY.

(1) As prescribed in the Third year's course in Science.

(2) The application of the science to drainage and water supply, architecture, road construction, and cognate branches.

(3) The candidates will be required to prove a practical acquaintance with the methods of constructing geological sections and maps. In this particular, specimens of actual work done may be submitted in evidence of practical knowledge.

4. CHEMISTRY.—As prescribed in the First and Second year's courses in Science.

Special attention to be given to the rock forming minerals, and the chemistry of the same, disintegration of rocks; limes, cements, and clays. The chemistry of explosives. A general practical acquaintance with the methods of water analysis. And in general, the application of chemistry to the elucidation of the causes of decay of building materials, and of the means whereby the same may be arrested or prevented.

5. ELEMENTARY MACHINE DESIGN.

Nature of materials used in machine construction. Screw threads. Bolts, nuts, keys, and cotters. Shafting and shaft couplings. Journals and bearings. Toothed gearing. Cranks. Eccentrics. Connecting rods. Pistons and stuffing boxes. Lubricators. Valves, cocks, and slide valves. Boilers.

The following awards have been made of this Scholarship.

1882. Donaldson, George, B.A.

1889. Farr, Clinton Coleridge, B.Sc.

1892. Wyllie, Alexander, B.Sc.

1895. { Birks, Laurence, B.Sc. } equal.  
      { Chapple, Alfred, B.Sc. }

## THE ANGAS ENGINEERING EXHIBITIONS.

For the conditions upon which these Exhibitions have been founded see Statutes, Chapter XIII. "Of the Angas Engineering Scholarship and the Angas Engineering Exhibitions, Sections 11 to 19 inclusive, pages 67 and 68.

An examination for one Exhibition will be held in March, 1897.

The subjects for Examination in March, 1897, will be found in the Calendar for 1896 (page 89).

For form of notice by candidate of intention to compete for an Angas Engineering Exhibition, see page 70.

The following Schedule has been drawn up in accordance with No. 13 of the Statutes concerning these Exhibitions for the year 1898.

### 1. MATHEMATICS (Pure and Applied).

#### PURE MATHEMATICS.

*Arithmetic*, including the theory of the various processes; the elements of mensuration.

*Algebra*—To Quadratic Equations and Surds, both inclusive.

Questions will also be set in Algebra up to and including the Binomial Theorem for a positive integral exponent.

*Geometry*—The substance of Euclid, Books I., II., III., IV., with Exercises.

Questions will also be set in the substance of Euclid, Book VI., and Propositions 1 to 21 of Book XI.; and in Plane Trigonometry and Solution of Triangles up to and including Logarithms.

#### APPLIED MATHEMATICS.

Elementary Statics, Dynamics, and Hydrostatics.

2. MODERN LANGUAGES—French, German. As prescribed for the Senior Public Examination. (*Vide* Appendix E, page 37.)

3. SCIENCE.—Chemistry and Physics. As prescribed for the Senior Public Examination. (*Vide* Appendix E, page 38.)

### 4. PHYSICS AND CHEMISTRY (Practical Examination).

*Physics*—Candidates will be asked to perform some simple experiments such as are described in Worthington's "First Course of Laboratory Practice."

*Chemistry*—Candidates will be asked to analyse simple salts soluble in water or acid, containing not more than one acid and one base.

5. PHYSICAL GEOGRAPHY AND GEOLOGY.—As prescribed for the Senior Public Examination. (*Vide* Appendix E, page 39.)

The scale of marks for this examination shall be as follows :—

## THE ST. ALBAN SCHOLARSHIP.

The Masonic Lodge of St. Alban of South Australia having paid to the University the sum of £150 for the purpose of founding a Scholarship to be called the St. Alban Scholarship, the University has agreed—

1. That the St. Alban Scholarship shall be awarded by the University to any matriculated Student thereof, who (being certified in the form hereinafter provided, or in some similar form, to be a son or daughter of a worthy past or actual member of the said Fraternity) shall be nominated by the said Lodge as a person to whom a St. Alban's Scholarship shall be awarded. Each Student so nominated shall hold such Scholarship for such number of consecutive academical Terms as the Student must for the time being complete in order to obtain a Degree in (as the case may require) Laws, Medicine, Arts, Science, or Music : Provided nevertheless that the said Lodge may from time to time at the end of any academical year terminate the tenure of the Scholarship by the holder thereof for the time being, and substitute another matriculated Student for such holder. Each Student so substituted shall therefrom have all the advantages appertaining to such Scholarship.

2. Each Scholar studying for a Degree in Arts, Science, or Music, shall during such time as he or she shall hold the Scholarship be exempt from the payment of all University fees including the fees payable on taking the Degree of Bachelor of Arts, Bachelor of Science, or Bachelor of Music. Each Scholar studying for a Degree in Laws or Medicine shall in each year, during which he or she shall hold the Scholarship, be credited by the University with the sum of £15 towards payment of his or her fees. Any Student ceasing to hold the Scholarship shall not be exempt from payment of such fees or entitled to credit for such sum of £15 after the time at which he or she shall cease to hold such Scholarship.

3. Scholars shall be in all respects subject to the Statutes and Regulations for the time being of the University.

4. Save by permission of the Council of the University no Scholar shall be entitled to exemption from or to a reduction of University fees during more than the number of academical Terms, reckoned consecutively, which such Scholar must complete in order to obtain a Degree in the course of study pursued by him or her, and the Terms shall be computed from the day next preceding the commencement of the academic year in which he or she shall become a Scholar.

5. Certificates in the respective forms hereinafter provided, or in some similar form, and purporting to be signed by the Master or Acting Master and by the Secretary or Acting Secretary, for the time being of the St. Alban Lodge, and to be sealed with the seal thereof, shall

respectively be accepted by the University as sufficient evidence of the truth of the statements contained therein respectively, and of the due signature and sealing thereof respectively.

6. In the event of the Lodge St. Alban being erased or dissolved or becoming extinct, and in the event of its warrant becoming extinct or being delivered up to the Grand Master for the time being of the said Fraternity in South Australia, or being cancelled or becoming extinct, the said Grand Master, or (failing him) the Pro-Grand Master, or (failing him) the Deputy Grand Master, shall be entitled to exercise the aforesaid right of nominating persons (being sons or daughters of worthy members of the said Fraternity as aforesaid) to whom the St. Alban Scholarship shall be awarded by the University, of terminating the tenure of such Scholarship by any holder thereof for the time being, and of substituting another matriculated student of the University in the room of any scholar whose tenure of the Scholarship shall have been terminated by such Grand Master or by the St. Alban Lodge. And certificates similar in form to those hereinafter set forth, but adapted to the altered circumstances and purporting to be signed by the Grand Master for the time being of the said Fraternity in South Australia, shall be accepted by the said University as sufficient evidence as well of the right of the person by whom any such Certificate shall purport to be signed to sign it and to do the act mentioned therein, as of the fact that the alleged act has been duly done.

### LATIN PROSE COMPOSITION.

PROFESSOR BENSLEY, M.A.

Time—One hour and a half.

Translate into Latin Prose—

The unfortunate death of Polonius gave the king a pretence for sending Hamlet out of the kingdom. He would willingly have put him to death, fearing him as dangerous; but he dreaded the people, who loved Hamlet, and the queen, who, with all her faults, doted on the prince, her son. So this subtle king, under pretence of providing for Hamlet's safety, that he might not be called to account for Polonius' death, caused him to be conveyed on a ship bound for England, under the care of two courtiers, by whom he despatched letters to the English court, which in that time was in subjection and paid tribute to Denmark, requiring for special reasons there pretended, that Hamlet should be put to death as soon as he landed on English ground. Hamlet, suspecting some treachery, in the night-time secretly got at the letters, and skilfully erasing his own name, he in the stead of it put in the names of those two courtiers, who had the charge of him, to be put to death: then sealing up the letters, he put them into their place again.

## GREEK PROSE COMPOSITION.

PROFESSOR BENSLEY, M.A.

Time—One hour and a half.

Translate into Greek Prose—

My Lord, This man, notwithstanding his plausible  
name, is one of the vilest men in our Country; He  
neither regardeth Prince nor People, Law nor Custom:  
but doth all that he can to possess all men with certain  
of his disloyal notions, which he in the general calls  
Principles of Faith and Holiness, And in particular, I  
heard him once myself affirm, *that Christianity, and the  
Customs of our Town of Vanity, were Diametrically  
opposite, and could not be reconciled.* By which saying,  
my Lord, he doth at once, not only condemn all our  
laudable doings, but us in the doing of them.

\* \* \* \* \*

My Lord, I could say much more, only I would not be  
tedious to the Court. Yet if need be, when the other  
Gentlemen have given in their Evidence, rather than  
anything shall be wanting that will dispatch him, I will  
enlarge my Testimony against him.

II. Give the English for the following; add brief explanatory notes where they are really necessary—*ἀπογραφῆ, προπέ-*

ρυσιν, παρασκευή, σανίδιον, εισάγειν δίκην, ὄφλιν εὐθύνην, ἀστράβη, παραφρυσκωρέεσθαι, ἐκδικάζειν, φορμός, συγκοφαντέιν, βουλευεῖν, ἀντίδοσις, ἀγωνισάμενον τῆς Ξενίας, ἀνάκρισις, τριηραρχία, εἰσφορά, προπηλακίζομαι, ἀντίγραφον, βάσανος, διατίθεσθαι, σιτοφύλακες, and the Greek for voting urns, to bribe, to get leave to bring an action, estate (in the legal sense), an interpleader, the total, the points in dispute, to confiscate, to give a dowry, an arbitrator, barber's shop, to lend, to weigh, to be guardian to, to impeach.

- III. Write notes on the Syntax of βοηθῆσαι Καλλία τὰ δίκαια—περὶ ὧν ἀποκρυπτόμεθα μηδένα εἰδέναι—ῥάδιον τοίνυν εἰδέναι ὅτι οὐδ' αὐτὸς Παγκλέων νομίζει ἑαυτὸν μὴ ὅτι Πλαταιέα εἶναι, ἀλλ' οὐδ' ἐλευθέρον—τούτοις δ' ὑμᾶς αὐτοὺς ἐπετρέψατε, ὡς μεγάλην καὶ ἐλευθέραν τὴν πόλιν ποιήσωσιν.
- III. Write short explanatory notes on—
- (α). ἐγὼ δὲ οὕτω πολλοῦ ἐδέησα τῶν τετρακοσίων γενέσθαι, ὥστε οὐδὲ τῶν πεντακισχιλίων κατελέγην.
- (β). τὰ ἐκ τῶν κύρβειων θύοντες.

## CREDIT.

The Credit papers in Greek for the First year were the same as the Pass papers for the Second year.

## PURE MATHEMATICS.

PROFESSOR BRAGG, M.A.

Time—Three hours.

I. Solve the equations—

$$(i.) x^2 + 2abx - ax - a^4 - a^3 - a^2b - a^2b^2 = 0.$$

$$(ii.) 2x + 3y - z = 5$$

$$x + y + 2z = 5$$

$$x^2 + \frac{2}{z^2} = \frac{3x}{z}$$

II. A certain fall in the price of silver would make it possible to buy two more ounces for £4; a rise of double the amount of the supposed fall would lessen the amount to be bought for £4 by  $3\frac{1}{2}$  ozs. Find the price of silver.

III. Simplify

$$\sqrt[p+q]{\frac{p^2}{a \cdot q} \cdot \frac{-q}{a}} \div \sqrt[p]{\frac{p+q}{a} \cdot \frac{p-2q}{a}}$$

IV. Show that the geometric mean between  $a$  and  $b$  is also the geometric mean of the arithmetic and harmonic means between the same quantities.

If two harmonic means be inserted between  $a$  and  $b$ , and also two geometric means and two arithmetic means, show that the product of the geometric means is a geometric mean between the product of the arithmetic and the product of the harmonic means.

V. Write down the coefficient of  $x^6$  in  $\left(1 - \frac{x}{3}\right)^{-6}$  and find the

value of  $\sqrt[3]{998}$  to 6 places of decimals.

VI. Find the number of combinations of  $n$  things,  $r$  together. If five points be taken on each of the sides of a triangle, how many triangles can be formed each having for its angular points three out of the fifteen.

VII. Find the values of  $\sin 18^\circ$ , and  $\cos 3^\circ$ .

VIII. Given  $\tan \theta = a$ , find an expression to include all possible values of  $\theta$ .

$$\text{Also solve the equation } \sec \theta - \tan^2 \theta = \frac{1}{25}$$

IX. Show that

$$(i.) \frac{1 - 6 \tan^2 \frac{\alpha}{2} + \tan^4 \frac{\alpha}{2}}{\left(1 + \tan^2 \frac{\alpha}{2}\right)^2} = \cos 2\alpha$$

$$(ii.) \cos^{-1} \frac{2x}{1+x^2} + \tan^{-1} \frac{2x}{1-x^2} = \frac{\pi}{2}$$

## PURE MATHEMATICS (Pass).

R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

I. If a straight line touch a circle, and from the point of contact a straight line be drawn cutting the circle, prove

that the angles made by this line with the line touching the circle are equal to the angles in the alternate segments.

$ABC$  is an isosceles triangle having  $AB = AC$ .  $D$  is the centre of its inscribed circle. If a circle be described to pass through  $B$ ,  $D$ , and  $C$ , show that  $AB$  and  $AC$  are tangents to it.

II. Inscribe a regular pentagon in a given circle.

$ABCDE$  is a regular pentagon and  $AE$ ,  $CD$  are produced to meet in  $F$ . Show that  $BF$  is bisected by  $DE$ .

III.  $ABCD$  are four points, taken in order, on a circle.  $BE$  is drawn so that the angle  $DBE = ABD$ , and  $CE$  is drawn to meet it so that  $CE$  produced through  $C$  makes with  $DC$  an angle  $= ACD$ . Show that  $E$  lies on the circle.

IV. Prove that a straight line drawn parallel to one side of a triangle cuts the other two sides, or those sides produced, proportionally.

$ABC$  is a triangle and a straight line  $LMN$  cuts  $AB$  and  $AC$  in  $M$  and  $N$  respectively, and  $CB$  produced in  $L$ . If  $AB : AC = LN : LM$ , prove that  $BM = CN$ .

V. Describe a rectilinear figure which shall be of given area and similar to a given rectilinear figure.

VI. Draw a perpendicular to a given plane from a given point without it.

VII. Show how to transform a system of logarithms having a given base to another system with a different base.

Prove that

$$\log \frac{96}{175} + \log \frac{45}{28} + \log \frac{6125}{24} + \log \frac{28}{225} = \log 28.$$

VIII. In any triangle prove that

$$(a). \frac{b-c}{b+c} \cot \frac{A}{2} = \tan \frac{B-C}{2}$$

$$(b). \frac{a+b}{c} = \frac{1 + \cos(A-B)}{\cos A + \cos B}$$

IX. In a triangle  $ABC$  if  $c = 105$  ft.,  $b = 79$  ft., and  $B = 40^\circ$ , determine the two possible values of  $A$ , having given

$$\begin{aligned} \log 1.05 &= .0211893 & , & \quad L \sin 40^\circ = 9.8080675 \\ \log 7.9 &= .8976271 & , & \quad L \sin 58^\circ 41' = 9.9316143 \\ & & & \quad L \sin 58^\circ 42' = 9.9316911 \end{aligned}$$

## ELEMENTARY PHYSICS.

PROFESSOR BRAGG, M.A.

Time—Three hours.

*Not more than ten questions are to be attempted altogether, nor more than four from any one section.*

### SECTION I.

- I. State and prove the law of the Parallelogram of Forces.  
How can you prove it experimentally?
- II. On one horizontal axle are mounted two cylinders of diameters 12 and 10 inches respectively. A rope winds round the larger cylinder a few times, passes down and under a pulley, from which hangs a weight of 100 lbs., and then winds a few times round the smaller cylinder in the opposite direction. What force must a man apply at the end of a handle of 18 inches radius, so as to turn the axle and lift the weight?
- III. When a shot is fired from a gun, is the momentum of the shot the same as that of the gun? Is the energy? Explain as far as you can.
- IV. Describe a way of comparing the specific gravities of two liquids which would mix if put together, setting out (a) the principles, (b) the practical details, (c) the peculiar advantages of the method you describe.
- V. If a spherical bubble of air in rising from the bottom to the surface of a lake swells to double its original diameter, how deep is the lake?

### SECTION II.

- VI. Inside a chamber with thick iron walls, e.g., the conning-tower of a warship, the magnetic force on the compass needle is weak. Explain this.
- VII. A metal conductor is mounted on an insulating stand and electrified. A neighbouring electroscope shows a divergence of its leaves. If a second insulated unelectrified conductor be placed between the first conductor and the electroscope without touching either, the leaves diverge further. Why?

- VIII. An iron wire is stretched between two blocks *A* and *B*, and a current is made to pass along it. Two wires from a galvanometer are connected to two points on the wire 10 cm. apart, and a deflection of  $20^\circ$  is noted. If now another wire, of copper, be stretched between the same blocks, the deflection falls to  $5^\circ$ . Give a probable explanation.
- IX. Describe very briefly some form of dynamo, alternating or continuous.
- X. What are the anode and kathode in a vacuum tube? State what you know of Crookes' experiments with kathode streams.

### SECTION III.

- XI. Explain the way in which an image of an object is formed in a mirror. On looking at the image of a candle in a mirror, some faint images can be seen in addition to the strong one. How are they caused?
- XII. If an image of a bright object is formed on a screen by means of a lens, a little colour is often perceived. Why? How is this avoided in the construction of optical instruments?
- XIII. Describe a way of measuring the coefficient of expansion of a liquid due to rise of temperature.
- XIV. What is the Specific Heat of a substance? How may it be measured?
- XV. An organ pipe is being sounded. A paper tray is lowered into the pipe. When half way down it does not affect the note, but when three-quarters of the way down the note jumps up an octave. Explain this.

### ENGLISH LITERATURE (I.)

PROFESSOR MITCHELL, M.A., D.Sc.

Time—Three hours.

Write essays on the following subjects:—

- (1.) Addison's method in character description.

- (2.) A critical appreciation of *one* poem from Hales's collection.
- (3.) "In the contrast of Richard and Bolingbroke lies the key-note of the play" of Richard II.
- 

## ENGLISH LITERATURE (II.)

PROFESSOR MITCHELL, M.A., D.Sc.

Time—Three hours.

- I. Give a history of the language before the Norman Conquest, including an account of the foreign elements.
- II. Explain the vowel scale, and use it to account for the shifting of the vowel sound in a variety of words.
- III. What forms of consonantal change are exemplified in *day, child, enough, through, kept*? Give parallel examples.
- IV. Give the main facts in the literary life of Dryden, *or* Johnson, *or* Byron.
- V. What are the outstanding merits and defects of Pope's poetry? Discuss the extent of its influence on the poetry of the eighteenth century.
- VI. Give an account of the soliloquy of Richard, beginning  
"I have been studying how I may compare  
This prison where I live unto the world."
- VII. Explain—
- (1.) "Fell sorrow's tooth doth never rankle more  
Than when he bites, but lanceth not the sore."
- (2.) "Nor I nor any man that but man is  
With nothing shall be pleased, till he be eased  
With being nothing."

### LATIN PROSE COMPOSITION.

PROFESSOR BENSLEY, M.A.

Time—One hour and a half.

Translate into Latin Prose—

I had occasionally much conversation with him on the state and prospects of his nation, especially of that part

of it which still continued in the original country of the Haiks—Ararat and its confines, which, it appeared, he had frequently visited. He informed me that since the death of the last Haik monarch, which occurred in the eleventh century, Armenia had been governed both temporally and spiritually by certain personages called patriarchs; their temporal authority, however, was much circumscribed by the Persian and Turk, especially the former, of whom the Armenian spoke with much hatred, whilst their spiritual authority had at various times been considerably undermined by the emissaries of the Papa of Rome, as the Armenian called him.

“The Papa of Rome sent his emissaries at an early period amongst us,” said the Armenian, “seducing the minds of weak-headed people, persuading them that the hillocks of Rome are higher than the ridges of Ararat; that the Roman Papa has more to say in heaven than the Armenian patriarch, and that puny Latin is a better language than nervous and sonorous Haik.”

### GREEK PROSE COMPOSITION.

PROFESSOR BENSLEY, M.A.

Time—One and a half hours.

Translate into Greek prose:—

The first character of right childhood is that it is Modest. A well-bred child does not think it can teach its parents, or that it knows everything. It may think its father and mother know everything—perhaps that all grown-up people know everything; very certainly it is sure that *it* does not. And it is always asking questions, and wanting to know more. Well, that is the character of a good and wise man at his work. To know that he knows very little;—to perceive that there are many above him wiser than he; and to be always asking questions, wanting to learn, not to teach. No one ever teaches well who wants to teach, or governs well who wants to govern; it is an old saying (Plato's, but I know not if his, first) and as wise as old.

- III. Write short notes on the use of ἄγευστος, ῥέθος, σαίνω,  
 ἀλάστορος, ἀποφράγγνυμαι, and quote the opening ten lines  
 of the play, marking the chief differences of reading.

- III. Comment carefully on the syntax or usage in—

- (α). ὡς ἂν σκοποὶ νῦν ἦτε τῶν εἰρημένων.  
 (β). σχολῇ ποθ' ἤξειν δεῦρ' ἂν ἐξηύχουν ἐγώ.

## CREDIT.

The Credit papers in Greek for the Second year were the same as the Pass papers for the Third year.

## PURE MATHEMATICS. (Pass).

PROFESSOR BRAGG, M.A.

Time—Three hours.

I. Given the exponential series, prove that

$$(a.) \log_e(1+x) = x - \frac{x^2}{2} + \frac{x^3}{3} - \dots$$

$$(b.) \log_e 2 = 2 \left\{ \frac{1}{3} + \frac{1}{3} \cdot \frac{1}{3^3} + \frac{1}{5} \cdot \frac{1}{3^5} + \dots \right\}$$

II. Find an expression for the present value of an annuity to continue for a certain number of years, allowing compound interest.

A man borrows £4,000 and agrees to pay it back in 10 years in annual instalments beginning at the end of the first year. What should be the amount of his annual payment, allowing compound interest at 5 per cent.?

III. What are recurring series? Show that they may be considered as derived from the expansion of a fraction.

Find the  $n^{\text{th}}$  term of the recurring series—

$$6 + 12x + 30x^2 + 84x^3 + \dots$$

IV. State and prove Fermat's theorem.

If  $n$  be a prime number, prove that  $n^{n-1} - 1$  is divisible by  $n-1$ .

V. A box contains 6 marbles, all different colours. They are picked out at random, one by one, and are not put back. Find the probabilities

(a) That a particular marble will be chosen at the third selection;

(b) That a particular marble will not be chosen until the last.

VI. Expand  $\sin^n \theta$  in terms of series of multiples of  $\theta$  when  $n$  is an odd positive integer.

Prove that

$$2^9 \cos^4 \theta \sin^6 \theta = 6 - 2 \cos 2\theta - 8 \cos 4\theta + 3 \cos 6\theta + 2 \cos 8\theta - \cos 10\theta.$$

VII. Resolve  $x^{2n} - 2x^n \cos \theta + 1$  into factors.

VIII. Find the sum to  $n$  terms of the series—

$$\cos 2\theta \operatorname{cosec} \theta \operatorname{cosec} 3\theta + \cos 4\theta \operatorname{cosec} 3\theta \operatorname{cosec} 5\theta + \cos 6\theta \operatorname{cosec} 5\theta \operatorname{cosec} 7\theta + \dots$$

IX. In any spherical triangle show that

$$(a.) \cot a \sin b = \cot A \sin C + \cos b \cos C$$

$$(b.) \cos^2 \frac{C}{2} = \cos^2 \frac{c}{2} \sin^2 \frac{A+B}{2} + \sin^2 \frac{c}{2} \sin^2 \frac{A-B}{2}$$

X. If the sides of a spherical triangle be small compared with the radius of the sphere, then each angle of the spherical triangle exceeds by one-third of the spherical excess the corresponding angle of the plane triangle whose sides are of the same length as the arcs of the spherical triangle.

## APPLIED MATHEMATICS I. (Pass).

### (Dynamics and Hydrostatics).

PROFESSOR BRAGS, M.A.

Time—Three hours.

I. Find the angle of elevation, which, with a given velocity of projection, will give the greatest horizontal range to a projectile.

There are two parallel walls 30 ft. high and 40 ft. apart. From a point on the ground at a distance of 20 ft. from the nearer wall a body is projected so as just to clear both walls. Find the velocity of projection, and also the time taken between the walls.

II. If a sphere of mass  $m$  moving with a velocity  $u$  impinge on a sphere of mass  $m_1$  moving with a velocity  $u_1$  in the same direction, show that the velocity of the former after impact is

$$\frac{mu + m_1 u_1 - em_1 (u - u_1)}{m + m_1}$$

where  $e$  is the elasticity of both spheres.

A perfectly elastic ball is dropped on to the floor from a height of 16 ft. A quarter of a second afterwards a

- ball of half the mass is dropped from the same spot. When and where will the two balls collide, and what will be their velocities after collision?
- III. Find the tension of the string of a conical pendulum.  
If a bicyclist ride round a corner at the rate of 7 miles an hour, describing a circle of 10 yards radius, find (approximately) his inclination to the vertical.
- IV. If equal volumes of two liquids be mixed, the specific gravity of the mixture is 1.5; if equal weights, it is 1.3. Find the specific gravity of each liquid.
- V. Find the position of the centre of pressure on a parallelogram, the upper edge of which is in the surface of a homogeneous liquid, not exposed to pressure.
- VI. State the conditions that must be satisfied in order that a body may float stably in a fluid.  
Three spherical balls, each of 2 inches diameter and of specific gravities 1.5, 1, and .5 respectively, are dropped into a cylinder of 6 inches diameter filled with water to a height of 6 inches. By how much does each alter (1) the pressure on the base, (2) the resultant pressure on either of the two halves into which the curved surface may be divided by a vertical plane.
- VII. Two closed metallic cylinders of equal section stand with their axes vertical one on top of the other. The upper is 40 inches, the lower 20 inches high. A fine tube runs from the bottom of the upper to the bottom of the lower cylinder. The upper is initially full of mercury, the lower of air at atmospheric pressure. Find how much mercury must run from the upper to the lower cylinder before there is equilibrium.
- VIII. Describe the ordinary air-pump, pointing out the causes which limit its action.

## APPLIED MATHEMATICS II. (Pass).

R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

- I. If three forces acting on a particle keep it in equilibrium, show that each is proportional to the sine of the angle between the other two.  
If  $A$ ,  $B$ ,  $C$ ,  $D$  denote four forces acting at a point in equilibrium, the angles between  $A$  and  $B$ ,  $B$  and  $C$ ,

$C$  and  $D$ ,  $D$  and  $A$  being  $\alpha$ ,  $\beta$ ,  $\gamma$ ,  $\delta$  respectively, prove that

$$\frac{B \sin \beta - D \sin \gamma}{A} = \frac{B \sin \alpha - D \sin \delta}{C}$$

- II. Prove that a number of forces acting upon a rigid body, their lines of action all being in the same plane, will keep it in equilibrium provided the algebraical sum of their moments about one given point in the plane, and of their resolved parts in each of two directions at right angles, be zero.
- III. A uniform rod weighing 4 lbs. has a weight of 4 lbs. hung from one end and a weight of 10 lbs. from the other. The rod with its weights is suspended by a cord passing over a smooth horizontal peg, the ends of the cord being attached to the ends of the rod. If the length of the cord is equal to  $\sqrt{3}$  times the length of the rod, show that when in equilibrium the rod makes an angle of  $30^\circ$  with the horizontal.
- IV. Find the position of the centre of mass of a triangular pyramid.
- V. State the laws governing limiting or dynamical friction, and explain what is meant by the "angle of friction."  
 A body rests on a rough plane inclined to the horizontal at an angle greater than  $\lambda$  (the angle of friction), and is just kept from slipping down by a force  $P$  acting at an angle  $\theta$  with the plane. Show that  $P$  will have its least value when  $\theta$  is measured below the plane and  $= \lambda$ .  
 Also show that for any other greater value of  $P$  there are two directions in which it may act to produce equilibrium which make equal angles on each side of this position.
- VI. A uniform rod  $AB$  is hinged at its lower end  $A$  and is held up inclined to the vertical by an elastic cord  $BC$  joining  $B$  with a fixed point  $C$  vertically above  $A$ . If  $AC = AB$ , the unstretched length of the cord is equal to  $\frac{1}{2} AB$ , and its modulus of elasticity is equal to half the weight of the rod, prove that the rod will rest at an angle of  $60^\circ$  with the vertical, and find the magnitude and direction of the reaction at the hinge.
- VII.  $A$  and  $B$  are moving in different directions with different velocities. Show how to determine the velocity of  $B$  relative to  $A$ .

- VIII. In an absolute system of units the unit of length is the yard, the unit of time the minute, and the unit of mass that of a hundredweight. Compare the unit of work in this system with the foot-pound, and find the measure of a horse-power.
- IX. Two masses,  $m$  and  $m'$ , are tied to the ends of a string passing freely over a pulley. Determine the acceleration and the tension of the string.  
 If the masses are 4 and 6 lbs. respectively, and start on a level, find the difference between their heights at the end of 2 secs. if the pulley itself moves downwards with an acceleration of 10 ft. sec. units.

### LOGIC (Pass).

PROFESSOR MITCHELL, M.A., D.Sc.

Time—Two hours.

- I. What is a logical proposition? Analyse the mental act implied in forming it. Give the classification of propositions adopted in Formal Logic, and remark upon its value and thoroughness.
- II. Draw inferences by Opposition, Permutation, and Conversion from
  - (a.) The errors of well-doers are an excuse to those who do ill.
  - (β.) They only live who love and honour have.
- III. Explain the method by which the list of legitimate syllogisms is discovered.
- IV. Show that the second figure can prove negative conclusions only, the third particular conclusions only, and that the fourth figure cannot prove a universal affirmative.
- V. Examine the following arguments:—
  - (a.) A whale is not a fish, for it is neither cold-blooded nor breathes by gills.
  - (β.) By one kind of immediate inference two negatives are found to be equal to an affirmative,

and so I can argue that, because money is wealth, what is not money is not wealth.

(γ.) Since colonies have sprung from a mother-country, I can prove by analogy that they should at first be supported by the parent, and later that they should remain attached to her, and, if necessary, give her support.

- VI. State the fallacies incident to induction, and give an example of each.
- VII. Distinguish sensation, perception, conception, and imagination.
- VIII. What is meant by a law of the mind? Illustrate by reference to laws of memory.

---

## LOGIC AND PSYCHOLOGY (Credit).

Time—Two hours.

PROFESSOR MITCHELL, M.A., D.Sc.

- I. Distinguish the logical and psychological treatment of mental problems.
- II. Explain the growth of a general concept in individual minds.
- III. Discuss the laws of association.
- IV. Explain the influence of contrast in the elements of knowledge.
- V. Write an account of the constructive imagination.
- VI. Connect the various faculties of knowledge as expressions of a single purpose to bring the manifold of experience within our control.

- i. All our friends took their share and fought like men in the great field. All day long, whilst the women were praying ten miles away, the lines of the dauntless Eng-

lish infantry were receiving and repelling the furious charges of the French horse-men. Guns which were heard at Brussels were ploughing up their ranks, and comrades falling, and the resolute survivors closing in. Towards evening, the attack of the French, repeated and resisted so bravely, slackened in its fury. They had other foes besides the British to engage, or were preparing for a final onset. It came at last: the columns of the Imperial Guard marched up the hill of Saint Jean, at length and at once to sweep the English from the height which they had maintained all day, and spite of all: uncared by the thunder of the artillery, which hurled death from the English line—the dark rolling column pressed on and up the hill. It seemed almost to crest the eminence, when it began to wave and falter. Then it stopped, still facing the shot. Then at last the English troops rushed from the post from which no enemy had been able to dislodge them, and the Guard turned and fled.

THACKERAY: *Vanity Fair*.

ii. For the soldier's trade, verily and essentially, is not slaying, but being slain. This, without well knowing its own meaning, the world honours it for. A bravo's trade is slaying; but the world has never respected bravos more than merchants: the reason it honours the soldier is, because he holds his life at the service of the State. Reckless he may be—fond of pleasure or of adventure—all kinds of bye motives and mean impulses may have determined the choice of his profession, and may affect (to all appearance exclusively) his daily conduct in it; but our estimate of him is based on this ultimate fact—of which we are well assured—that put him in a fortress breach, with all the pleasures of the world behind him, and only death and his duty in front of him, he will keep his face to the front; and he knows that his choice may be put to him at any moment—and has beforehand taken his part—virtually takes such part continually—does, in reality, die daily.

 uultu intentus quaesita interdum comitate quamuis

a. Principio quoniam duplex natura duarum  
dissimilis rerum longe constare reperit,  
corporis atque loci, res in quo quaeque geruntur,  
esse utramque sibi per se puramque necessest.  
nam quaecumque uacat spatium, quod inane uocamus,  
corpus ea non est ; qua porro cumque tenet se  
corpus, ea uacuum nequaquam constat inane.  
sunt igitur solida ac sine inani corpora prima.  
praeterea quoniam genitis in rebus inanest,  
materiem circum solidam constare necessest,  
nec res ulla potest uera ratione probari  
corpore inane suo celare atque intus habere,  
si non, quod cohibet, solidum constare relinquit.  
id porro nil esse potest nisi materiai  
concilium, quod inane queat rerum cohibere.  
materies igitur, solido quae corpore constat,  
esse aeterna potest, cum cetera dissoluantur.  
tum porro si nil esset quod inane uocaret,  
omne foret solidum ; nisi contra corpora certa  
essent quae loca completerent quaecumque tenerent,  
omne quod est, spatium uacuum constaret inane.

b. Praeterea spatium summae totius omne  
undique si inclusum certis consisteret oris  
finitumque foret, iam copia materiai  
undique ponderibus solidis confluet ad imum  
nec res ulla geri sub caeli tegmine posset  
nec foret omnino caelum neque lumina solis,  
quippe ubi materies omnis cumulata iaceret  
ex infinito iam tempore subsidendo.

at hunc nimirum requies data principiorum corporibus nullast, quia nil est funditus imum quo quasi confluere et sedes ubi ponere possint. semper in adsiduo motu res quaeque geruntur partibus e cunctis infernaeque suppeditantur ex infinito cita corpora materiai. est igitur natura loci spatiumque profundi, quod neque clara suo percurrere fulmina cursu perpetuo possint aevi labentia tractu nec prorsum facere ut restet minus ire meando : usque adeo passim patet ingens copia rebus finibus exemptis in cunctas undique partis.

## GREEK PROSE COMPOSITION.

Time—Three hours.

Translate into Greek prose :—

The Athenians were utterly broken in spirit. They repented that they had ever come to Sicily ; their hopes had failed them ; their special craft had failed them ; they were beaten, as they had never looked to be beaten, on their own element, on the sea which they held to be part of the Athenian dominion. In other wars they had been able to appeal to the political feelings of some party in the city against which they had been warring. But Alkibiades had indeed led them astray when he told them that Sicily would be an easy conquest, because no man in Sicily cared for the city which might be his own dwelling-place, but which had seldom been the dwelling-place of his fathers. In Syracuse Athens had met her match. It was not merely that Syracuse was a great and mighty city, rich in ships and horses. She was something greater ; democracy was pitted against democracy ; men felt in Syracuse, no less than in Athens, the full strength of that binding and ennobling spirit which makes every man in a free city strive for the welfare of his city as for his own.

FRREMAN : *History of Sicily.*

*Epicurus.* Tell me, then, whether the horse of a rider on the road should not be spurred forward if he started at a shadow.

*Leontion.* Yes.

*Epicurus.* I thought so : it would however be better to guide him quietly up to it, and to show him that it was one. Death is less than a shadow : it represents nothing, even imperfectly.

*Leontion.* Then at the best what is it ? Why care about it, think about it, or remind us that it must befall us ? Would you take the same trouble, when you see my hair entwined with ivy, to make me remember that, although the leaves are green and pliable, the stem is fragile and rough, and that before I go to bed I shall have many knots and entanglements to extricate ? Let me have them ; but let me not hear of them until the time is come.

*Epicurus.* I would never think of death as an embarrassment, but as a blessing.

*Ternissa.* How? A blessing?

*Epicurus.* What, if it makes our enemies cease to hate us? What, if it makes our friends love us the more?

*Leontion.* Us? According to your doctrine we shall not exist at all.

*Epicurus.* I spoke of that which is consolatory while we are here, and of that which in plain reason ought to render us contented to stay no longer. You, Leontion, would make others better; and better they certainly will be, when their hostilities languish in an empty field, and their rancour is tired with treading upon dust.

- II. Briefly explain the contents or reference of the following passages; only giving a translation when necessary to elucidate the meaning:—
  - (α). ὁμοῦ πάντα χρήματα.
  - (β). ἀρ' οὖν οὐ κατὰ πάντα ταῦτα συμβαίνει τὴν ἀνάμνησιν εἶναι μὲν ἀφ' ὁμοίων, εἶναι δὲ καὶ ἀπὸ ἀνομοίων;
  - (γ). Πηνελόπης τινὰ ἐναντίως ἰστὸν μεταχειρισμένην.  
How is the comparison of the old weaver introduced?
  - (δ). τὴν δὲ τοῖς διὰ τῶν εἰκόνων τὰς ἀποδείξεις ποιουμένους λόγους ξύνουδα οὖσιν ἀλαζόσιν.  
How does Socrates dispose of the theory that soul is a harmony?
  - (ε). ἀπὸ δὴ θαυμαστῆς ἐλπίδος, ὃ ἑταῖρε, ὠχόμην φερόμενος, ἐπειδὴ προῖὼν καὶ ἀναγιγνώσκων, ὄρω ἄνδρα τῷ μὲν νῷ οὐδὲν χρώμενον [οὐδέ τινας αἰτίας ἐπαιτιώμενον] εἰς τὸ διακοσμεῖν τὰ πράγματα.

Why should the words enclosed in square brackets be ejected? What does Socrates mean by his δεύτερος πλοῦς?

- (ζ). τῷ καλῷ τὰ καλὰ καλά.  
 (η). ἄλλην δὲ ὑπόθεσιν ὑποθέμενος, ἥτις τῶν ἄνωθεν βελτίστη φαίνοιτο.  
 (θ). οὐκ ἄρα μόνον τὰ εἶδη τὰ ἐναντία οὐχ ὑπομένει ἐπιόντα ἄλληλα, ἀλλὰ καὶ ἄλλ' ἅττα τὰ ἐναντία οὐχ ὑπομένει ἐπιόντα.

## ANALYTICAL GEOMETRY (Pass).

J. H. McFARLAND, M.A.

Time—Three hours.

*N.B.*—Not more than five questions are to be attempted in each division of the paper.

- I. Find the tangent of the angle between the two straight lines  $y = mx + c$  and  $y = m'x + c'$ . Find the equations of the straight lines through the origin which make angles of  $30^\circ$  with  $x + y = 2$ .
- II. Find the condition that the straight line  $x \cos a + y \sin a = p$  shall touch the circle  $(x - f)^2 + (y - g)^2 = r^2$ .  
Find the equation to the circle inscribed in the triangle formed by the straight lines  $x = 0$ ,  $y = 0$ , and  $x + y = 4$ .
- III. Find the equation of the tangent at  $x' y'$  to the parabola  $y^2 = 4ax$ . Show that it is of the form  $y = mx + \frac{a}{m}$ .  
Hence find the locus of the intersection of two tangents to a parabola which cut one another at an angle of  $45^\circ$ .
- IV. Define the eccentric angle at any point of an ellipse and show that  $\frac{ax}{\cos \phi} - \frac{by}{\sin \phi} = a^2 - b^2$  is the equation to the

normal at the point whose eccentric angle is  $\phi$ . If the normal at any point  $P$  of an ellipse cut the major axis in  $G$ , show that the locus of the middle point of  $PG$  is a concentric ellipse.

V. Deduce the equation to a hyperbola in the form  $\frac{x^2}{a^2} - \frac{y^2}{b^2} = 1$ .

Show the equations to its asymptotes are  $y = \pm \frac{b}{a} x$ .

Find the equations to the asymptotes of  
 $2x^2 - xy + 4x = 2y + 6$ .

VI. Find the polar equation (i.) to a circle when the pole is on the circumference and the initial line passes through the centre; (ii.) the polar equation of an ellipse when the focus is taken as pole and the major axis as the initial line.

VII. Find the equation to the tangent and normal at the point  $\theta$  on the curve

$$x = a(\theta + \sin \theta), \quad y = a(1 - \cos \theta).$$

VIII. In the curve  $r = f(\theta)$ . Find the inclination of the radius vector to the tangent.

Show that in the curve  $r = ae^{\theta \cot \alpha}$  the tangent makes a constant angle with the radius vector. Show also that the curve which is the locus of the foot of the perpendicular from the pole on any tangent possesses the same property.

IX. Show that the radius of curvature at any point of a curve is given by

$$\rho = \frac{ds}{d\phi} = \frac{\left\{ 1 + \left( \frac{dy}{dx} \right)^2 \right\}^{3/2}}{\frac{d^2y}{dx^2}}$$

Prove that in the catenary  $y^2 = c^2 + s^2$   
 $c\rho = y^2$

X. Show how to find the envelope of a family of curves obtained by giving different values to the constant  $c$  in the equation  $\phi(x, y, c) = 0$ .

Find the envelope of the straight lines

$$\frac{ax}{\cos \phi} - \frac{by}{\sin \phi} = a^2 - b^2$$

obtained by giving different values to  $\theta$ .

XI. Define (i.) a cusp; (ii.) a point of inflexion on a curve.

Show that the point where

$$\left(\frac{x}{a}\right)^{2/3} + \left(\frac{y}{b}\right)^{2/3} = 1 \text{ cuts the axes are cusps.}$$

Also that the points when the circle  $r=10$  cuts the curve  $r=11-2\cos 5\theta$  are points of inflexion on the latter.

XII. Trace the curves—

(i.)  $(x-a)y^2 = x^3 + a^3$

(ii.)  $r = a(1 + \cos \theta)$

(iii.)  $r = a \frac{\theta^2}{\theta^2 + 1}$

## MATHEMATICS (Pass).

### DIFFERENTIAL AND INTEGRAL CALCULUS.

R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

I. Find from first principles the differential coefficient of  $x^n$  when  $n$  is a positive integer.

Find the differential coefficients of

$$\frac{1+x^2}{\sqrt{1-x^2}}, \tan^{-1}(a^{2x}x^2), \text{ and } (\sin x)\tan^2x.$$

II. State and prove Leibnitz's Theorem for determining the  $n^{\text{th}}$  differential coefficient of the product of two functions.

Write down the  $n^{\text{th}}$  differential coefficient of  $x^3 \sin x$ .

III. If  $y = e^x \cos x$ , show that

$$\frac{d^{n+2}y}{dx^{n+2}} - 2 \frac{d^{n+1}y}{dx^{n+1}} + 2 \frac{d^n y}{dx^n} = 0$$

and expand  $y$  in a series of ascending powers of  $x$ .

IV. Show how to evaluate the indeterminate forms  $\frac{0}{0}$  and  $\infty - \infty$ .

Find the limiting value when  $x = 0$  of  $(\cot x)^{\sin x}$ .

V.  $ABC$  is an isosceles triangle such that  $AB = AC$ .  $PQ$  is drawn parallel to  $BC$ , cutting  $AB$  and  $AC$  in  $P$  and  $Q$  respectively.  $R$  is the middle point of  $BC$ . Find the position of  $PQ$  such that the area of  $PQR$  is a maximum.

VI. Evaluate the integrals

$$\int \sqrt{a^2 - x^2} . dx , \int \sec^6 x . dx , \text{ and } \int \frac{\tan^{-1} x}{x^2} . dx .$$

VII. Show that  $\int_0^{2a} \phi(x) dx = 2 \int_0^a \phi(x) dx$  or  $0$ , if  $\phi(2a-x) = +\phi(x)$  or  $-\phi(x)$ .

$$\text{Find the value of } \int_0^{\frac{\pi}{2}} \log \sin x dx .$$

VIII. Find the length of the curve  $y = \log \cos x$  measured from the origin to any point  $x, y$  on the curve.

IX. Find the volume generated by revolving about one of the equi-conjugate diameters one of the halves into which the diameter divides an ellipse where semi-axes are  $a, b$ .

Time—Three hours.

I. Investigate the equations to a straight line through the point  $(a, \beta, \gamma)$ .

Find the length of the straight line drawn through  $(a, \beta, \gamma)$  parallel to  $\frac{x}{\lambda} = \frac{y}{\mu} = \frac{z}{\nu}$  to meet the plane  $lx + my + nz = p$ .

II. Find the equation to the right circular cone referred to rectangular axes, which contains three given straight lines passing through the origin.

III. Find the equations to the tangent plane and the normal at any point of the surface

$$ax^2 + by^2 + cz^2 = 1.$$

Prove that the tangent planes of the cone

$$\frac{x^2}{b+c} + \frac{y^2}{c+a} + \frac{z^2}{a+b} = 0$$

cut the surface  $ax^2 + by^2 + cz^2 = 1$  in rectangular hyperbolas.

IV. Find the area of the section of  $ax^2 + by^2 + cz^2 = 1$ , by the plane  $lx + my + nz = p$ .

Show that the area of the section of  $ax^2 + by^2 + cz^2 + 2fyz + 2gzx + 2hxy = 1$ , by the plane which passes through the extremities of its principal axes is

$$\frac{2\pi}{3\sqrt{3}} \left( \frac{a + b + c}{abc + 2fgh - af^2 - bg^2 - ch^2} \right)^{\frac{1}{2}}$$

V. What is meant by saying that one surface is the polar reciprocal of another?

Find the reciprocal of  $\frac{x^2}{a^2} + \frac{y^2}{b^2} + \frac{z^2}{c^2} = 1$ , with respect to the point  $x' y' z'$ .

If  $BC$ ,  $CA$ ,  $AB$  are three chords of a conicoid, each of which subtends a right angle at a fixed point  $S$ , prove that the plane  $ABC$  always touches a spheroid.

VI. Show how to find the conditions that a proposed straight line may be a generator of a given surface. Can a generator be drawn on

$$x^2 y^2 (2a - z) = x^2 z^3$$

through the point  $(a, a, a)$ ?

Prove that any plane through a generator of a surface of the second degree is a tangent plane.

VII. Explain the two methods of generating a developable surface, and find the differential equation of such surfaces from each method of generation.

VIII. Find (i.) the equation to the osculating plane, and (ii.) the equations to the principal normal at any point of a curve. Find them at the point  $(o, o, r)$  for the curve  $x^2 + y^2 = ry$ ,  $z^2 + ry = r^2$ .

IX. Define an umbelic, and investigate equations for determining the umbelics of a given surface. Find, by any method, the umbelics of the surfaces

$$(i.) \frac{x^2}{a^2} + \frac{y^2}{b^2} + \frac{z^2}{c^2} = 1,$$

$$(ii.) \frac{x^2}{a^2} - \frac{y^2}{b^2} - \frac{z^2}{c^2} = 1,$$

$$(iii.) x^2 + y^2 - z^2 = c^2.$$

X. Find the equation to the surface generated by a variable circle whose plane is always parallel to  $x + y = o$ , and which always passes through the axes of  $x$  and  $y$  and the line  $x = y, z = c$ .

## MATHEMATICS.

### Statics. (Honours).

J. H. McFARLAND, M.A.

Time—Three hours.

- I. If any number of forces act on a particle in any directions ; show how to find the magnitude and direction of the resultant.

A particle is placed on the outside of a cube and is acted on by eight forces represented by straight lines drawn from the particle to the angles of the cube. Find the magnitude and direction of the resultant.

- II. Find the resultant of any number of couples acting on a body, the planes of the couples being parallel to each other.

If every element of a uniform wire in the form of a plane closed curve be acted on tangentially in the same direction of rotation by a force varying inversely as the square of the distance of the element from a given point in the area enclosed by the wire; prove that if the given point be taken as origin of moments, the resultant couple is independent of the length and form of the wire.

- III. Show that any system of forces can always be reduced to a force and a couple, the axis of the latter being parallel to the direction of the former.

Show that when a system of forces is reduced in any way to two forces  $P$  and  $Q$  the moment of  $P$  about  $Q$  varies inversely as  $Q$ .

- IV. Find the centre of gravity of a uniform solid bounded by the planes  $z = 0$ ,  $z = mx + n$ , and the cylinder

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1.$$

- V. Define the *coefficient of friction* between two substances.

A circular disc of radius  $a$  and weight  $W$  lies inside a smooth sphere of radius  $r$  and a particle of weight  $w$  is placed on the disc. If the coefficient of friction between the disc and the particle be  $\mu$ , prove that the greatest distance from the centre of the disc at which the particle

$$\text{can rest is } = \mu \sqrt{r^2 - a^2} \cdot \frac{W + w}{w}$$

- VI. A weightless elastic string is stretched over a rough plane curve; show how to find the tension at any point.

A weight  $P$  just supports another weight  $Q$  by means of a fine elastic string (whose weight may be neglected) passing over a rough cylinder whose axis is horizontal. If  $\lambda$  be the modulus of elasticity,  $\mu$  the coefficient of friction, and  $a$  the radius of the cylinder show that the extension of that part of the string which is in contact with the cylinder is  $\frac{a}{\mu} \log \frac{Q + \lambda}{P + \lambda}$

- VII. A rhombus  $ABCD$  formed of four uniform freely jointed rods each of length  $a$  and weight  $w$  is suspended in a vertical plane by two equal strings  $OA$  and  $OC$ , of length  $l$ , from a fixed point  $O$ . Determine the tension of a tie string connecting  $B$  and  $D$  when the angle  $BAD = 2a$ .
- VIII. Find the relation between the power and the weight in a system of pulleys where the string which passes round any pulley is attached at one end to the weight and at the other the next pulley, the strings being parallel.

In such a system prove that if the tensions of the string increase in geometrical progression so do the weights of the pulleys.

- IX. Prove that for a material system, with fixed supports and in equilibrium under the action of gravity the condition for stability is that the height of its centre of gravity should be a minimum.

A smooth prolate spheroidal shell is placed with its axis vertical and a uniform heavy stick whose length is greater than the latus rectum of the generating ellipse of the spheroid is placed inside. Determine the position of stable equilibrium and also of unstable.

A heavy body the section of which is a cycloid, rests on a rough horizontal plane and has its centre of gravity at the centre of curvature of the curve at the point of contact. Find whether the equilibrium is stable or unstable.

- X. If  $V$  be the potential of an attracting mass  $M$ , and if  $M_0$  be the portion of  $M$  contained within a closed surface  $S$ , then

$$\int \frac{dV}{dn} \cdot dS = -4\pi M_0$$

where  $dS$  is an element of  $S$  and  $dn$  an element of the normal drawn outwards at  $dS$ , the integral being taken over the whole surface  $S$ .

Show that a sphere consisting of concentric shells of uniform density attracts an external particle  $P$  with a force varying inversely as the square of the distance of  $P$  from its centre.

## MATHEMATICS (Honours).

### DYNAMICS OF A PARTICLE AND HYDROMECHANICS.

PROFESSOR BRAGG, M.A.

Time—Three hours.

- I. If a particle move on a parabola so that the velocity parallel to the axis is constant, find the acceleration along the tangent and normal.
- II. A particle moves under an attraction in its line of motion varying directly as the distance of the particle from a fixed point in that line. Determine the motion.

A particle of mass  $m$  is attached to the middle point of a string of length  $2l$ , to whose ends similar particles are also attached. The string is laid over two smooth pegs in the same horizontal line. Find the position of equilibrium and the time of a small oscillation about it.

- III. Prove that when a particle describes an orbit about a centre of force of strength  $P$ , then

$$v^2 = P \cdot p \cdot \frac{dr}{dp}$$

If a particle describe a curve in such a way that the velocity at any point is equal to the velocity in a circle at that distance, then  $p \propto r^n$ ; and find the value of  $P$  in terms of  $r$ .

- IV. A particle under no forces is projected in a resisting medium of uniform density of which the resistance varies as the velocity: determine the motion.

A particle slides down a curve in a vertical plane in a resisting medium where the resistance is proportional to the velocity. The velocity is proportional to the distance along the curve from a fixed point. Find the general equation of the class of curves for which this is possible.

- V. A smooth straight tube revolves with constant angular velocity in a vertical plane about a horizontal axis. Determine the motion of a smooth particle placed inside the tube.

If when the tube is vertical the particle be at a distance  $a$  above the axis and have no vertical motion, and if the angular velocity of the tube be  $w$  where  $2w^2a = g$ , show that the particle describes a certain circle.

VI. Find expressions to give the position of the centre of pressure of any area immersed in a fluid, with reference to the principal axes of the area at its centre of gravity.

A circular area immersed in a fluid revolves about a point in its circumference. Find the locus of the centre of pressure referred to axes in the area.

VII. A cylinder closed at both ends and of average density  $\frac{1}{2}$  is floating in water. A larger cylinder with one end open and of given weight and size is made to float mouth downwards so as to cover the lower cylinder. Find the position of equilibrium.

VIII. Show that on the Kinetic theory of gases  $p = \frac{1}{3} \rho \bar{v}^2$ , using the customary notation.

IX. Show that in the case of long waves in shallow water  $v = \sqrt{gh}$ , where  $h$  is the depth.

## MATHEMATICS (Honours).

### PROBLEM PAPER.

R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

- I.  $ABCD$  is a rectangle, and points are marked off along  $AB$  and  $AD$  dividing each line into  $n$  equal parts. The first of these points from  $A$  along  $AB$  is joined with the first from  $D$  along  $DA$ , the second from  $A$  along  $AB$ , with the second from  $D$  along  $DA$ , and so on. Show that the envelope of these lines is a parabola, and find the position of its axis.
- II. Through any point  $P$  is drawn a straight line cutting any surface represented by a rational algebraical equation of the  $n^{\text{th}}$  degree in the points  $A_1, A_2, \dots, A_n$ , and through any other point  $Q$  a parallel straight line is drawn cutting the surface in  $B_1, B_2, \dots, B_n$ . Show that the ratio

$$\frac{PA_1 \cdot PA_2 \cdot PA_3 \dots PA_n}{QB_1 \cdot QB_2 \cdot QB_3 \dots QB_n}$$

is constant, being independent of the direction of the parallel lines, and dependent only on the position of the points and the nature of the surface.

- III. A ladder stands on the ground with its foot against a vertical wall, and is held so as to make an angle  $\alpha$  with the vertical by a chain of length  $l$  attached to the wall and to any point on the ladder. Determine the proper position for the chain of this given length in order that the tension on it may be a minimum, and if the ladder is of length  $2a$  and weight  $W$ , show that the tension is

$$\text{then} = \frac{4 W a \sin^2 \frac{\alpha}{2}}{l}.$$

- IV. Two parabolas have their vertices at the same point and their axes at right angles. From any point  $P$  perpendiculars are drawn to the axes, cutting one parabola in  $Q, Q'$  and the other in  $R, R'$ . If  $PQ \cdot PQ' = PR \cdot PR'$  show that the locus of  $P$  is a rectangular hyperbola such that the square on its semi-axis = the sum of the squares on the semi-lata recta of the parabolas.

- V. One end of a heavy uniform chain hangs over the edge of a smooth plane inclined at  $30^\circ$  with the horizontal. The rest of the chain lies straight down the inclined plane, which is of length  $a$ , with its other end coiled up on a horizontal plane at the foot of the inclined plane. If a length  $x$  hang over the top edge to start with, investigate the motion, and show that when a length  $x$  lies over the edge the velocity is given by

$$(x + a)^2 \cdot v^2 = \frac{g}{6} \cdot (x - a) (4x^2 + 7ax + a^2)$$

Also determine the tension of the chain at any moment at the foot of the inclined plane.

- VI. A lamina in the form of a quadrilateral with two parallel sides is immersed vertically in a liquid with its parallel sides horizontal. If the lengths of these parallel sides be  $a$  and  $b$  ( $a > b$ ), and  $a$  is on top, show that the depth of  $a$  below the surface must be  $\frac{b}{a-b} \cdot h$  in order that the centre of pressure may be half-way between  $a$  and  $b$  where  $h$  is the height of the lamina.
- VII. If a conical glass, whose altitude is  $a$  and the generating angle  $\theta$ , be filled with water, find the radius of the sphere which, being put into it, shall cause the greatest quantity of water to overflow.

VIII. A plane section of the ellipsoid  $x^2/a^2 + y^2/b^2 + z^2/c^2 = 1$  has an area  $A$ , and the co-ordinates of its middle point are  $\alpha, \beta, \gamma$ . If the section also touches the confocal

ellipsoid  $\frac{x^2}{a^2 - \lambda} + \frac{y^2}{b^2 - \lambda} + \frac{z^2}{c^2 - \lambda} = 1$ , prove that

$$\frac{\lambda A^2}{\pi^2 a^2 b^2 c^2} = \left(1 - \frac{\alpha^2}{a^2} - \frac{\beta^2}{b^2} - \frac{\gamma^2}{c^2}\right)^3$$

IX. A particle moves along a plane curve under the action of a force from a fixed point in the plane of the curve, the force being proportional to distance of the particle from the fixed point. If the time of describing any arc measured from a given point is equal to that of describing the chord of the arc, show that the curve must be of the form  $r^2 = a^2 \sin 2\theta$ .

X. A point  $M$  is attracted towards three points  $A, B, C$  by forces respectively equal to  $mr, m_1 r_1, m_2 r_2$ , where  $m, m_1, m_2$  are constants and  $r, r_1, r_2$  the distances of the point  $M$  from  $A, B$  and  $C$ . If the angle  $BAC$  is a right angle, find the position of equilibrium for  $M$  (1st) when  $M$  is free to move in space, (2nd) when  $M$  can only move in a given plane.

## MENTAL AND MORAL PHILOSOPHY (I.) (Honours.)

PROFESSOR MITCHELL AND REV. D. PATON, M.A., D.D.

Time—Three hours

- I. What are the limits of empirical psychology?  
psychology possible? Include an examination of Kant's objections.
- II. What is the psychological definition of Feeling? How would you classify feelings?
- III. Explain the sensational elements in our knowledge of space.  
What other elements are involved?
- IV. State clearly your notion of
  - (1) The unity of the mind;
  - (2) The activity of the mind; and
  - (3) The faculties of the mind.
- V. Compare the method of Kant in his Critiques with that of Locke, Berkeley, and Hume.
- VI. Examine Hume's "Sceptical Solution of Sceptical Doubts."
- VII. State Kant's antinomies of Cosmology, and examine his solution of them.

**MENTAL AND MORAL PHILOSOPHY (II.)**  
**(Honours).**

PROFESSOR MITCHELL AND REV. D. PATON, M.A., D. D.

Time—Three hours.

- I. Explain the logic of Ethics, comparing it with the logic of other sciences as regards the nature of their data and criteria.
- II. Examine the statement that a doctrine of Ethics may be constructed independently of a theory of the nature of the individual will.
- III. Desire, wish, motion, intention. Would you give different definitions to these words? How would you relate their definitions to your definition of will?
- IV. How do you distinguish between pleasure and happiness? Show that the place which these concepts have in ethical theories is determined by their doctrine of will.
- V. How does Kant deduce the several forms of the categorical imperative? Examine his doctrine as affording (1) a standard of right, (2) a motive for individual action.
- VI. Compare Kant's notion of a *summum bonum* with Spencer's notion of the end of moral evolution. Include a comparison of the grounds on which each justifies his idea.
- VII. Examine Spencer's conciliation of Egoism and Altruism.

---

**MENTAL AND MORAL PHILOSOPHY (III.)**  
**(Honours).**

PROFESSOR MITCHELL AND REV. D. PATON, M.A., D. D.

Time—Three hours.

Write essays on *three* of these subjects :—

1. Attention.
2. Association of Ideas.
3. Final Cause.
4. Idea of a Social Organism.
5. Kant's treatment of the causal relation as an answer to Hume.

# OF THE DEGREE OF MASTER OF ARTS.

## REGULATIONS.

- I. The examination for the Degree of Master of Arts shall take place once in each year in the month of December.
- II. No candidate shall be admitted to the Degree of Master of Arts until after the expiration of two academical years from the time at which he obtained the Degree of Bachelor of Arts in this or in some other University recognized by this University.
- III. Every candidate shall be required to show a competent acquaintance with one at least of the following branches of knowledge :
  1. *Classics and Comparative Philology.*
  2. *Metaphysics, Logic, and Political Economy.*
  3. *Mathematics.*
- IV. Schedules fixing the special authors and works to be studied in Latin and Greek, and defining as far as may be necessary the range of questions to be set in the other subjects, shall be drawn up by the Faculty of Arts, subject to the approval of the Council, and shall be published not later than the month of January in the year preceding that in which the examination is held.
- V. A notice in the subjoined form shall be sent by each candidate to the Registrar not less than three months before the date of examination.

*Form of Notice to be sent to the Registrar by Graduates of their Intention to present themselves for Examination.*

I, \_\_\_\_\_ a Bachelor of Arts of the University of \_\_\_\_\_, hereby give notice that I intend to present myself at the Examination for the Degree of Master of Arts in the third term of 18\_\_\_\_, for examination in the following branch, and send herewith the prescribed fee of £5 5s.

\*VI. Fee for the M.A. degree, £5 5s.

Dated this \_\_\_\_\_ day (Signed)..... 18 \_\_\_\_  
The Registrar,  
University of Adelaide.

\* Allowed, 11th July, 1893.

The Regulations concerning the Degree of Master of Arts allowed on the 4th January, 1882, are hereby repealed.

Allowed, 18th December, 1886.

Regulation V., allowed the 18th December, 1886, has been repealed and the above Regulation V., allowed 18th December, 1889, substituted.

DETAILS OF SUBJECTS FOR THE ORDINARY EXAMINATIONS  
FOR THE DEGREE OF M.A., IN DECEMBER 1896 AND 1897.

SCHEDULES DRAWN UP UNDER NO. IV. OF THE FOREGOING  
REGULATIONS.

BRANCH I.

CLASSICS AND COMPARATIVE PHILOLOGY.

(Old Schedule for 1897.)

The Examiners will, for the most part, but not entirely, limit their selection of passages to the following books, and in each year four will be prescribed for special study.

GREEK.

*Homer*—Odyssey, Books I. to VI.  
*Aeschylus*—Agamemnon. Choephoroe. Eumenides.  
*Sophocles*—Ajax. Antigone. Electra.  
*Euripides*—Medea. Hecuba. Bacchae.  
*Aristophanes*—Wasps. Knights. Frogs.  
*Herodotus*—Books III. and IV.  
*Thucydides*—Books VI. and VII.  
*Plato*—Apologia and Phaedo.  
*Demosthenes*—De Corona.

LATIN.

*Virgil*—Georgics. Aeneid.  
*Horace*—Odes and De Arte Poetica. Satires  
*Plautus*—Menaechmi and Captivi.  
*Juvenal*—Satires I., III., IIII., X.  
*Lucretius*—Book I.  
*Cicero*—The Verrine Orations.  
*Livy*—Books XXI., XXII., XXIII.  
*Tacitus*—The Histories, Books I., II.  
*Suetonius*—Lives of Julius Caesar and Augustus.

Composition—Greek and Latin prose.

The papers set at the Examination will also contain questions in general scholarship and in the subject matter of the books prescribed.

Candidates will be expected to have a general acquaintance with the History of Greece and Rome, and Comparative Philology, as applied to the illustration of the Latin and Greek Languages.

The subjects for special study in December, 1897, are

GREEK.

*Homer*—Odyssey, Books I. to VI.  
*Thucydides*—Books VI. and VII.

LATIN.

*Plautus*—Menaechmi and Captivi.  
*Trinitus*—Histories, Books I. and II.

CLASSICS, ANCIENT HISTORY, AND COMPARATIVE PHILOLOGY.

(New Schedule for 1898.)

The Examination will be in the following subjects :—

- (a). Translation into English from Greek and Latin writers.
- (b). Greek and Latin Prose Composition.
- (c). Grammar, Criticism, and Comparative Philology as applied to the Greek and Latin Languages.

(d). Subjects for special study for 1898—

*Homer—Odyssey.*

*Plato—Republic.*

*Lucretius—De Rerum Natura.*

*Cicero—Letters to Atticus.*

Questions on Philosophy and History will be set with special reference to the selected books as well as an essay on some theme connected with the subjects of Examination.

Candidates who propose to read Classics with a view to entering for the M.A. Examination are advised to take the earliest opportunity of consulting the Professor of Classics about their course of reading.

#### BRANCH II.

##### MATHEMATICS.

Candidates may present themselves for examination either in Pure Mathematics or in Applied Mathematics; but will in either case be expected to show a competent knowledge of the following preliminary portions of Mathematics, that is to say, of:

Algebra, the simpler properties of Equations and Determinants.

Plane Trigonometry.

Elementary Analytical Geometry of Two and Three Dimensions.

The Elements of the Differential and Integral Calculus, with their simpler applications to Geometry.

The solution of such ordinary Differential Equations as occur in Dynamics.

The Statics of Solids and Fluids.

The Kinetics of a particle.

Candidates who present themselves in Pure Mathematics will further be examined in

The Theory of Equations, the higher parts of Analytical Geometry of Two and Three Dimensions, and of the Differential Calculus, and in Differential Equations.

Candidates who present themselves in Applied Mathematics will be examined in

The Dynamics of Rigid Bodies, and of Material Systems in general.

Hydrodynamics.

The Theories of Sound and Light.

Theory of Attractions

#### BRANCH III.

##### PHILOSOPHY AND ECONOMICS.

Candidates are required to select three of the following subjects and to intimate them to the Registrar when entering their names:—

1. Psychology.

2. Logic and History of Logic.

3. Ethics and History of Ethics.

4. Metaphysics and History of Philosophy.

5. Principles of Education.

6. Principles of Economics.

In subjects 1, 2, 3, 4, a more thorough and extended knowledge will be expected of the work prescribed for Pass and Honours, in the B.A. Course.

In 5, the syllabus is that given under Higher Public Examination, but a knowledge of Ethics, and a more thorough knowledge of Psychology, will be expected.

In 6, the Examination will comprise the subjects treated in Mill, but candidates should interview the Professor with reference to a concurrent course of reading.

## OF THE DEGREE OF BACHELOR OF SCIENCE. REGULATIONS.

- I. Students who, in the Senior Public Examinations, pass in either Latin, Greek, French, or German, and in Pure Mathematics and Physics, may be enrolled as Matriculated Students in Science.
- II. Students who have not complied with the above conditions may, nevertheless, be enrolled as Matriculated Students on satisfying the Professors in the Faculty of Science that they have sufficient knowledge to enable them to enter upon the First Year's Course.
- III. To obtain the Degree of Bachelor of Science every candidate must, after matriculation, complete three academical years of study, and pass the Examination proper to each year as herein-after specified, and, in addition, must at some time before completing the course satisfy the Examiners in two of the following languages:—Latin, Greek, French, and German; but candidates who have passed in one or more of the above languages at the Senior Public Examination shall not be required to present themselves for further examination in such language or languages.

First Year.

- IV. At the First Examination every candidate shall be required to satisfy the Examiners in each of the following subjects:—
  1. *Elementary Pure Mathematics.*
  2. *Elementary Physics.*
  3. *Elementary Biology and Physiclogy.*
  4. *Elementary Inorganic Chemistry.*

\* Students who have passed the First Year's Examination in Arts and who wish to enter for the First Year's Examination in Science, will not be required to be re-examined in such subjects as are common to the two Examinations.

The examination in any subject of the B.Sc. course may be partly practical.

Regulation V. of the Degree of Bachelor of Science allowed by the Governor on the 16th December, 1886, is hereby repealed, and the following Regulation is substituted therefor:—

Second Year.

- † V. At the Second Examination every candidate shall be required to

\* Allowed 18th December, 1889.

† Allowed 11th December, 1895.

satisfy the examiners in each subject of one of the following groups, namely :—

|          |   |                                                                                                    |  |          |   |                                                                                       |

Regulation VI. of the Degree of Bachelor of Science allowed by the Governor on the 9th December, 1891, is hereby repealed, and the following Regulation is substituted therefor :—

\* VI. At the Third Examination every candidate shall be required to satisfy the Examiners in each subject of one of the following groups, provided that the group selected must be marked with the same letter as that in which the candidate has already passed in his Second year :—

|          |   |                                                                              |  |          |   |                                                                              |

†VII. In addition to the Pass work Candidates may be examined for Credit in the First and Second years and for Honours in the Third year.

A candidate who presents himself for the Credit or Honour Examination in any subject and fails to obtain Credit or Honours may be returned as having passed in that subject if the Examiners be of opinion that his answers show sufficient knowledge.

VIII. Schedules defining the range of study shall be drawn up by the Faculty of Science, subject to the approval of the Council, and shall be published in the month of January in each year. The dates of the Examinations shall be fixed by the Council.

\* Allowed 11th December, 1895.

† Allowed 6th December, 1893.

IX. Any Professor may permit a student to substitute for any course of lectures properly belonging to his year an advanced course of lectures in the same subject.

X. Unless the Council shall have granted an exemption, candidates for Examination in any subject on which lectures are given must present a certificate from the Professor or Lecturer giving such lectures, of regular attendance thereat during the year.

\*XI. The names of candidates who pass with honours shall be arranged in three classes in order of merit. The names of other successful candidates shall be arranged in alphabetical order.

† XII. The following Fees shall be paid in advance :—

|                                                                |        |

NOTE.—Students who shall have completed their Second Year on the 31st December, 1895, shall have the option of continuing their course under the Regulations in force in 1895.

Regulation XII. allowed by the Governor on the 13th November, 1890, has been repealed, and the above Regulation substituted therefor.

\* Allowed 3rd August, 1892.

† Allowed 11th December, 1895.

XIII. The following form of notice is prescribed :

*Form of notice to be sent to the Registrar by Undergraduates of their intention to present themselves for Examination.*

I, \_\_\_\_\_ an Undergraduate of this University, hereby give notice that, for the purpose of completing the year of the course for the Degree of Bachelor of Science, I intend to present myself at the Examination in the \_\_\_\_\_ Term of 189 , for examination in the undermentioned subjects, viz :

- |    |    |
|----|----|
| 1. | 4. |
| 2. | 5. |
| 3. |    |

I send herewith the prescribed Certificates of Attendance at Lectures.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ (Signed)....., 189 .

The Registrar,  
University of Adelaide.

#### ADDENDUM.

The Regulations concerning the Degree of Bachelor of Science allowed on the 4th January, 1882, are hereby repealed ; but students who shall have completed either the First or Second Year of their course on the 31st of March, 1887, shall have the option of continuing their course under such Regulations.

Allowed 18th December, 1886.

#### SCHEDULES DRAWN UP UNDER No. VIII. OF THE FOREGOING REGULATIONS.

#### DETAILS OF SUBJECTS FOR THE ORDINARY EXAMINATION FOR THE DEGREE OF B.Sc. IN NOVEMBER, 1897.

##### LANGUAGES.

LATIN }  
GREEK } The Subjects prescribed for the Senior Public Examination.  
FRENCH }  
GERMAN }

##### FIRST YEAR'S COURSE.

##### *Elementary Pure Mathematics.*

*Pass.*

The Geometry of the straight line and circle: the theory of Proportion and of Similar Rectilineal Figures.

Elementary Solid Geometry.

The Elements of Algebra as far as the Binomial Theorem (inclusive).

The Elements of Trigonometry, as far as the Solution of Triangles (inclusive).

*Credit.*

Algebra, Trigonometry (including Elementary Spherical Trigonometry) Elements of Statics, Dynamics, and Hydrostatics.

##### *Elementary Physics (including Practical Physics).*

*Pass.*

The first principles of Mechanics, Hydrostatics, Heat, Light, Sound, Electricity and Magnetism.

*Credit.*

A thorough knowledge of the Pass Subjects of the Second Year.

*Elementary Biology.*

The instruction in this subject will include:—

*Pass*

1. The fundamental facts and laws of the morphology, histology, physiology, and life-history of plants, as illustrated by the following types :—  
Yeast Plant, Bacteria, Protococcus, Mucor, Penicillium, Spirogyra, the Bracken Fern, and the Bean plant.
2. The fundamental facts of animal morphology and physiology as illustrated by the following types :—  
Amœba, Vorticella, Hydra, Freshwater-mussel, Crayfish, Frog.
3. The histological characters of the blood, epidermal and connective tissues, cartilage, bone, muscle and nerve, in Vertebrata.

Text books recommended :—

Practical Biology : Huxley and Martin.

Elementary Biology : Parker.

The Frog, an Introduction to Anatomy and Histology : Milnes Marshall.

Essentials of Histology : Schäfer ; or

Elements of Histology : Klein ;

Introduction to Botany : Dendy & Lucas.

*Credit.*

A more thorough knowledge of the above subjects.

*Elementary Inorganic Chemistry.*

*Pass.*

The non-metallic elements and their more commonly known compounds.

The following metals and their more commonly known compounds :—

Potassium, Sodium, Silver.

Calcium, Strontium, Barium

Aluminium.

Magnesium. Zinc. Cadmium.

Lead.

Manganese. Iron. Cobalt. Nickel. Chromium.

Bismuth. Copper. Mercury. Gold. Tin.

Platinum.

Spectrum analysis, the elements of chemical theory, the atomic theory and cognate subjects, and the laws of electrolysis.

Text books recommended :—

Introduction to the Study of Chemistry : Remsen, or

Elementary Chemistry : Wilson.

*Credit.*

A more thorough knowledge of the above subjects.

---

SECOND YEAR'S COURSE.

*Pure Mathematics.*

*Pass.*

Algebra. Trigonometry (including Elementary Spherical Trigonometry)-

*Applied Mathematics.*

*Pass.*

Elements of Statics, Dynamics, and Hydrostatics.

Text books recommended :

Loney's Dynamics.  
Greave's Statics.  
Besant's Hydrostatics.

*Credit.*

Elementary Analytical Conics. Elementary Differential and Integral Calculus.

Text-books recommended :

Smith's Conic Sections.  
Todhunter's Differential Calculus.  
Todhunter's Integral Calculus.

### *Physics (including Practical Physics).*

*Pass.*

*Sound* : The general theory of Waves and Vibrations.

*Geometrical Optics.*

Text-book recommended :—

Heath's Elementary Geometrical Optics.

*Heat.*

Text-book recommended :—

Tait's Heat.

*Electricity and Magnetism.*

Text-book recommended :—

Sylvanus Thomson—Electricity and Magnetism.

*Practical Work.*

Glazebrook and Shaw's Practical Physics.

*Credit.*

A thorough knowledge of the Pass Subjects of the Third Year.

### *Elementary, Organic, and Practical Chemistry.*

*Pass.*

Principles of Ultimate Analysis of Organic Compounds. Calculation of Empirical Formulæ from Percentage Composition. Principles upon which Molecular and Constitutional Formulæ are determined. Isomerism. Homologous Series. Classification of Carbon Compounds.

General knowledge of  $C_nH_{2n+2}$  Hydrocarbons, with special knowledge of Methane and Ethane and their principal derivatives.

General knowledge of the Alcohols, with special knowledge of Methyl, Ethyl, and Propyl Alcohols and their related Ethers, Aldehydes, Acids, and Ketones.

Ethylene and Acetylene, and their chief derivatives and related Alcohols, Aldehydes, and Acids.

The more commonly occurring Organic Acids, their methods of formation and relations to one another.

Glycerine and Allyl Alcohol, and their chief derivatives. Constitution of Fats and Oils. Saponification.

Erythrite, Mannite, Dulcete, Isodulcete. Dextrose and Laevulose Cane-sugar, Milk-sugar, Cellulose, Starch, Glycogen, Dextrine.

A general knowledge of the principal Compound Ammonias and Organo-metallic bodies.

Cyanogen and its compounds. Cyanic and Cyanuric Acids. Urea and its allies.

Uric Acid. Guanidine. Glycoeyamine. Glycoeyanidine. Sarkine. Creatine. Creatinine. Theobromine. Caffeine.

A general knowledge of the simpler and more commonly occurring Hydrocarbons, Alcohols, Aldehydes, Acids, Ketones, and derivatives of the Aromatic Series, especially those which are important from a medical or technical point of view.

Glucosides. Amygdalin. Salicin.  
Alkaloids. Conine. Nicotine. Morphine. Strychnine. Quinine.  
Cinchonine.

Some of the more important Animal Substances, such as Taurine, Lecithin, Choline, Albumen, Fibrin, Casein.  
Fermentation, Decay.

### **Practical Chemistry.**

Analysis of mixtures of Inorganic Compounds, and of simple mixtures containing Organic Substances.

Text-book recommended :

Organic Chemistry : Remsen.

*Credit.*

A more thorough knowledge of the above subjects.

### **Botany.**

*Pass.*

The General Structure and Physiology of a flowering plant; *General Characters and Functions* of the root, stem, leaves, and floral organs; *Reproduction*, fertilization, fruit, seed, and germination.

Botanical Characters of the following Natural Orders :

Ranunculaceæ, Cruciferae, Caryophyllaceæ, Malvaceæ, Rutaceæ, Leguminosæ, Myrtaceæ, Rosaceæ, Umbelliferae, Compositæ, Goodenoviæ, Campanulaceæ, Epacridæ, Boraginæ, Scrophulariaceæ, Labiatae, Solanaceæ, Amarantaceæ, Chenopodiaceæ, Proteeaceæ, Coniferae, Orchidaceæ, Amaryllidaceæ, Liliaceæ, Cyperaceæ, Gramineæ, and Filices.

### **Practical Botany.**

Candidates must be prepared to describe in technical language such plant or parts of plants as may be placed before them and to classify specimens illustrative of any of the Natural Orders above enumerated.

Text-books recommended :

Class Book : Balfour; or Manual of Botany : Balfour.  
Flora of South Australia : Tate; or  
Introduction to Botany : Dendy & Lucas.

*Credit.*

A more thorough knowledge of the above subjects.

### **Physiology.**

*Pass.*

The subject matter of Parts I., II., and III. of the Text-book of Physiology : Foster.

Text-book recommended :

Text Book of Physiology : Foster.

### **Practical Examination.**

Each candidate must be prepared (1) to make, examine, and describe microscopical specimens of animal tissues and organs. (2) To prove a practical acquaintance with the chemistry of albumen and its allies, milk, the digestive juices and their actions, blood, urine, glycogen.

Also to show a practical acquaintance with the most important apparatus used in studying the physiology of muscle, nerve, the circulatory and respiratory system.

**Text-books recommended :**

Essentials of Histology : Schäfer ; or

Elements of Histology : Klein.

Outlines of Practical Physiology : Stirling.

Essentials of Chemical Physiology : Halliburton.

Part V. of Text-book of Physiology (Foster) should also be consulted.

**Credit.**

A more thorough knowledge of the above subjects.

### *Geology.*

**Pass.**

- I. The principles of geological dynamics, and physiography. Effects of rain ; sources of water supply. Geological action of rivers. Marine denudation. Geological action of snow and ice. Formation of modern strata. Central heat. External phenomena of volcanoes. Movements of the earth's crust. Agency of organic beings in modifying the earth's surface.
- II. The composition and formation of the principal rocks. Disintegration of rocks. Classification and characters ; metamorphism. Cleavage.
- III. The structure of rock masses. Stratification. Calculation of thickness of strata. Disturbance and contortion of strata, &c., &c. Construction of geological sections and maps.
- IV. The laws and generalizations of Paleontology.
- V. Classification of the Geologic Systems of Europe ; their Australian equivalents and characteristic fossils.

**Text-book :** Geikie, Manual of Geology.

**Credit.**

A more thorough knowledge of the above subjects.

### SYLLABUS FOR NEW SUBJECTS.—METALLURGY COURSE.

**Inorganic Chemistry :** The subjects of the First Year's Course treated more fully.

**Practical Chemistry :** Qualitative and simple quantitative analysis.

\***Assaying :** Fire assays of lead, silver, gold, tin, and the wet assay of copper.

### THIRD YEAR'S COURSE.

#### *Mathematics.*

**Pass.**

Elementary Analytical Conics. Elementary, Differential, and Integral Calculus.

**Honours.**

Analytical Statics, Dynamics of a Particle, Hydromechanics, and Solid Geometry.

#### *Physics, including Practical Physics.*

**Pass.**

The subject of the Second Examination for the Degree of B.Sc., treated more fully with the following additions—

**Mechanics :** Moment of Inertia, Centre of Oscillation, Kater's Pendulum, Measurement of Intensity of Gravity. The motion of Liquids and Gases, Toricelli's Theorem.

\* Students will obtain instruction in this subject at the School of Mines.

*Properties of Matter*: Elasticity, Viscosity, Capillarity, Diffusion  
*Optics.*

Text-book recommended :—  
Preston's Theory of Light.

*Heat.*

Text-book recommended :—  
Maxwell's Theory of Heat.

*Electricity and Magnetism.*

Text-books recommended :—  
Cumming's Theory of Electricity.  
Maxwell's Elementary Treatise on Electricity and Magnetism.  
Stewart & Gee's Practical Physics, Part II.

*Honours.*

A more thorough knowledge of the same subjects.

*Advanced Organic, Inorganic, and Practical Chemistry.*

*Pass.*

More advanced organic, inorganic, and practical chemistry. Students may be required to perform simple quantitative analyses, and to make preparations of organic or inorganic compounds.

*Honours.*

A more thorough knowledge of the above subjects, and especially of more recent discoveries.

*\*Animal Physiology, including Histology, Physiological Chemistry, and the Elements of Development.*

*Pass.*

This Course includes the subjects prescribed for the second year, and in addition the subject matter of parts IV. and V. of the Text-book of Physiology : Foster, and of the Text-book of Human Physiology : Landois and Stirling.

Text-books recommended :

Text-book of Physiology : M. Foster.  
Text-book of Human Physiology : Landois and Stirling.

*Practical Examination.*

The same subjects as for the Second Year's Course, but with more extended work.

Text books recommended :

The same as for the Second Year's Course, and in addition Quain's Anatomy, Vol. I., Part I. (Embryology), and Part II. (General Anatomy and Histology).  
Text-book of Chemical Physiology and Pathology (Halliburton) should also be consulted.

*Honours.*

A more thorough knowledge of the above subjects.

*Geology, Mineralogy, and Palæontology.*

*Geology and Palæontology.*

\* The special attention of students is drawn to the fact that it will not be possible for them to follow the course of instruction in Animal Physiology and Vegetable Physiology of the Third Year B.Sc. Course, without some knowledge of Organic and Practical Chemistry. Similarly a knowledge of Practical Chemistry is necessary to the Student of Mineralogy.

\* The special attention of Students is drawn to the fact that it will not be possible for them to follow the course of instruction in Animal Physiology of the Third Year of the B.Sc. Course without some knowledge of Organic and Practical Chemistry. Similarly a knowledge of Practical Chemistry is necessary to the Student of Mineralogy.

*Pass.*

A fuller treatment of the principal subjects comprised in the Second Year's Course.

The features in detail of the Geological systems of the Australian sedimentary rocks.

The nature and processes by which the remains of animals and plants are preserved and fossilized. Distribution of land plants and animals; botanical and zoological provinces; distinctive characteristics of flora and fauna of different regions; provinces of marine life; distribution of life in depth; distribution of life in time.

Candidates will be required to identify and describe rocks and fossils characteristic of the Australian formations. They will also be expected to draw geological maps and sections.

*Honours.*

A more thorough knowledge of the above subjects.

**\*Mineralogy.**

*Pass.*

1. The *physical properties* of minerals viewed principally as aiding in the practical discrimination of the various kinds. Fracture. Hardness. Tenacity. Specific Gravity. Lustre. Transparency. Refraction. Optic Axes.
  2. *Crystallography*.—Classification of the crystalline forms and their chief combinations. Isometric drawing. Principles of goniometers. Cleavage. Pseudomorphism. Dimorphism. Isomorphism. Fossilization.
  3. The use of the blowpipe, and of such chemical tests as are calculated to be serviceable when in the field.
  4. The systematic description of the more important species, with particular reference to the mode and places of occurrence, both of those substances which bear a commercial value, and of those which derive their chief interest from geological and physical consideration.
- Candidates for examination will be required to prove a practical acquaintance with crystal forms, and with minerals, and the physical and chemical methods of discriminating them.

*Honours.*

A more thorough knowledge of the above subjects.

Text-books recommended:—

Collin's Mineralogy.

Dana—Manual of Mineralogy.

Mitchell's Crystallography.

\* The special attention of Students is drawn to the fact that it will not be possible for them to follow the course of instruction in Animal Physiology of the Third Year of the B.Sc. Course without some knowledge of Organic and Practical Chemistry. Similarly a knowledge of Practical Chemistry is necessary to the Student of Mineralogy.

**SYLLABUS FOR NEW SUBJECTS.—METALLURGY COURSE.**

**Metallurgy:** A thorough knowledge of the chemistry of all the ordinary metals; a knowledge of solid, liquid, and gaseous fuel, and of the principal methods for the extraction of the ordinary metals from their ores; also a knowledge of the physical characteristics of the metals and their alloy.

**\*Assaying:** Analysis of coke, coal, &c., slags, and the determination by wet methods of the principal metals and other substances of importance in metallurgy.

\* Students will obtain instruction in this subject at the School of Mines.

# OF THE PHYSICAL LABORATORY.

## REGULATIONS.

- I. The Physical Laboratory shall be open during Term Time for three afternoons in the week ; the hours and days to be fixed by the Professor of Natural Philosophy, subject to approval by the Council.
- II. Instruction will be given in Practical Physics ; but no student will be admitted to Laboratory Work unless he shall have shown to the satisfaction of the Professor of Natural Philosophy that he possesses sufficient theoretical knowledge to enable him to carry on his work intelligently.
- III. Apparatus will be supplied by the University for the general use of Students on the condition that breakages and damages be made good.
- IV. The Professor of Natural Philosophy may exclude from the Physical Laboratory any student for any cause satisfactory to the Professor ; every such exclusion and the grounds for it to be reported by the Professor to the Council at its next meeting, and in case of any student being so excluded the fees paid by him will not be refunded.

## FEES.

V. The fees for students not attending ordinary courses of instruction in Practical Physics are as follow :—

|                        |     |     |    |   |   |          |
|------------------------|-----|-----|----|---|---|----------|
| For 3 days in the week | ... | ... | £4 | 4 | 0 | per term |
| “ 2 “ “ “              | ... | ... | 3  | 3 | 0 | “ “      |
| “ 1 “ “ “              | ... | ... | 2  | 2 | 0 | “ “      |

Allowed, 18th December, 1886.

# OF THE CHEMICAL LABORATORY.

## REGULATIONS.

- I. The Chemical Laboratory shall be open daily during Term Time (Saturdays excepted) from 10 a.m. to 5 p.m.
- II. Instruction will be given in Qualitative and Quantitative Analysis : but no student will be admitted to Laboratory Work unless he shall have shown to the satisfaction of the Professor of Chemistry that he possesses sufficient theoretical knowledge to enable him to carry on his work intelligently.
- III. Each student will be provided with a set of re-agents and a separate working bench, fitted with drawers, shelves, and cupboards, to which gas and water are laid on, and also with all apparatus necessary for the ordinary courses of Experimental Chemistry and Qualitative Analysis, except filter papers, litmus papers, and platinum wire and foil, but these latter will be supplied by the University at cost price.
- IV. Each day student will be required to pay a yearly deposit fee of £1, and each evening student a yearly deposit fee of 10s., against which all breakages will be debited and the balance refunded at the end of the year. Should the value of the apparatus broken exceed the amount of the deposit fee before the end of the year, a fresh deposit fee must be paid.
- V. Students engaged in Quantitative Analysis will be required to provide themselves with a platinum crucible and capsule, and a set of gramme weights.
- VI. Students engaged in private investigations will be required to provide themselves with any materials they may require which are not included amongst the ordinary re-agents ; also with the common chemicals, when they are employed in large quantities.
- VII. The larger and more expensive pieces of apparatus will be supplied for the general use of students by the University on the condition that all breakages be made good.
- VIII. All preparations made from materials belonging to the Laboratory shall become the property of the University.
- IX. No experiments of a *dangerous nature* may be performed without the express sanction of the Professor of Chemistry.
- X. For original research, carried on by students or graduates with the consent and under the direction of the Professor, the Laboratory will be open gratis, except as regards such payment

for material and special attendance as may be considered necessary by the Professor.

- XI. The Professor of Chemistry may exclude from the Chemical Laboratory any student for any cause satisfactory to the Professor; every such exclusion, and the grounds for it, to be reported by the Professor to the Council at its next meeting; and in case of any student being so excluded the fees paid by him will not be refunded

### INORGANIC CHEMISTRY.

PROFESSOR RENNIE, M.A., D.Sc.

Time—Three hours.

*(Candidates are expected to write formulae and equations wherever possible.)*

- I. What volume of sulphur dioxide (measured at standard temperature and pressure) would yield sufficient sulphuric acid to completely decompose one gramme of nitrate of lead? What weight of sulphate of lead would be formed?
- II. Describe the manufacture of bleaching powder. Discuss its nature and explain fully its decomposition by acids.
- III. The density of the vapours given off when ammonium chloride is heated is approximately 0.92 as compared with air: how do you explain this fact. State how the conclusions deduced from this observation can be confirmed by direct experiment and mention another case of the same kind.

III. How would you prepare a pure solution of ammonia? Comment on the nature of the solution and point out some respects in which it differs from solutions of caustic potash and caustic soda. How would you propose to detect the presence of ammonia in drinking water?

IV. Write methods of preparation for anhydrous and diluted hydrocyanic acid respectively, and describe a test for detecting its presence.

A solution of potassium cyanide dissolves chloride of silver and metallic gold: explain the changes in each case.

V. Write an account of three methods for the preparation of sulphuretted hydrogen and describe the reactions which take place when (a) it is mixed with chlorine; (b) when it is passed over heated iron; (c) when it is passed into a solution of ferric chloride; (d) when it is passed into alkaline and acid solutions respectively of nickel sulphate.

VI. Describe the reactions which take place when

(a) Solutions of auric chloride and ferrous sulphate are mixed.

(b) Phosphorus oxychloride is heated with phosphorus.

(c) Sodium is heated in ammonia gas and the product is heated in nitrous oxide.

(d) Potassium bichromate is heated with sulphuric acid and some oxidizable organic substance.

VII. How would you prepare

(a) A solution of sodium hypophosphite.

(b) Perchloric acid.

(c) Potassium silicofluoride.

(d) Boron trifluoride.

(e) A solution of ferric hydroxide.

(f) Ammonium carbamate.

(g) Sodium stannate.

(h) Chromium oxychloride.

Explain the use of this last substance in detecting a chloride in presence of a bromide.

---

## PRACTICAL CHEMISTRY.

PROFESSOR RENNIE, M.A., D.Sc.

Time—Four hours.

Five substances were given, two containing not more than one acid and one base, and one not more than two acids and two bases.

## SECOND YEAR.

**APPLIED MATHEMATICS** { The same papers both in Pass and in Credit as set for the Second Year, B.A.

**PHYSIOLOGY PRACTICAL PHYSIOLOGY** { The same papers as set in these subjects for the Second Year of the M.B. Degree.

**BOTANY I.** { The same paper as set for the First Year of the M.B. Degree.

### PHYSICS I.

R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

- I. Describe the construction of Hadley's sextant, and prove that the angle subtended by the two objects at the eye is twice the angle between the mirrors.
- II. Show that at a single refraction the deviation is greater the greater the angle of incidence. What is the connection between the refractive index of a material and the critical angle?
- III. Establish the general formula  $\frac{1}{u} + \frac{1}{v} = \frac{2}{r}$  for reflection at a single spherical surface.

It is required to throw an image of an object on to a screen by means of a concave mirror. The object being placed 6 feet from the screen, what must be the radius of the mirror, and in what position must it be placed in order that the image may be four times the size of the object?

- IV. Show that when a ray of light passes through a prism which is more highly refractive than the surrounding medium the deviation is towards the thick end of the prism, but if the prism is less highly refractive than the surrounding medium the deviation is towards the edge of the prism.
- V. An achromatic combination is to be made of a double-convex and a double concave lens in contact. Investi-

gate the condition of achromatism and show that the focal lengths of the lenses must vary directly as the dispersive powers of their materials.

VI. Describe Gregory's reflecting telescope.

The focal length of the object glass of a microscope is  $\frac{1}{8}$  inch; that of the eye piece is 2 inches. Taking the least distance of distinct vision as 12 inches, find the distance between the object glass and eye piece when the object viewed is  $\frac{1}{4}$  of an inch from the object glass.

VII. Explain how a longitudinal wave may be represented graphically as a transverse wave, and hence show how the effects of two longitudinal waves travelling along the same line of particles may be compounded. What will be the effect of sounding together two musical notes whose vibration frequencies are  $n$  and  $n + p$  respectively.

VIII. Describe some method of showing the effect of compounding simple harmonic vibrations at right angles, and show that if the vibrations compounded are of equal amplitude and differ in phase by a quarter period the resultant effect is uniform motion in a circle.

IX. Describe an experimental method of determining the velocity of sound in a gas, and explain the theory of the method.

---

## PHYSICS (ELECTRICITY AND HEAT).

PROFESSOR BRAGG, M.A.

Time—Three hours.

I. Explain carefully the effect of the thickness and quality of the glass of a Leyden jar on its usefulness.

Six Leyden jars, each of capacity  $C$ , being arranged in series, find an expression for their united capacity. Also find a similar expression when they are arranged in parallel.

II. What is the contact-potential of metals? How may it be shown?

III. Define the terms *magnetic pole*, *strength of magnetic pole*, *intensity of magnetic field*, *magnetic induction*. How may the strengths of two poles be compared?

IV. State the principal laws of electrolytic action.

V. Describe some sensitive form of galvanometer.

VI. A small coil of wire has its ends connected to the terminals of a dead-beat galvanometer. A long bar magnet is

made to approach the coil, pass through it, and is taken away on the other side. What will be the nature of the deflections shown by the galvanometer needle?

- VII. How would you measure the resistance of an incandescent lamp—(1) when cold (2) when hot?
- VIII. Describe the air thermometer and the method of its use.
- IX. Describe and explain Bunsen's ice-calorimeter.
- X. State briefly proofs that radiant heat is the same sort of thing as radiant light.

---

### CREDIT PAPERS.

The Credit Papers in Physics for the Second Year were the same as the Pass Papers in Physics for the Third Year.

---

### INORGANIC CHEMISTRY (I.).

PROFESSOR E. H. RENNIE, M.A., D.Sc.

Time—Three hours.

[N.B.—Candidates are expected to write formulæ and equations wherever possible.]

- I. Write what you know of dissociation and the laws which govern it.
- II. What is Faraday's law of electrolysis? Explain the modern theory of electrolytic dissociation.
- III. What is Henry's law relating to the solubility of gases? Explain its application to the solubility of mixed gases.
- IV. Sulphuretted hydrogen is passed into water in which iodine is suspended. Explain fully why a solution of hydriodic acid of greater specific gravity than 1.56 cannot be obtained by this method.
- V. What do you understand by *catalytic* action? Explain fully any one case of this kind of action.
- VI. Describe fully Moissan's apparatus for the preparation of fluorine, and state what you know of its properties.
- VII. Describe the preparation of iodine from crude Chili salt-petre. Write a brief account of periodic acid and one or two of the principal periodates.
- VIII. Describe Chance's process for the saving of the sulphur in alkali waste.

- IX. Write what you know of the preparation and properties of metaphosphoric acid and its salts. How could you distinguish between ortho-, pyro-, and meta-phosphoric acids?

---

## INORGANIC CHEMISTRY (II.).

PROFESSOR RENNIE, M.A., D.Sc.

Time—Three hours.

(*N.B.—Candidates are expected to write formulae and equations wherever possible.*)

- I. Write an account of the preparation and properties of the oxides of antimony, and give some account of the antimonates.
- II. Describe the preparation of potassium chlorate on the large scale, and give an account of its properties.
- III. Write an account of the preparation and properties of the oxides of sodium, and explain how caustic soda is manufactured on the large scale.
- IV. Write a brief account of the English process of copper smelting.
- V. Write what you know of
  - (a) The Aluminates ;
  - (b) The Alums ;
  - (c) Aluminium Sulphide.
- VI. State briefly some of the most important facts about thallium and its compounds.
- VII. Write what you know of the chlorides of tin and their properties.
- VIII. How is chromium trioxide prepared, and what are its properties? What evidence is there for the existence of a higher oxide of chromium?
- IX. Compare the oxides of nickel and cobalt.

---

## PRACTICAL CHEMISTRY (Credit).

Time—Twelve hours.

- I. Analyse the alloy qualitatively.
- II. Determine the quantity of iron present in the solution placed before you volumetrically.

## ORGANIC CHEMISTRY.

The same paper as set for the Second year of the M.B. course.

---

## PRACTICAL CHEMISTRY.

Time—Four hours.

Two substances were given for qualitative analysis, of the same kind as those for the Second Year M.B.

---

## GEOLOGY (I.).

W. HOWCHIN, F.G.S.

Time—Three hours.

- I. Describe how *chemical* action may be either *destructive* or *constructive* in relation to rock masses.
- II. How do sedimentary and igneous rocks respectively differ as to texture, stratification, jointing, and weathering?
- III. Name and describe the chief rock-forming minerals in the following classes :—Carbonates, silicates, sulphates, oxides.
- IV. What is meant by the terms *acidic* and *basic*, as applied to rocks? Give examples in their respective classes.
- V. Describe the difference between *local* and *regional* metamorphism.
- VI. The deposition of strata is sometimes locally interrupted by a greater or less interval of time. State the conditions under which this might occur; how such an interval can be recognised in the strata; and by what means the relative length of time it represents can be inferred.
- VII. Draw a geological section from Yorke's Peninsula to the Murray Plains, passing through Ardrossan and Hallett's Cove.
- VIII. Name the rock specimens (1-10).

---

## GEOLOGY (II.).

W. HOWCHIN, F.G.S.

Time—Three hours.

- I. Which is the oldest fossiliferous formation in Australia? Mention localities where it occurs, and the evidences on which its age has been determined.

- II. What is the zoological position of the Echinodermata? Briefly describe the principal Orders, and give particulars of their geological distribution.
- III. Enumerate the principal Coal-fields of Australia, their geological age, and the fossils that distinguish them.
- IV. Describe the general features of the flora characteristic of the Palæozoic, Mesozoic, and Cainozoic Divisions.
- V. Explain the terms *syncline* and *anticline*. Draw both a plan and vertical section in which the four uppermost Palæozoic formations exhibit anticline outcrops with the lowest member exposed by denudation.
- VI. Name the genera of the fossils submitted (1-8), and the geological formations in which they respectively occur.

## T H I R D   Y E A R .

### M A T H E M A T I C S .

The same Papers both for Pass and Honours as set for the Third Year of the B.A. Course.

### P H Y S I C S (Honours).

PROFESSOR BRAGG, M.A., W. SUTHERLAND, M.A., and R. W. CHAPMAN, M.A., B.C.E.

Time—Three hours.

- I. If  $F$  is the electric force at any point  $x, y, z$ , then the whole electric energy is
 
$$\frac{1}{8\pi} \int_{-\infty}^{\infty} \int_{-\infty}^{\infty} \int_{-\infty}^{\infty} F^2 dx. dy. dz.$$
- II. Prove that when the needle of a quadrant electrometer is kept at a much higher potential than any potentials to be given to the quadrants, and when the deflection of the needle is small, the difference of potential of the quadrants is proportional to the deflection. Explain how the instrument may be used to measure large differences of potential, establishing the appropriate formula for the method.
- III. Explain in general terms how the communication of a charge of electricity to an insulated curved fluid surface such as a mercury meniscus, alters its surface tension, and determine the change in the surface tension of a rain drop of a radius  $v$  produced by a charge  $q$ , showing that its amount in a strip of unit width is equal to the electrical energy of the charge per unit surface.

IV. Find an expression for the loss of energy by hysteresis during a magnetic cycle.

Describe Ewing's molecular theory of magnetism. On this theory, what, would you say, becomes of the hysteresis loss?

V. Assuming that in an alternating dynamo driven at uniform speed the *E.M.F.* is a simple harmonic function of the time, prove that, if the dynamo be connected to an adjustable inductionless resistance, the activity is a maximum when  $R=2\pi L/T$ : where  $L$  is the inductance of the dynamo circuit and  $R$  the resistance of the whole circuit.

If a harmonic *E.M.F.* be put on to the primary of a transformer, show how to draw a diagram which shall give the magnitudes and phases of the primary and secondary currents.

VI. Assuming that the force exerted in any direction by a circuit carrying unit current on a magnetic pole is equal to the rate of change of the number of lines passing through the circuit consequent on motion of the pole in that direction, show that the mutual energy of two circuits carrying currents  $x$  and  $y$  is

$$-x \cdot y \cdot \iint \frac{\cos e}{r} \cdot ds \cdot ds'$$

using the customary notation.

VII. Describe a method of comparing a self-inductance with a capacity or a resistance, proving the appropriate formula.

VIII. Describe the absolute electro-dynamometer, and find a formula for its use.

IX. Enumerate the methods of finding  $v$ . State also which have been most used, describing in general terms the method of experiment in each case.

---

## PHYSICS (Honours).

### LIGHT AND THERMODYNAMICS.

Time—Three hours.

I. State the "principle of least time" in connection with the path of a ray of light, and prove that it holds as regards a ray reflected at a plane surface, and also one refracted at a plane surface separating two homogeneous media; and then apply the principle to write down briefly the

connection between the positions of conjugate foci and the focal length of a lens.

- II. Show how the refractive index of a substance can be determined by interference experiments, and mention any uses that have been made of the method.
- III. Describe as fully as you can the operations involved in the absolute measurement of wave lengths of light.
- IV. Investigate the relation between the amplitudes of the incident, reflected and refracted rays when the light is polarised in the plane of incidence, using Fresnel's hypotheses. And show that the relative intensities of the incident, reflected and refracted rays are as

$$a^2 : a^2 \frac{\sin^2 (i - r)}{\sin^2 (i + r)} : a^2 \frac{\sin^2 2i}{\sin^2 (i + r)}$$

where  $a$  is the amplitude of the incident ray, and  $i$  and  $r$  are the angles of incidence and refraction respectively.

- V. Briefly discuss the theory of Rotatory Polarisation, and describe fully the construction and method of use of Laurent's Polarimeter.
- VI. Explain clearly what is meant by the term "dissipation of energy," in general, and after proving that in an irreversible cycle in a heat engine  $\int \frac{dH}{\theta}$  is negative, show that in an engine worked with an irreversible cycle there is always waste of heat.

VII. Explain in general terms how it comes that saturated steam on being suddenly expanded exhibits cloudy condensation; and establish the thermodynamic equation by means of which and the necessary physical measurements it is possible to calculate the amount of condensation accompanying a given expansion at a given temperature.

VIII. Describe Dulong and Petit's experiments on the laws of cooling, and briefly discuss their results.

IX. From the following data for ethyl oxide calculate its latent heat of vaporisation in calories at  $30^\circ C$ .

When  $t$  is temperature  $C$ , and  $p$  is saturation pressure of vapour in millimetres of mercury at temperature near  $30^\circ C$ .

$$p = 635 + 23.55(t - 30) + .42(t - 30)^2$$

and the volume of a gramme of ethyl oxide at  $30^\circ C$  is 400 c.c. as saturated vapour, and 1.423 c.c. as liquid. Density of mercury at  $0^\circ C$ . = 13.59' g = 981 C.G.S.

A calorie = 4.2 joules, and a joule =  $10^7$  ergs. [On account of experimental uncertainty in the number 400, the computation need not be carried to a higher degree of accuracy than within  $\frac{1}{3}$  per cent. of the strict result.]

## PHYSICS (Honours.)

### GENERAL PAPER.

Time—Three hours.

- I. A plane wave of homogeneous light is incident on a plane diffraction grating, the front of the wave being parallel to the grating. The light is then refracted by a convex lens also parallel to the grating. Investigate the nature of the illumination on a parallel screen passing through the principal focus of the lens, and show that if  $I_m$  denote the intensity of the  $m^{\text{th}}$  bright band and  $I$  the intensity of the central band

$$\frac{I_m}{I} = \left( \frac{a + d}{a m \pi} \right)^2 \sin^2 \frac{a m \pi}{a + d}$$

where  $a$  is the width of a single opening on the grating, and  $d$  the width of one of the divisions between the openings.

- II. Show that the force tending to move two circuits carrying currents is equal to the product of the currents multiplied by the rate of change of their mutual induction, consequent on the motion.

Two circular currents of strength  $x$  and  $y$  are in one plane. Their radii are  $a$  and  $b$ , and the distance between their centres is  $c$ , which is large in comparison with the radii. Show that the force drawing the circuit

together is  $\frac{3\pi^2 a^3 b^2}{c^4} \cdot xy$

- III. What various meanings may be given to the term coefficient of self-induction when the circuit referred to contains iron?

Find an expression giving the rise of current with time when a steady E.M.F. is applied to a circuit of constant self-induction; and show also how to obtain the same thing by an approximate geometrical construction when the self-induction is not constant, but its value for all currents is known.

IV. Write essays on not more than two of the following :—

- (a). Cornu's spiral.
  - (b). The passage of polarised light through media subjected to electrostatic strain.
  - (c). Forbes' conductivity experiments.
  - (d). The electric discharge in rarefied gases.
  - (e). The thermo-electric diagram.
  - (f). Hertz' experiments in electro-magnetic radiation.
  - (g). The measurement of intense magnetic fields.
  - (h). Dynamical models of current induction.

# HIGHER PUBLIC EXAMINATION.

## REGULATIONS.

I. A Higher Public Examination will be held annually.

Regulation II. of the Higher Public Examination allowed by the Governor on the 18th December, 1886, is hereby repealed, and the following substituted therefor:—

\* II. Candidates must have attained the full age of eighteen years on the day on which the examination begins, but this rule may be relaxed in special cases at the discretion of the Council.

Regulation III. of the Higher Public Examination, allowed by the Governor on the 2nd October, 1895, is hereby repealed, and the following substituted therefor:—

† III. Candidates may be examined in any one or more of the following subjects, provided that no Candidate shall be allowed to take Part II. or Part III. of any subject in the same year as Part I.

1. Latin, Part I.

#### \*THEORY AND HISTORY OF EDUCATION.

Professor Mitchell will form a class on this subject if five students intimate their intention of joining. The class will meet once a week at a time most convenient to the students.

The course will comprise (a) The Principles of Education, with special reference to the psychology of mental growth; (b) Practice of Education, curriculum and methods of teaching; (c) History of Education and Educational Literature.

The text books to be used in class are: Laurie, *Institutes of Education* (J. Thin); Compayré, *History of Pedagogy* (Sonnenschein); Locke, *Thoughts on Education* (Pitt Press); Spencer, *Education* (Williams & Norgate).

The following are recommended in connection with the lectures:—A text book on Psychology, e.g., Höfding's *Elements of Psychology* (Macmillan), or Sully's *Teachers' Handbook of Psychology* (Longmans); a text book on Logic, e.g., Jevons's *Primer or Elementary Lessons* (Macmillan). Laurie, *Pre-Christian Education* (Longmans), and *Language and Linguistic Method* (Thin); Fitch, *Lectures on Teaching* (Pitt Press); Herbart, *Science of Education* (Sonnenschein); Lange, *On Apperception* (Heath & Co, Boston).

Professor Mitchell will be happy to advise candidates who are unable to join the class.

---

#### † "ELECTRIC ENGINEERING." PART I.

The following will be the course:—

The fundamental principles and phenomena of Electricity and Magnetism.

The elementary theory of electro-magnets and magnetic circuits.

The elementary theory of the construction and use of Dynamo-Electric Machinery: the electric light, the transmission of power, the telegraph, telephone, and other practical applications of electricity.

Text-book recommended:

Elementary Electricity and Magnetism: Silvanus Thompson.

Books of Reference recommended:

Handbook of Practical Telegraphy: Culley.

The Electro-Magnet: Silvanus Thompson.

The Dynamo: Silvanus Thompson.

## EXAMINATION PAPERS, 1896.

The same papers as set for the First and Second years for the B.A. and B.Sc. Degrees, with the exception of French and German.

### FRENCH (Pass).

PROFESSOR MITCHELL, M.A., D.Sc.

Time—Three hours.

- I. (1) Give, with examples the various uses of *qui*, *que*, and *quoi* as relatives and interrogatives.
- (2) Give the French for :—In spring. In summer. A fortnight. A week ago. We were deceived without being aware of it. As for me, I had to retrace my steps. We have obeyed you, and waited for them all this afternoon, though we should have been very glad to go and spend the evening with you. We are sorry, of course, but it was for you to say what we ought to have done.
- (3) Write and translate French sentences to show the difference between *répondre de* and *répondre à*, *tenir de* and *tenir à*, *venir de* and *venir à*, *convenir de* and *convenir à*.
- II. (1) Mention the chief metrical differences between French and English verse (excluding the difference in legitimate rhymes).
- (2) “A French poet can never have more than two rhymes, so to speak, on hand at the same time, one masculine and one feminine.” Explain this.
- III. Translate into English—
- (1) C'en est fait maintenant, pareils aux hirondelles,  
Partez ; qu'un même but vous retrouve fidèles.  
Et moi, pourvu qu'en vos combats  
De votre foi nul cœur ne doute,  
Et qu'une âme en secret écoute  
Ce que vous lui direz tout bas ;
- Pourvu, quand sur les flots en vingt courants contraires  
L'ouragan chassera vos voiles téméraires,  
Qu'un seul ami, plaignant mon sort,  
Vous voyant battus de l'orage,  
Pose un fanal sur le rivage,  
S'afflige, et vous souhaite un port ;

D'un œil moins désolé je verrai vos naufrages.  
 Mais le temps presse, allez ! rassemblez vos courages ;  
 Il faut combattre les méchants.  
 C'est une sceptre aussi que la lyre !  
 Dieu, dont nos âmes sont l'empire,  
 A mis un pouvoir dans les chants.

(2) Il viendra,—quand viendront les dernières ténèbres,  
 Que la source des jours tarira ses torrents,  
 Qu'on verra les soleils, au front des nuits funèbres,  
 Pâlir comme des yeux mourants ;  
 Quand l'abîme inquiet rendra des bruits dans l'ombre,  
 Que l'enfer comptera le nombre  
 De ses soldats audacieux,  
 Et qu'enfin le fardeau de la suprême voûte  
 Fera, comme un vieux char tout poudreux de sa route,  
 Crier l'axe affaibli des cieux.

Il viendra,—quand la mère, au fond de ses entrailles,  
 Sentira tressaillir son fruit épouvanté ;  
 Quand nul ne suivra plus les saintes funérailles  
 Du juste, en sa tombe attristé ;  
 Lorsqu'approchant des mers sans lit et sans rivages,  
 L'homme entendra gronder, sous le vaisseau des âges,  
 La vague de l'éternité.

Il viendra,—quand l'orgueil, et le crime, et la haine,  
 De l'antique alliance auront enfreint le vœu ;  
 Quand les peuples verront, craignant leur fin prochaine,  
 Du monde décrépît se détacher la chaîne,  
 Les astres se heurter dans leurs chemins de feu,  
 Et dans le ciel,—ainsi qu'en ses salles oisives  
 Un hôte se promène, attendant ses convives,—  
 Passer et repasser l'ombre immense de Dieu.

[Point out the rhymes in the above passage which are not permissible in English.]

(3) On fait dire au roi, dans une déclaration de ce temps-là, que le cardinal avait en effet levé ces troupes de son argent ; ce qui doit confondre l'opinion de ceux qui ont écrit qu'à sa première sortie du royaume Mazarin s'était trouvé dans l'indigence. Il donne le commandement de sa petite armée au maréchal d'Hocquincourt. Tous les officiers portaient des écharpes vertes ; c'était la couleur des livrées du cardinal. Chaque parti avait alors son écharpe : la blanche était celle du roi ; l'isabelle, celle du prince de Condé. Il était étonnant que le cardinal Mazarin, qui avait jusqu'alors affecté tant de modestie, eût la hardiesse de faire porter ses livrées à une armée,

comme s'il avait un parti différent de celui de son maître ; mais il ne put résister à cette vanité : c'était précisément ce qu'avait fait le maréchal d'Ancre, et ce qui contribua beaucoup à sa perte. La même témérité réussit au cardinal Mazarin : la reine l'approuva. Le roi, déjà majeur, et son frère, allèrent au-devant de lui.

- (4) M. Sardou a toujours sur lui du papier et prend en note tout idée, tout incident qui peut servir à faire une pièce ou se rapporter à une pièce ébauchée. Il lui arrive de prendre des notes le soir, en voiture, quand il revient de dîner en ville ; un mot, un geste, une attitude, moins encore ; tout ce qui peut être utile est aussitôt fixé. Tout en nous donnant ces renseignements, M. Sardou se lève, ouvre un bahut et en tire une vingtaine de dossiers, qui sont rangés méthodiquement dans leurs chemises ; on dirait des paperasses de notaire. Il y en a, paraît-il, une cinquantaine, qui tous portent des noms de pièces ; ce sont des pièces ébauchées, à contours déjà arrêtés, et qui sont fréquemment divisées en actes. D'autres dossiers, moins complets, sont au nombre de deux cents ; ceux-là ne renferment pas une pièce possible, mais une idée de pièce ; ils se réduisent à un petit mot griffonné à la hâte, à deux ou trois fiches, parfois à un article découpé dans un journal, dans lequel on voit quelques mots soulignés au crayon rouge ; là où un indifférent lecteur a passé son chemin, l'œil du maître s'est arrêté et a découvert un germe de pièce ; le germe a été recueilli et mis méthodiquement dans un dossier, où il attend.

#### IV. Translate into French—

Everybody loved the boy, but because of his beauty and his graceful ways, so like his father's, I mistrusted him. The careless laugh, the tones of the voice, startled me when I heard them in the house ; and in the twilight the outlines of his figure and the lift of his head thrilled my heart with powerful recollections. But no sister ever bore such love for a brother as Margaret did for him. Always she followed him with worshipping eyes, watched for his coming, grieved for his going, ready at any moment to sacrifice herself for his lightest whim.

"He is coming to-day, he is coming to-day," she would say on Saturday mornings. But through the week she was quiet and subdued.

"Why do you not talk to me as you talk to him ?" I asked.

"You would not understand," she answered, looking

at me wonderingly. Then I called to mind my father's teaching and the words which had roused me to a passionate faith in Right, and Truth; and Honour, and Justice, and I tried to repeat them.

## GERMAN (Pass).

PROFESSOR MITCHELL, M.A., D.Sc.

Time—Three hours.

I. (1) Give the various genders, plurals, and meanings of these words :—See, Thor, Gesicht, Wort, Bund, Band.

(2) Explain and exemplify the use of the accusative to express space and time. Give examples also of the genitive of time.

(3) Write the third singular present and preterite indicative active, and the past participle of :—*aufstehen*, *ausprechen*, *bekommen*, *besitzen*, *bereiten*, *vorlesen*, *verbergen*. Add the meaning.

II. Translate into English :—

(1). Oberst. Aber, Senden, wie konnten Sie mich in diese Verlegenheit setzen? Sie wissen, daß Oldendorf seit Jahren in meinem Hause verkehrt, und daß es für mich sehr unangenehm sein muß, ihm öffentlich entgegen zu treten.

Senden. Hat der Professor wirklich solche Anhänglichkeit an Sie und Ihr Haus, so hat er jetzt die beste Gelegenheit, sie zu zeigen. Es versteht sich von selbst, daß er sogleich zurücktreten wird.

Oberst. Ich bin davon doch nicht überzeugt; er ist in manchen Dingen sehr hartnäckig.

Senden. Tritt er nicht zurück, so ist ein solcher Egoismus kaum noch Hartnäckigkeit zu nennen. Und in diesem Falle haben Sie doch schwerlich eine Verpflichtung gegen ihn; eine Verpflichtung, Herr Oberst, welche dem ganzen Lande Schaden brächte. Außerdem hat er keine Aussicht gewählt zu werden, wenn Sie annehmen, denn Sie werden ihn mit einer nicht großen, aber sichern Majorität besiegen.

(2). Erhöhen willst du mich — zeigst mir von ferne  
Bedeutend einen kostbaren Preis — Und wärst  
Du selbst der Preis und deine Frauengunst!  
Wer bist du, Vermste, und was kannst du geben?  
Mich locket nicht des eiteln Ruhmes Geiz!  
Bei ihr nur ist des Lebens Reiz —  
Um sie, in ew'gem Freudenchore, schweben  
Der Armuth Götter und der Jugendlust,  
Das Glück der Himmel ist an ihrer Brust,  
Du hast nur todte Güter zu vergeben!

Das eine Höchste, was das Leben schmückt,  
 Wenn sich ein Herz, entzündend und entzündt,  
 Dem Herzen schenkt in süßem Selbstvergeffen,  
 Die Frauenkrone hast du nie besessen,  
 Nie hast du liebend einen Mann beglückt!  
 — Ich muß den Lord erwarten, ihren Brief  
 Ihm übergeben. Ein verhaßter Auftrag!  
 Ich habe zu dem Höllinge kein Herz.  
 Ich selber kann sie retten, ich allein,  
 Gefahr und Ruhm und auch der Preis sei mein!

- (3). Man löst sich nicht allmählig von dem Leben!  
 Mit Einem Mal, schnell, augenblicklich muß  
 Der Tausch geschehen zwischen Zeitlichem  
 Und Ewigem, und Gott gewährte meiner Lady  
 In diesem Augenblick, der Erde Hoffnung  
 Zurück zu stoßen mit entschloßner Seele  
 Und glaubenvoll den Himmel zu ergreifen.  
 Kein Merkmal bleicher Furcht, kein Wort der Klage  
 Entehrte meine Königin — Dann erst,  
 Als sie Lord Vesters schändlichen Verrath  
 Bernahm, das unglückselige Geschick  
 Des werthen Jünglings, der sich ihr geopfert,  
 Des alten Ritters tiefen Jammer sah,  
 Dem seine letzte Hoffnung starb durch sie,  
 Da flossen ihre Thränen; nicht das eigne Schicksal,  
 Der fremde Jammer preßte sie ihr ab.

(4). Wohl war es ein ernstes, oft rauhes Leben in des Königs Dienst, unaufhörlich das Schaffen und Entbehren; auch dem Besten war es schwer, dem strengen Herrn genug zu thun, auch der größten Hingebung wurde ein kurzer Dank; war eine Kraft abgenutzt, wurde sie vielleicht kalt bei Seite geworfen: ohne Ende war die Arbeit, überall Neues, Aufgefangenes, Gerüste an unfertigem Baue. Wer in das Land kam, dem erschien das Leben gar nicht anmuthig; es war so herb, einförmig, rauh, wenig Schönheit und sorglose Heiterkeit zu finden. Und wie der frauenlose Haushalt des Königs, die schweigsamen Diener, die unterwürfigen Vertrauten unter den Bäumen eines stillen Gartens dem fremden Gast den Eindruck eines Klosters machten, so fand er in dem ganzen preussischen Wesen etwas von der Entfagung und dem Gehorsam einer großen emsigen Ordensbrüderschaft.

(5). Ob es mir gelungen ist, in den vorstehenden Ausführungen das Richtige zu treffen, muß ich dem Urtheil des geneigten Lesers überlassen. Zur Unterstützung derselben mag vielleicht dienen, daß ich das, was von mir für den Unterricht in der englischen Sprache vorgeschlagen und empfohlen wird, in 25-jähriger Lehrthätigkeit zum größten Theil selbst angewendet und erprobt habe. Doch bin ich nicht der Meinung, daß der von mir beschriebene und empfohlene Weg für die Unterweisung im Englischen der einzige gangbare ist und der einzige, der zum Ziele führt. Andere mögen auf anderem Wege die gleichen, vielleicht noch bessere Leistungen erzielen. Indessen ist die Methode nicht die einzige Bedingung für das Gelingen des

Unterrichtswerks. Denn es kommt immer noch sehr viel darauf an, in welcher Weise die methodischen Grundsätze und Ratschläge für den fremdsprachlichen Unterricht, welche die Didaktik an die Hand gibt, in jedem einzelnen Falle von dem Lehrer angewendet werden.

III. Translate the following, and make a note on any grammatical points deserving mention :—

- (1). Ich habe in England mich an viel gewöhnen lernen.
- (2). Und ich und Ihr, wir alle sind des Todes.
- (3). Nicht allein genug ist sich  
Das Herz, ein irdisch Pfand bedarf der Glaube,  
Das hohe Himmlische sich zuzueignen.

IV. Translate into German :—

(1) There has been a great want of rain in the country. I don't remember him. There is a knock at the door. No sooner did he come than he began to complain. The story was too absurd for me to believe. The more you try the easier it gets.

(2) There was once a barbarous king, who, among other strange customs, prided himself most on this : If a man was accused of crime he had him brought into the theatre, which was crowded with spectators. The proclamation went out that he was to be torn by wild beasts in the ordinary manner, after it had been decided in a new way whether he were guilty or innocent. A tiger, made furious by hunger and madness, was kept behind one of two doors opening on to the arena.

# OF THE DEGREE OF BACHELOR OF LAWS, AND OF LECTURES AND EXAMINATIONS IN LAWS FOR STUDENTS NOT STUDYING FOR THE DEGREE.

## REGULATIONS.

- I. A Certificate that he has passed a Matriculation Examination of the University shall, if he has passed in Latin, be granted to each successful Candidate at the Senior Public Examination who shall satisfy the Registrar that he intends to become an Articled Clerk.
- II. Term Examinations in the subjects of study lectured upon during the respective Terms shall be held about the close of the First and Second Terms in each year. All Students are required to present themselves for examination at the Term Examinations.
- III. Annual Examinations in the subjects of study for each academical year shall be held about the close of the Third Term in each year, and also during the First Term of the following year. Students proceeding to the Degree of Bachelor of Laws, who have failed to pass or who have not presented themselves at the Annual Examination in the Third Term of any year, may by permission of the Faculty, subject to the approval of the Council, present themselves for examination at the Annual Examination in the First Term of the following year; provided that Students who have failed to pass at the Annual Examination in the Third Term of any year shall in no case be permitted to present themselves at the Annual Examination in the First Term of the following year, except on the recommendation of the Board of Examiners.
- IV. To obtain the Degree of Bachelor of Laws, Students not coming within Regulations IX. and XI. must, after Matriculation, complete four academical years of study as hereinafter specified, and pass the Annual Examinations, and one at least of the Term Examinations proper to each of those years.
- \*V. At the Annual Examination for the first year of the Course for First Year. the Degree of Bachelor of Laws, every Student proceeding to that Degree shall be required to satisfy the examiners in each of the following subjects :—
  1. *Latin* (as in the first year for the B.A. Course, pass subjects only).

\* Allowed 15th December, 1892.

2. *Roman Law.*
3. *Constitutional Law.*
4. *English Language and Literature* (as in the first year for the B.A. Course, pass subjects only).

Second Year.

\*VI. At the Annual Examination for the second year every Student shall be required to satisfy the examiners in each of the following subjects :—

1. *Latin* (as in the second year for the B.A. Course, pass subjects only), or *Greek* (as in the first year for the B.A. Course, pass subjects only).
2. *Law of Property.*
3. *Logic* (as in the second year for the B.A. Course, pass subjects only), or *Elementary Pure Mathematics* (as in the first year for the B.A. Course, pass subjects only).

Third Year.

VII. At the Annual Examination for the third year every Student shall be required to satisfy the examiners in each of the following subjects :—

1. *Jurisprudence.*
2. *Principles of Equity.*
3. *Law of Contracts.*

Fourth Year.

\*VIII. At the Annual Examination for the fourth year every student shall be required to satisfy the examiners in each of the following subjects :—

1. *International Law (Public and Private).*
2. *The Law of Wrongs (Civil and Criminal).*
3. *The Law of Procedure, or, Mental and Moral Science* (as in the third year for the B.A. Course, pass subjects only).

IX. Students who have already graduated in Arts may obtain the Degree of Bachelor of Laws by passing in the following subjects at the Annual Examinations :—

1. *Roman Law.*
2. *Constitutional Law.*
3. *Law of Property.*
4. *Jurisprudence.*
5. *Principles of Equity.*

\* Allowed 15th December, 1892.

6. *Law of Contracts.*
7. *International Law (Public and Private).*
8. *The Law of Wrongs (Civil and Criminal).*
9. *The Law of Procedure, or Mental and Moral Science.*

Such Examinations may be passed at one time or at several times after taking the B.A. Degree, and no attendance at Lectures or Term Examinations is required.

- X. Students will not be required to pass in the subjects which are also included in the B.A. Course, or the alternatives for such subjects, if they have previously passed such first-mentioned subjects in the B.A. Course.
- XI. Students who have already obtained the final certificate referred to in Regulation XIII. may obtain the Degree of Bachelor of Laws by satisfying the examiners for the Higher Public Examination, in Latin, English Language and Literature, and in one of the other subjects prescribed for such examination and in the following subjects :—
  1. *Roman Law.*
  2. *Jurisprudence.*
  3. *International Law (Public and Private).*
  4. *Principles of Equity.*

Such Examinations may be passed at any time after obtaining the Final Certificate, and no attendance at Lectures or Term Examinations is required.
- XII. Students not proceeding to the Degree of Bachelor of Laws may, on complying so far as it is requisite with the Statutes and Regulations, attend the University Lectures on any of the prescribed subjects of study for that Degree, and present themselves for examination therein.
- XIII. All Students who in accordance with the Regulations pass the prescribed Examinations in the Law of Property, Constitutional Law, the Law of Contracts, the Law of Wrongs (civil and criminal), and the Law of Procedure, and fulfil all other conditions prescribed by the Statutes and Regulations, shall be entitled to receive a final certificate that they have passed in those subjects.
- XIV. A Student who shall pass in any of the subjects mentioned in Regulation XIII., shall be entitled to a Certificate to that effect.

\*XV. Schedules suggesting text-books to aid students in regard to the subjects of study and examination shall be drawn up, and students shall be required to show not merely an acquaintance with those books, but a competent knowledge of the subjects of study and examination.

XVI. The schedules shall be drawn up by the Faculty, subject to the approval of the Council, and shall be published not later than the month of January in each year.

XVII. Any student may present himself for examination at the Annual Examinations in any subject in which he has gained credit for one academical year's attendance at Lectures, and has passed at least one Term Examination in such subject; but (except as mentioned in Regulations X. and XI.) no student shall so present himself in any subject in which he has failed to gain credit for attendance at the University Lectures during so many Terms as shall constitute one academical year, or to pass at least one of such Term Examinations, unless (as to lectures)—

His attendance on lectures shall have been dispensed with by special order of the Council; or unless he is articulated to a practitioner of the Supreme Court whose office is more than ten miles distant from the University;

and unless (as to the Term Examinations)—

He was prevented from presenting himself thereat by illness or other sufficient cause to be allowed by the Faculty, subject to the approval of the Council.

The Annual Examination need not, nor need the Term Examination, be passed in the same academical year in which the Lectures have been attended, nor need the Terms constituting an academical year be all kept in one and the same year.

XVIII. No student shall in any term be credited with attendance at the University lectures in any subject unless he shall during that term have attended and gained credit for three-fourths of the lectures given in that subject, except in cases of illness or other sufficient cause to be allowed by the Council. The lectures must be attended with diligence. The Professor or Lecturer shall have the power of refusing to give credit for attendance if the student should exhibit negligence or insufficient preparation.

XIX. The names of the students passing each Annual Examination

\* Allowed 15th December, 1896.

for the Degree of Bachelor of Laws shall be arranged in three classes, in alphabetical order in each.

The names of all other students passing at an Annual Examination in any subject shall be arranged in alphabetical order in lists, which shall indicate the subjects in which each student has passed.

The Council shall transmit a copy of the above-mentioned lists to the Chief Justice or (if the Chief Justice be absent from Adelaide, or if there be no Chief Justice) to the Senior Judge of the Supreme Court.

XX. Notices by students of their intention to present themselves at an Annual Examination must reach the Registrar not more than six weeks and not less than one calendar month before the commencement of the Examination.

XXI. The undermentioned fees shall be payable in advance :

|                                                                                                                                                   |    |    |   |

## RULES OF THE SUPREME COURT.

The rules of the Supreme Court, of which copy is annexed, were issued under the Seal of the Court on the third day of June, 1890. The rules which concern Students of Law in the University are published in the Calendar for the convenience of reference :—

Whereas by an Act of the Parliament of the Province of South Australia, No. 31 of 1885-6, intituled "An Act to consolidate the several Ordinances relating to the establishment of the Supreme Court of the Province of South Australia," it is enacted that it shall be lawful for the Judges of the Supreme Court to make and practise such General Rules and Orders touching and concerning the admission of attorneys, solicitors and barristers as the circumstances of the Province may require : And whereas it has been considered expedient to consolidate and amend the General Rules and Orders made by the Judges of the Supreme Court on the third day of October, one thousand eight hundred and seventy-six, the twenty-fourth day of January, one thousand eight hundred and eighty-three, and the seventeenth day of October, one thousand eight hundred and eighty-five : Now, therefore, it is ordered as follows :—

### PART I.

1. All the said General Rules and Orders shall be, and the same are hereby, annulled from and after the coming into operation of the present Rules : Provided that this annulment shall not affect anything lawfully done or suffered, or any right or title accrued, or obligation or liability incurred, or duty or restriction imposed by or under any of the annulled Rules and Orders prior to the coming into the operation of the present Rules.

### PART II.

6. Every person must, before he enters into articles, produce to the Board a certificate of his having passed the Matriculation Examination in the University of Adelaide, or in some university recognized by the University of Adelaide, or of his having passed the preliminary or any intermediate examination which clerks articulated in England, Ireland, or Scotland, may for the time being be required to pass, and must lodge with the Board a copy of the certificate of his having so passed.

8. Every such articulated clerk and every person not actually called to the bar or admitted as mentioned in Rule 11, shall, before he applies for admission to practise in the Court, after examination, have taken, or be entitled to take, the degree of Bachelor of Laws at the University of Adelaide, or shall, at the

proper examinations of the University of Adelaide, have passed  
in—

The Law of Property,  
Constitutional Law,  
The Law of Obligations,  
The Law of Wrongs (civil and criminal), and  
The Law of Procedure :

and shall furnish to the Board the said University's final certificate of having so passed.

9. The Board may require every such clerk as is mentioned in these rules to answer, verbally or in writing under his hand, such questions touching his conduct and service during his clerkship as the Board shall think fit to propose. Every such clerk (and each practitioner, solicitor, attorney, or proctor with whom he may have served any part of his clerkship) shall, if required by the Board, and if not prevented by sufficient cause from complying with such requirement, attend the Board and give such explanations as the Board may require touching the said conduct and service.

### PART III.

11. The following persons only shall, subject to these Rules, be eligible to be admitted to practise as barristers, attorneys, solicitors, and proctors, that is to say :—

- i. Persons who have been articled to some practitioner of the Court for the full term of five years, and have served the full term of their clerkship : Provided that in the case of any person who shall before or during his service under articles have taken the degree of Bachelor of Laws or of Arts in the University of Adelaide, or in some University recognized by the University of Adelaide, service under articles, for the full term of three years, shall be sufficient.
- ii. Persons who shall have served the full term of five years as associate or assistant or acting associate to the Judges of the Court or any of them : Provided that if any such person shall, before or during service as such associate or assistant or acting associate have taken the degree of Bachelor of Laws or of Arts in the University of Adelaide, or in any University recognised by the University of Adelaide, such service for the full term of three years shall be sufficient : Provided also that such associate or assistant or acting associate shall, by

the certificate of any one of the said Judges, satisfy the Board as to his conduct and fitness to be admitted.

- III. Persons who shall have served the full term of five years, during part of such period as associate or assistant or acting associate to the Judges of the Court or any of them, and during part of such period under articles of clerkship : Provided that if any such person shall, before or during such service have taken the degree of Bachelor of Laws or Arts in the University of Adelaide or in any University recognised by the University of Adelaide, such service for the full term of three years shall be sufficient: Provided also that, without limiting the effect of Rule 9, every such person shall, by the certificate of any one of the said Judges satisfy the Board as to his conduct and fitness to be admitted.

Given under our hands and the Seal of the Supreme Court, at the Supreme Court House, at Adelaide, this third day of June, in the year of our Lord one thousand eight hundred and ninety.

EXAMINATION PAPERS,  
NOVEMBER, 1896.

FIRST YEAR.

ROMAN LAW.

MR. G. J. R. MURRAY, B.A., LL.B., AND MR. F. W. RICHARDS,  
LL.D.

Time—Three hours.

- I. Translate with short notes :—Constant autem jura Populi Romani ex legibus, plebiscitis, senatusconsultis, constitutionibus Principum, edictis eorum qui jus edicendi habent, responsis prudentium.
- II. State the chief provisions of the lex Aelia Sentia.
- III. What were the modes of acquisition of ownership derived from the jus gentium ?  
Write a full note on one of them.
- IV. Explain the nature of *pignus* and shew its position in the development of the Roman law of mortgage.
- V. Define *furtum* and point out in what respects the definition of the Institutes is defective. Compare with it the definition of larceny in the English common law.
- VI. Translate and explain—

Omnium actionum quibus inter aliquos apud iudices arbitrosve de quaque re quaeritur, summæ divisio in duo genera deducitur: aut enim in rem sunt aut in personam. Namque agit unusquisque aut cum eo qui ei obligatus est vel ex contractu vel ex maleficio, quo casu proditæ actiones in personam sunt, per quas intendit adversarium ei dare aut dare facere oportere et aliis quibusdam modis; aut cum eo agit qui nullo jure ei obligatus est, movet tamen alicui de aliqua re controversiam. Quo casu proditæ actiones in rem sunt. Veluti si rem corporalem possideat quis, quam Titius suam esse affirmet, et possessor dominum se esse dicat: nam si Titius suam esse intendat, in rem actio est.—*J. IV. vi. 1.*
- VII. Enumerate the various requisites for the validity of a will under the Roman Law of Justinian's time.
- VIII. State the principal hardships of Intestate Succession under the older law of Rome. How were they remedied by prætorian legislation?

IX. What duties did the contract of *Emptio et Venditio* impose on the vendor?

What in addition to the contract was necessary in order to pass the property in the thing sold?

X. What were the chief classes of privileges implied by the term "Civitas?" What, if any, of them were implied by the term "Latinitas?"

Account for the fact that this distinction is of little importance in the later Roman Law.

XI. Explain the following expressions—

*Beneficium divisionis, beneficium cedendarum actionum, dies cedit, justa causa, exceptio non numeratae pecuniae.*

XII. Translate and comment on—

Videamus autem et de ea successione quae nobis ex emptione bonorum competit. Bona autem veneunt aut vivorum aut mortuorum. Vivorum, velut eorum qui fraudationis causa latitant, nec absentes defenduntur; item eorum qui ex lege Julia bonis cedunt; item judicatorum post tempus, quod eis partim lege XII. tabularum, partim edicto Praetoris ad expediendam pecuniam tribuitur. Mortuorum bona veneunt velut eorum, quibus certum est neque heredes neque bonorum possessores neque ullum alium justum successorem existere.—*G.*, III. 77 & 78.

What were the advantages to the debtor of a *cessio bonorum*?

Text-books recommended :—

Introduction to the Study of Chemistry: Remsen; or  
 Elementary Chemistry: Wilson.

### *Botany.*

The general structure and physiology of a flowering plant :—

Elementary Tissues, their Constituents, Contents, and Mode of Development.

General characters and functions of the Root, Stem, Leaves, and Floral Organs.

Reproduction, Fertilization, Fruit, Seed, and Germination.

Botanical Characters of the Natural Orders :—

Ranunculaceæ, Cruciferæ, Caryophyllaceæ, Malvaceæ, Rutaceæ, Leguminosæ, Myrtaceæ, Rosaceæ, Umbelliferæ, Compositæ, Goode-  
 novia, Campanulaceæ, Epaerida, Boragineæ, Scrophulariaceæ, Labiata, Solanaceæ, Amarantaceæ, Chenopodiaceæ, Proteaceæ, Coniferae, Orchidaceæ, Amaryllidaceæ, Liliaceæ, Cyperaceæ, Gramineæ, and Filices.

### *Practical Examination.*

Candidates must be prepared to describe in technical language such plants or parts of plants as may be placed before them, and to classify specimens illustrative of any of the Natural Orders above enumerated.

Text-books recommended :—

Class Book : Balfour ; or  
Manual of Botany ; Balfour.  
Flora of South Australia : Tate ; or  
Introduction to Botany : Dendy and Lucas.

### *Elementary Physics.*

The first principles of Mechanics, Hydrostatics, Heat, Light, Sound, Electricity, and Magnetism.

## SECOND YEAR'S COURSE.

### *Anatomy.*

#### *I. Anatomy.*

This Course includes the subjects prescribed for the First Year, and in addition—

Description of the Vascular and Nervous Systems, Organs of special sense and other viscera.

Text-books recommended, the same as for the first year.

#### *II. Practical Anatomy.*

Attendance, and Text-books recommended, as in first year.

### *Physiology.*

The subject matter of Parts I., II., and III. of the Text-book of Physiology : Foster.

Text-book recommended :

Text-book of Physiology : Foster.

### *Practical Examination.*

Each candidate must be prepared (1) to make, examine and describe microscopical specimens of animal tissues and organs. (2) To prove a practical acquaintance with the chemistry of albumen and its allies, milk, the digestive juices and their actions, blood, urine, glycogen. Also to show a practical acquaintance with the most important apparatus used in studying the physiology of muscle, nerve, the circulatory and respiratory system.

Text-books recommended :

Essentials of Histology : Schäfer ; or  
Elements of Histology : Klein.  
Outlines of Practical Physiology : Stirling.  
Essentials of Chemical Physiology : Halliburton.  
Part V. of Text-book of Physiology : Foster ; should also be consulted.

### *Chemistry.*

#### *Organic Chemistry.*

Law of Substitution. Compound Radicals.

Homologous Series. Principles of Ultimate Analysis.  
Chemical History of the Cyanogen Group. Cyanogen. Hydrocyanic Acid.

Cyanic Acid and Urea. Sulphocyanic Acid. Uric Acid.  
Amylaceous and Saccharine substances.  
Fermentation. Alcohol, Wine, Beer, &c.  
Homologues of Alcohol. Ethers, simple and mixed. Oxidation of Alcohol. Aldehyde and Acetic Acid and their homologues.  
Glycol and Oxalic Acid and their homologues.  
Glycerine. Fatty and oily bodies. Saponification.  
Principle vegetable acids.  
Ammonia and its derivatives. Ammonium and ammoniacal salts.  
Chief natural organic bases.  
Chief constituents of the vegetable and animal organisms. Blood, Milk, Bile, Urine, &c. Decay. Putrefaction. Destructive distillation. Benzene, and some of its chief derivatives, especially Phenol, Salicylic Acid, Nitrobenzenes, Aniline, and allied substances.

### *Practical Chemistry.*

Qualitative analysis of mixtures containing not more than two acids and two bases, and not more than one organic acid and one organic base, the organic substances to be selected from the following list :—  
Oxalates, Acetates, Benzoates, Succinates, Tartrates, Urates. Meconates, Gallates, Tannates, Cyanides, Double Cyanides, Alcohol, Starch, Cane-sugar, Grape-sugar, Urea, Morphia, Quinine, Strychnine. Students may also be required to determine sugar or urea in urine.

Text-book recommended :—

Organic Chemistry : Remsen.

### *Materia Medica and Elementary Therapeutics.*

The substances mentioned in the British Pharmacopœia will be considered as regards their names and synonyms ; their history, and source whence obtained ; their characteristics, chemical and physical ; their adulterations and the detection of the same ; their active principles, with the poisonous doses (if any) ; their general physiological and pharmacological action ; their official preparations, with the proportionate amount of active ingredient in each ; and the use and application of the volumetric solutions.

Text-book recommended :

Pharmacology, Therapeutics and Materia Medica, Sections 3, 4, 5 and 6 :  
F. Lauder Brunton.

Books of reference recommended :

Pharmacology, Therapeutics, and Materia Medica, Sections 1 and 2 :  
F. Lauder Brunton.

Handbook of Materia Medica : Isanbad Owen.

## THIRD YEAR'S COURSE.

### *I. Anatomy.*

### *II. Practical Anatomy.*

#### *Regional and Surgical Anatomy.*

- 1) Regional Anatomy as applied to Surgery, and (2, surface Anatomy as applied to the Fine Arts.

Text-book recommended :

Manual of Surgical Applied Anatomy : Treves.

### *Physiology.*

This course includes the subjects prescribed for the second year, and in addition the subject matter of Part IV. of the Text-book of Physiology : Foster.

Text-book recommended :—

Text-book of Physiology : Foster.

### *Practical Examination.*

This course includes the subjects prescribed for the second year, and in addition each candidate will be required to show a practical acquaintance with the physiology and histology of the special senses.

Text-books recommended :—

Essentials of Histology : Schäfer ; or

Elements of Histology : Klein.

Outlines of Practical Physiology : Stirling.

Essentials of Chemical Physiology : Halliburton.

Part V. of Text-book of Physiology : Foster ; should also be consulted.

### *Therapeutics.*

General and special.

Text-book recommended :

F. Lauder Brunton.

## FOURTH YEAR'S COURSE.

### *Principles and Practice of Medicine and Therapeutics.*

Elementary General Pathology.

Elementary General Therapeutics.

Relation of Bacteria to Disease.

Specific Febrile Diseases.

Diseases of the Organs of Respiration.

Diseases of the Organs of Circulation.

Diseases of the Urinary Organs.

Diseases of the Alimentary Canal.

Diseases of the Liver and the Pancreas.

Diseases of the Peritoneum and Mesenteric Glands.

Diseases of the Thyroid ; Supra-renal Bodies ; Spleen ; Lymphatics  
Blood.

Diseases of the Organs of Locomotion

Diseases of the Nervous System.

Text-books recommended :

The Theory and Practice of Medicine : Bristowe.

The Theory and Practice of Medicine : Roberts.

The Principles and Practice of Medicine : Fagge.

### *Principles and Practice of Surgery.*

General Principles of Surgical Diagnosis.

Inflammation, Erysipelas, Pyæmia, Septicæmia, Gangrene.

Injuries of Soft Parts.

Injuries and Diseases of Bones and Joints.

Veneral Diseases.

Injuries and Diseases of the Urinary Organs.

Text-books recommended :

Practice of Surgery : Bryant, or  
Science and Art of Surgery : Erichsen, or  
Manual of Surgery ; 3 vols., Treves.

The instruction in Practical Surgery will include—

The Application of Splints, Bandages, &c.

Text-books recommended :

Manual of Minor Surgery and Bandaging : Heath, or  
Surgical Handicraft : Pye, or  
The Essentials of Bandaging : Berkeley Hill.

### *Obstetrics.*

Anatomy and Physiology of the Female Organs of Generation.

Physiology and Pathology of Pregnancy.

Natural and Difficult Labour.

Pathology and Management of the Puerperal State.

Text-books recommended :

A Manual of Midwifery : Galabin, or  
Science and Practice of Midwifery : Playfair.

### *Forensic Medicine.*

1. Medical Evidence in general, and as bearing upon cases that may form the subject of a criminal trial, civil action, or coroner's inquest.

*Note.*—In addition to the written paper there will be a practical examination, which will not however include the practical physiology or the practical chemistry incidental to this Course.

Text-books recommended :

Forensic Medicine (last edition) : Guy & Ferrier, or  
Forensic Medicine : Dixon Mann

### *Pathological Anatomy.*

1. Attendance in the dead house and *post mortem* examinations.

Text-book recommended :

Post Mortem Examinations : Virchow.

2. Microscopical demonstrations of pathological specimens.

Text-books recommended :

Manual of Pathology : Coats ; or  
Text-book of Pathology : Hamilton ;  
and elements of Surgical Pathology : Pepper.

### *Operative Surgery.*

Operations on the dead body.

Text-book recommended :

Students' Manual of Operative Surgery : Treves.

## FIFTH YEAR'S COURSE.

### *Principles and Practice of Medicine.*

For synopsis see Fourth Year's Course.

### *Principles and Practice of Surgery.*

The subjects of the Third Year and in addition—

The Constitutional Effects of Injury.  
Diseases and Injuries of Bloodvessels.  
Diseases and Injuries of Lymphatics.  
Diseases and Injuries of Nerves.  
Diseases and Injuries of Muscles and Synovial Membranes.  
Hernia.  
Tumours.  
Deformities.  
Injuries and Diseases of Special Regions.

Text-books recommended, the same as for the Third Year.

### *Diseases Peculiar to Women.*

Diseases of the Female Organs of Generation.

Text-books recommended :

The Student's Guide to the Diseases of Women : Galabin, or  
A Manual of Gynæcology ; Hart and Barbour.

### *Ophthalmic Surgery.*

Injuries of the Eye and its appendages.  
Diseases of the Eyelids, Conjunctiva, and Lachrymal apparatus.  
Diseases of the Eyeball including Glaucoma, Amblyopia, and functional Disorders of Vision.  
Refraction.  
Affections of the Ocular Muscles.  
Colour Vision and its defects.

Text-book recommended :

A handbook of the Diseases of the Eye and their Treatment: Henry Swanzy (4th edition).

### *Aural Surgery.*

Anatomy and Physiology of the Ear shortly considered.  
Injuries and diseases of the auricle.  
Diseases of External Auditory Canal, including foreign bodies in the Ear.  
Diseases of the Membrana Tympani and Tympanum and their consequences.  
Diseases of Naso-Pharynx and Eustachian Tube.  
Diseases of the Inner Ear.

Text-book recommended :

A guide to the Study of Ear-Disease: P. McBride (W. & A. K. Johnston, Edinburgh).

The following work may also be consulted :

Text-book of Diseases of the Ear: Politzer.

## Lunacy.

The Physiology of Mind and its relations to Mental Disease.  
Insanity, its diagnosis, varieties, causes, treatment, pathology, and the procedure for placing persons of unsound mind under care and treatment.

Text-book recommended :

Clinical Lectures on Mental diseases : Clouston.

## Elements of Hygiene.

*Habitations.*—Drainage of houses, removal of excreta. *Food.*—General principles of diet; quality, choice, quantity, and adulteration of food. *Water.*—Quantity and supply. Examination of for hygienic purposes, contaminations, purification of. *Air.*—Examination of—impurities of—Ventilation. *Soil.*—Examination of—conditions affecting health.

Causes and prevention of specific diseases, disinfection and deodorization, vital statistics, climate, micro-organisms.

The Health, Quarantine, and Vaccination Acts and Regulations in force in South Australia.

A part of the Examination will be Practical.

Text-books recommended :

Hygiene and Public Health : Louis C. Parkes.

Hygiene and Public Health : Whitelegge.

The following works may also be consulted :—

Practical Hygiene : Parkes.

Hygiene and Public Health : Buck.

Vital Statistics : Newsholmes.

## RULES FOR THE ADMISSION OF MEDICAL STUDENTS TO THE PRACTICE OF THE ADELAIDE HOSPITAL.

The rules for the admission of students to the practice of the Adelaide Hospital, of which copy is annexed, are published in the Calendar for convenience of reference :—

- A—I. That medical students of the University of Adelaide be admitted as pupils to the practice of the Hospital under the conditions hereinafter mentioned.
- II. Pupils may attend, according to the subject for which they have entered, the practice of the Hospital between the hours of 8.30 a.m. and 4 p.m. (including attendance on the morning visits of the Resident Medical Officer) ; at no other time will the pupils be allowed in the Wards except by special permission of some Physician or Surgeon.
- III. No medical or surgical pupil shall publish the report of any case without the written permission of the Physician or the Surgeon under whose care the patient has been.
- IV. No pupil may introduce visitors into the Hospital without permission from some member of the Honorary Staff or from one of the Resident Medical Officers.
- V. Pupils entering for dispensary practice shall be under the immediate control of the Dispenser, and, in his absence, of the Assistant Dispenser, who shall be answerable to the Board for their good conduct.
- VI. Every pupil shall conduct himself with propriety, and discharge with zeal and assiduity the duties assigned to him, and pay for or replace any article and make good any loss sustained by his negligence.
- VII. If any pupil infringe any rule of the Hospital, or otherwise misconduct himself, he shall be subject to dismissal by the Board, and shall, on dismissal, forfeit all payments which he may have made, and all rights accruing therefrom.
- VIII. The members of the Honorary Staff of Physicians and Surgeons will give clinical instruction on the following terms, viz.—
- For the medical practice of the Hospital, for each pupil  
£5 5s. per annum.
- For the surgical practice of the Hospital, for each pupil,  
£5 5s. per annum.
- (These fees to include the appointment of Clinical Clerk and Dresser).

For each six months' instruction in the Post Mortem Room, £2 2s.

For three months' instruction by the Dispenser in Practical Pharmacy, £2 2s.

A fee of £1 1s. shall be paid for the use of the Medical Library, and no books shall be removed from the Hospital without special permission of the Board.

Each student commencing attendance on the clinical practice of the Hospital shall be required to pay an entrance fee of £5 5s. All fees to be paid to the Secretary of the Hospital.

- IX. Every Physician shall have one or more Clinical Clerks, and every Surgeon shall have one or more Dressers, and all such Clerks and Dressers shall be appointed by the Board on the recommendation of the Honorary Staff of the Hospital.
- X. Subject to these rules, every Clinical Clerk and every Dresser shall hold office for six months, but shall, in the absence of another candidate, be eligible for re-appointment.
- XI. Every Clinical Clerk and every Dresser shall always accompany in his visits to the Wards the Physician or the Surgeon to whom he is attached.
- XII. The Clinical Clerk and Dresser of the receiving Physician or Surgeon shall, except when he is required to attend lectures at the University, be in attendance each day during the receiving week of such Physician and Surgeon.
- XIII. Every Clinical Clerk and every Dresser shall attend daily to assist the Resident Medical Officers in their duties.
- XIV. The following shall be the duties of Clinical Clerks and of Dressers :—They shall, under the supervision of the Resident Medical Staff, take a correct history of each case on the day of admission or as soon after as possible, and enter the same in the Case Book ; they shall keep a correct report of each case and of the treatment thereof and of its results until the patient's discharge or death, and enter it from day to day in their Case Book.
- XV. No student shall visit any patient in the Ovariectomy Cottage, or any case that has undergone a major operation, or any case of acute illness, without permission of the Physician or Surgeon.
- XVI. No student shall attend the practice of the Surgical Wards during the period that he is himself performing post mortem examinations.

- XVII. No Clinical Clerk or Dresser shall be excused for absenting himself at the appointed hour of attendance in the morning, unless he receive permission to do so from the Physician or Surgeon to whom he is attached.
- XVIII. Certificates to Clinical Clerks and Dressers shall be signed by their respective Physicians and Surgeons, and afterwards by the Chairman of the Board.
- B—I. The foregoing rules shall apply to all students unconnected with the University of Adelaide who may wish to be admitted as pupils to the practice of the Adelaide Hospital.
- II. That all pupils be subject to such other rules and regulations as may be adopted from time to time by the Board of Management.

April 15th, 1887.

---

## RULES FOR THE ADMISSION OF MEDICAL STUDENTS TO THE PRACTICE OF THE ADELAIDE CHILDREN'S HOSPITAL.

Medical students are admitted as pupils to the practice of the Adelaide Children's Hospital under the conditions hereinafter mentioned, and subject to any fresh rules that the Board of Management may make from time to time :—

- I. Students may attend the practice of the Adelaide Children's Hospital, between the hours of 8.30 a.m. and 12 noon, and at other times if they have obtained the permission of one of the Visiting or Resident Medical Officers.
- II. No student may publish the report of any case without the authority of the Visiting Medical Officer under whose care the patient has been.
- III. No student may introduce visitors into the Hospital without the permission of the Resident Medical Officer, or in his or her absence of the Superintendent of Nurses.
- IV. The fees to be paid are as follow :—

|                         |     |    |   |   |
|-------------------------|-----|----|---|---|
| In three months' course | ... | £1 | 1 | 0 |
| In perpetual attendance | ... | 2  | 2 | 0 |

(The fees are to be paid to the Secretary of the Hospital.)

N.B.—Until otherwise ordered the Board of Management allows all such fees to be devoted to the purchase of appliances and books for the teaching of the students.

- V. Certificates of attendance signed by the Resident Medical Officer are issued after approval of the Medical Committee of the Board of Management.

EXAMINATION PAPERS,  
NOVEMBER, 1896.

---

FIRST YEAR.

---

ANATOMY.

PROFESSOR WATSON, M.D., F.R.C.S.

Time—Three hours.

- I. Write a description of the vertebral column.
- II. Describe the cerebral aspect of the base of the skull.
- III. Enumerate in their relative position the bones and ligaments of the foot and ankle.
- IV. Sketch the anatomical relations of the Rectus Abdominis muscle.
- V. Give an account of the muscoli interossei and muscoli lumbricales, comparing those of the foot with those of the hand.
- VI. Write a classification of the joints, and give examples of each.

---

PRACTICAL ANATOMY.

PROFESSOR WATSON, M.D., F.R.C.S.

A *viva voce* and Practical Examination was held in the Dissecting Room.

---

BIOLOGY.

E. C. STIRLING, M.D., F.R.S., and R. H. PERKS, M.D., F.R.C.S.

Time—Three hours.

- I. Write what you know concerning the reproductive processes in Vorticella and Hydra.
- II. Define and explain the terms holozoic, holophytic and saprophytic as applied to the nutrition of organisms. Mention examples of each form from the types you have studied during the year's course.

- III. Draw a diagram representing the relation of the parts cut through in a transverse section of the frog at the level of the kidneys.
  - IV. Trace, from its origin, the growth of the structure known as a broad bean.
  - V. Explain what is meant by alternation of generations as illustrated by the growth of the prothallus of the fern.
- Candidates, for the B.S.c. Degree, who wish to pass with credit must substitute the following questions for any two of the above, but no credit will be given unless the answers reach a certain standard.*
- VI. Write what you know concerning recent investigations into the minute structure of cells.
  - VII. Write a short essay on Organic Evolution, and the means whereby it is brought about.

---

### PRACTICAL BIOLOGY.

E. C. STIRLING, M.D., F.R.S., and R. H. PERKS, M.D., F.R.C.S.

Time—Three hours.

- I. Identify the specimens *A*, *B*, *C*, &c.
- II. Dissect out the nervous system of the mussel.
- III. Determine by the microscope the nature of the materials *X*, *Y*, *Z*, and, in each case, state a reason for your answer.

---

### INORGANIC CHEMISTRY.

PROFESSOR RENNIE, M.A., D.Sc.

Time—Three hours.

*(Candidates are expected to write formulae and equations wherever possible.)*

- I. What volume of sulphur dioxide (measured at standard temperature and pressure) would yield sufficient sulphuric acid to completely decompose one gramme of nitrate of lead? What weight of sulphate of lead would be formed?
- II. Describe Deacon's process for the manufacture of chlorine, explaining the reactions involved. Explain the reactions which take place (*a*) when a solution of chlorine in water is exposed to sunlight; (*b*) when chlorine is passed into solutions of caustic potash, potassium bromide, and ferrous sulphate respectively.

III. How would you prepare a pure solution of ammonia? Comment on the nature of the solution and point out some respects in which it differs from solutions of caustic potash and caustic soda. How would you propose to detect the presence of ammonia in drinking water?

IV. Write methods of preparation for anhydrous and diluted hydrocyanic acid respectively, and describe a test for detecting its presence.

A solution of potassium cyanide dissolves chloride of silver and metallic gold: explain the changes in each case.

V. Write an account of three methods for the preparation of sulphuretted hydrogen and describe the reactions which take place when (a) it is mixed with chlorine; (b) when it is passed over heated iron; (c) when it is passed into a solution of ferric chloride; (d) when it is passed into alkaline and acid solutions respectively of nickel sulphate.

VI. What reactions take place when concentrated sulphuric acid is heated with carbon, sulphur, and mercury respectively? Give an account of the properties of the principal gaseous product.

How is sodium thiosulphate prepared, what is the action of acids upon it, and what is its action (in solution) upon silver chloride.

VII. How would you prepare—

- (a) A solution of sodium hypophosphite.
- (b) A solution of potassium arsenite starting from arsenical iron pyrites.
- (c) Potassium bromide.
- (d) Silver nitrate from a silver coin.
- (e) Magnesium sulphate from dolomite.
- (f) Bismuth subnitrate.
- (g) Mercuric iodide from cinnabar.
- (h) Zinc sulphate from zinc blende.

---

## PRACTICAL CHEMISTRY.

PROFESSOR RENNIE, M A., D.Sc.

Time—Four hours.

I. Analyse qualitatively the substances placed before you.

*N.B.*—There were five substances each containing not more than one acid and one base.

MORPHOLOGICAL AND SYSTEMATIC.  
**BOTANY.**

W. L. CLELAND, M.B.

Time—Three hours.

- I. Describe four modifications of the scale-leaf region of the stem.
- II. Describe the plant I. as regards the arrangement and insertion of leaves, the inflorescence, the calyx, the corolla, the androecium, and the gynoecium.
- III. Refer to their botanical division, sub-class and natural order the flowers II to V.
- IV. Describe the fruits VI. to IX, as regards their apocarpous or syncarpous arrangement, their superior or inferior character, and give the botanical name of the fruit.
- V. How would you distinguish a seed from a seed-like fruit?
- VI. What do you understand by the term *cross-pollination*?  
By what agencies is it generally brought about?

---

**ELEMENTS OF HEAT, ELECTRICITY, AND  
MAGNETISM.**

The same papers as set for Physics for the First year of the B.A. degree.

---

**SECOND YEAR.**

**ANATOMY.**

PROFESSOR ALLEN, M.A., M.D., B.S.

Time—Three hours.

- I. Describe the steps of a dissection of the orbit, giving in their order the structures met with, and their relations, but not describing any structure in detail.  
The brain is supposed to have been removed.  
The dissection does not include that of the globe of the eye, nor the lids, nor the lachrymal apparatus other than the gland. (24).
- II. Describe a transverse section of the spinal cord about the middle of the neck. (20).

- III. Describe the topographical anatomy of the heart in relation to the anterior wall of the chest. (12).
- IV. Describe the urinary bladder of the male, with its relations, blood-vessels and nerves, excluding microscopic anatomy. (20).
- V. Describe the posterior interosseous nerve. (12).
- VI. Describe the arteries of the sole of the foot. (12).

---

## PRACTICAL ANATOMY.

PROFESSOR WATSON, M.D., F.R.C.S.

A *vivâ voce* and Practical Examination was held in the Dissecting Room.

---

## PHYSIOLOGY.

E. C. STIRLING, M.D., F.R.S., AND E. TEICHELHANN, F.R.C.S.

Time—Three hours.

*Five questions only are to be attempted.*

- I. Adduce reasons for regarding the heart beat as not originating from nervous impulses. By what nervous paths, and in what manner is the heart susceptible of influences through the nervous system?
- II. Describe the changes of pressure which occur within the thoracic cavity during quiet breathing, and explain the effects, produced by these changes, on the arterial blood pressure.
- III. Discuss the origin of urea in the body. About how much is secreted in twenty-four hours, and what are the principal causes of variation in the output of this substance?
- IV. Describe [the structure of the pancreas, and the changes that take place in this organ during its physiological activity.
- V. What physical changes does the fat of the food undergo in the processes of digestion and absorption? What evidence is there that fat may be formed from other components of the food than fatty substances?
- VI. Describe the changes, structural and functional, which take place in a muscle and its motor nerve when severed from the central nervous system.

## PRACTICAL PHYSIOLOGY.

E. C. STIRLING, M.D., F.R.S., and E. TEICHELHANN, F.R.C.S.

Time—Three hours.

- I. Identify the specimens, *A*, *B*, *C*, &c.
- II. Describe the construction of the instrument allotted to you, and state the nature and objects of the experiments for which it may be used. Draw a diagram showing the arrangement of the apparatus in which you have seen this instrument used.
- III. Make preparations from the recently killed frog of medullated nerve, which shall show the axis cylinder, the medullary sheath, and the nodes of Ranvier.

---

## ORGANIC CHEMISTRY.

PROFESSOR MASSON, D.Sc., AND PROFESSOR RENNIE, M.A., D.Sc.

Time—Three hours.

- I. Describe the preparation of chloroform, explaining the reactions that occur in the process.  
How would you test for small quantities of chloroform in an alcoholic solution?
- II. Describe the preparation, properties, and reactions of formaldehyde.
- III. "The analysis of the substance pointed to the formula  $C_3H_6O_4$ . Further investigations led to the formula being written  $C_2H_3(OH)_2CO_2H$ ." What inference should you draw as to the probable methods employed and results obtained in the study of the substance?
- IV. Give some account of the preparation and properties of uric acid, and explain the facts which have led to the constitution assigned to it.
- V. Explain fully the following statements :—  
"The relation of a sulphonic acid to sulphuric acid is like that of acetic acid to carbonic acid, and its relation to sulphurous acid is like that of acetic acid to formic acid."
- VI. How may the homologues of benzene be obtained from benzene itself? And how may benzene be prepared from its homologues?

- VII. Describe the preparation and chief reactions of diazobenzene nitrate.
- VIII. Explain the statement—"It has been shown that several of the alkaloids are related to pyridine and quinoline."
- 

## PRACTICAL CHEMISTRY.

PROFESSOR RENNIE. M.A., D.Sc.

Time—Three hours.

- I. Analyse qualitatively the substances placed before you. There were two substances each containing not more than two acids and two bases, and not more than one organic acid and one organic base.
- 

## THIRD YEAR.

---

### PHYSIOLOGY.

C. J. MARTIN, M.B., D.Sc.

Time—Three hours.

*Five questions only are to be attempted.*

- I. Give an account of the paths of absorption, and the immediate destination, of the different kinds of food-stuffs absorbed. State the experimental evidence on which your conclusions are based.
- II. Describe, *with diagrams*, the minute structure of the spleen.
- III. Within what limits does the temperature of the human body vary in health? Give an account of the physiological mechanisms by means of which the temperature is maintained within such limits.
- IV. Write a short account of the lymphatic circulation under the following heads :—
  - (a) The general arrangement of the lymphatic system ;
  - (b) The structure of lymphatics and lymph glands ;
  - (c) The forces by which the circulation of lymph is brought about ;
  - (d) The nature of lymph.

- V. Describe shortly the nervous mechanism of respiration. What results are produced upon the respiratory movements of a rabbit by
- (1) Section of one vagus ;
  - (2) Section of both vagi ;
  - (3) Stimulation of the central end of a vagus ;
  - (4) Stimulation of the central end of the superior laryngeal ?
- VI. Describe the course of the fibres constituting the Internal Capsule. By what means have their destinations been ascertained ?
- 

## PRACTICAL PHYSIOLOGY.

E. C. STIRLING, M.D., F.R.S., and E. TEICHELHANN, F.R.C.S.

Time—Three hours.

- I. Identify the specimens 1, 2, 3, &c.
  - II. Mount the specimens *X*, *Y*, *Z* ; name them and draw diagrams of a characteristic part.
  - III. Arrange the apparatus for the purpose of showing the resolution of the curve of tetanus.
  - IV. Demonstrate to the examiner the spectra of Oxy-hæmoglobin, reduced Hæmoglobin and Carbonic Oxide Hæmoglobin.
- 

## PRINCIPLES AND PRACTICE OF MEDICINE.

The same paper as set for the Fourth year.

---

## PRINCIPLES AND PRACTICE OF SURGERY.

The same paper as set for the Fourth year.

---

## PATHOLOGY.

PROFESSOR WATSON, M.D., F.R.C.S.

Time—Three hours.

- I. Write a short essay on new-formation of connective tissue, whether dependent on inflammation or not.

- II. Sketch your views on the nature and mode of production of suppuration.
- III. Discuss the etiology and pathology of hydatid disease.
- IV. Describe the lesions of structure which affect the arteries (exclusive of aneurism), and explain the influence of those changes upon the circulation.
- V. Discuss the morbid conditions met with in the abdominal and pelvic viscera as a result of tuberculosis.

*N.B.—It is not expected that all the questions will be answered.*

## MATERIA MEDICA.

W. L. CLELAND, M.B.

Time—Three hours.

- I. What is the root I. ? Describe its physiological action.
- II. What are the seeds II. ? Name the officinal preparations.
- III. What are the leaves III. ? What compound powder contains them ?
- IV. What do you understand by *bromism* ?
- V. What salt of *potassium* would you specially select for its action on the urinary secretion ? State whether it has a direct or indirect alkaline action, or both.
- VI. Contrast the astringent action of *nitrate of silver* and *tannic acid*.
- VII. What preparations contain metallic mercury ? What symptoms in your patient would warn you to discontinue the administration of the drug ?
- VIII. Of what drug is *atropine* the active principle ? What is its physiological action when applied locally (*a*) to the conjunctiva, and (*b*) the surface of the skin ; and taken internally on (*a*) the intestinal canal, (*b*) the respiratory centre, (*c*) the bronchial mucus membrane, and (*d*) glandular secretions generally ?
- IX. What drug does *chloral hydrate* antagonise, and in what particular direction ?
- X. What is the action of *antipyrin* on the temperature of the body (*a*) in health, and (*b*) in disease ? Can you give any explanation of its antipyretic action ?
- XI. Supposing it was necessary to produce vesication, what diseased condition would cause you to select some other agent than cantharides ? What would you substitute ?

## PUBLIC EXAMINATIONS.

- I. Junior and Senior Public Examinations will be held annually. No candidate will be admitted to either unless he shall have passed the Preliminary examination as hereafter specified, but this examination may be passed at any time.
- II. Both male and female candidates shall be eligible for examination, and the Regulations shall be read accordingly.
- III. One or more Boards of Examiners shall be annually appointed by the Council. Each Board shall elect its own Chairman, who shall be responsible for the management of the examination and for the correctness of the class-lists.
- IV. All papers proposed to be set shall be approved by the Board of Examiners before being printed.
- V. After each examination the Registrar shall be supplied by the Board with a list showing in what subjects each candidate has passed or failed, and such list shall be certified by the Chairman of the Board.

---

### *Local Examinations.*

- I. The Junior and Senior Public Examinations, as well as the Preliminary Examination, may be held in other places than the City of Adelaide.
- II. Such local examinations shall be held only under the supervision of persons appointed by the Council.
- III. No such examination shall be held unless a sum sufficient to meet all expenses, including the Statutory Fees, be lodged with the Registrar on or before the 31st day of October.

# PRELIMINARY EXAMINATION.

## REGULATIONS.

\* I. Every candidate must satisfy the Examiners in each of the following subjects :—

- (1) Dictation.
- (2) An elementary knowledge of the English Language.
- (3) English Composition.
- (4) Arithmetic.

II. Examinations will be held twice in the year. They will begin on the second day of the first and third terms respectively.

III. On or before the 21st day of February or August candidates must give notice of their intention to present themselves, and such notice shall be in the following form :—

To the Registrar of the  
University of Adelaide.

I hereby give notice that I intend to present myself at  
the next Preliminary Examination.

Name of Candidate in full.....  
Address .....  
Date of Birth .....  
Last Place of Education .....  
Signature of Candidate .....  
Date.....

IV. A fee of 10s. 6d. shall be paid by each candidate at the time of giving notice to attend. In no case will the fee be returned ; but if, not less than seven days before the examination, a candidate shall notify to the Registrar his intention to withdraw, the fee shall stand to his credit for a future examination.

V. Any candidate who may fail to give notice by the prescribed date may be permitted by the Council to attend on payment of an extra fee of 10s. 6d.

VI. A list of successful candidates, arranged in alphabetical order, will be posted at the University.

†VII. Schedules defining as far as may be necessary the range of questions to be set shall be published not less than twelve months before the date of the examination to which they are intended to apply.

The Regulations referring to the Preliminary Examination allowed on the 18th January, 1888, and on the 12th December, 1888, are hereby repealed.

\* Allowed 13th November, 1890.

† Allowed 15th December 1896.

NOTE.—In case of Examinations held in other places than Adelaide an officer shall be sent by the University to conduct such examinations in reading and dictation, the expenses of such officer to be borne by the local candidates.

## DICTATION.

Many persons are very sensible of the effects of fine poetry upon their feelings, who do not well know how to refer these feelings to their causes: and it is always a delightful thing to be made to see clearly the sources from which our delight has proceeded, and to trace the mingled stream that has flowed upon our hearts, to the remoter fountains from which it has been gathered; and when this is done with warmth as well as precision, and embodied in an eloquent description of the beauty which is explained, it forms one of the most attractive, and not the least instructive, of literary exercises. In all works of merit, however, and especially

in all works of original genius, there are a thousand retiring and less obtrusive graces, which escape hasty and superficial observers, and only give out their beauties to fond and patient contemplation; a thousand slight and harmonizing touches, the merit and the effect of which are equally imperceptible to vulgar eyes.

*Candidates are also asked to spell the word in italics in each of the following sentences :—*

I am in *receipt* of your letter.

The two lines are *parallel*.

*Discipline* is essential in a good school.

I am in *possession* of an estate.

That peach was simply *delicious*.

We took so much luggage that we found it a *nuisance*.

The diamond shone with great *brilliancy*.

A *diligent* student is sure to succeed.

He shows every *symptom* of the disease.

The *mechanism* of a watch is simple.

- Geometry*.—The substance of Euclid Books I. and II., with Exercises.
- Algebra*.—To simple Equations (inclusive).
  - \* Questions will also be set in the substance of Euclid Books III. and IV., with Exercises, and in Algebra to Quadratic Equations and Surds (both inclusive).

\* Candidates for a Pass only need not attempt these.

PHYSICAL AND NATURAL SCIENCE.

- (a) *Elementary Physics*.  
The Elementary Laws of Mechanics, Hydrostatics, Light, Heat, Sound, Electricity, and Magnetism.  
Text Book recommended—Wright's Text Book of Physics; the very elementary portions only.

NOTE.—Candidates should work a few simple experiments, such as may be found in Worthington's First Course of Laboratory Practice, or Gregory's Elementary Practical Physics (Macmillan).

- (b) *Elementary Chemistry*.—  
The elementary Chemistry of the acid-forming elements, based upon Remsen's Elements of Chemistry (a Text Book for beginners), pages 1-154.
- (c) *Elementary Botany and Physiology*.—  
*Botany*. The questions will be confined to the general structure of the flowering plant, with especial reference to the following illustrative plants:—*Sweetwilliam, Wallflower, Castor-oil Tree, Pea, Gumtree, Sow-thistle, Snapdragon, Lily, and Wild-oat.*

Candidates will be required to describe in technical language the organs of fresh plants, and to fill up "Schedules." (See Oliver's Lessons in Elementary Botany). Candidates should provide themselves with forceps and magnifying glass.

*Physiology.*

Text Book recommended—Foster's Primer of Physiology.

Candidates are recommended also to consult Elementary Physiology (Foster & Shore), and will be required to show a practical acquaintance with the position, appearance, and general structure of the principal organs of the body.

# EXAMINATION PAPERS, 1896.

## ENGLISH HISTORY.

THE BOARD OF EXAMINERS.

Time—One hour and a half.

*(Only six questions are to be attempted.)*

- I. Give an account of the reign of Alfred.
- II. State the circumstances in which Magna Charta was drawn-up and signed, and mention some of its provisions.
- III. State what you know about : Earl Godwin, Earl of Warwick, Sir Thomas More, Earl of Chatham.
- IV. Name some of the most famous men in the time of Elizabeth, and write a short note on each.
- V. Give, with dates, an account of the battles of Evesham, Agincourt, Bosworth, Marston Moor, Trafalgar.
- VI. What do you know of the history of parliament under Charles I. and Cromwell?
- VII. Write notes on the following :—Danegeld, Tonnage and Poundage, National Debt, Domesday Book, Dissolution of the Monasteries.
- VIII. Name some famous archbishops of Canterbury, and state what you know about three of them.
- IX. Give some account of the Solemn League and Covenant, Test Act, Act of Union between England and Scotland, Reform Act of 1832.
- X. Name some of the prime ministers of this century, and say what you know of their policy.
- XI. Give an account of the social condition of England at any period before 1800.
- XII. State about what time the following writers lived (*e.g.*, in whose reigns) :—Chaucer, Spenser, Milton, Dryden, Defoe, Pope, Swift, Goldsmith, Burns, Wordsworth. Name one important work of each of these writers.

## ENGLISH LITERATURE.

Time—Two hours.

- I. Write an essay on *The Deserted Village* to show how you appreciate (1) its descriptions of nature, (2) its descriptions of men, and (3) its theory about luxury.

[*This essay should occupy you for an hour.*]

- II. Quote twelve lines beginning from each of any two of the following :—

As some lone miser visiting his store.  
But small the bliss that sense alone bestows.  
Gay sprightly land of mirth and social ease.  
There all around the gentlest breezes stray.  
Ill fares the land, to hastening ills a prey.  
Sweet was the sound, when oft at evening's close.  
A man he was to all the country dear.  
A man severe he was and stern to view.

- III. What places are referred to in the first two of the following lines? Explain fully what you understand by the others :—

- (a) Man seems the only growth that dwindles here.  
(b) Where the broad ocean leans against the land.  
(c) And e'en his failings leaned to Virtue's side.  
(d) Still to ourselves in every place consigned,  
Our own felicity we make or find.  
(e) The robe that wraps his limbs in silken sloth  
Has robbed the neighbouring fields of half their  
growth.

- IV. Explain in detail the meaning of the following passage :—

And thou, fair Freedom, taught alike to feel  
The rabble's rage and tyrant's angry steel ;  
Thou transitory flower, alike undone  
By proud contempt or favour's fostering sun,  
Still may thy blooms the vengeful clime endure  
I only would repress them to secure :  
For just experience tells, in every soil,  
That those that think must govern those that toil ;  
And all that Freedom's highest aims can reach  
Is but to lay proportion'd loads on each.  
Hence, should one order disproportioned grow,  
Its double weight must ruin all below.

## GEOGRAPHY.

Time—Two hours.

- I. Draw a map of the River Murray and its principal tributaries. Name its South Australian tributaries.
- II. Name the minerals found in South Australia, and state where they occur.
- III. Enumerate the British possessions in America, and write a brief account of *one* of them.
- IV. What formation and conditions are necessary for an Artesian Spring? Where do these occur in Australia, and whence do they obtain their water supply?
- V. What are icebergs? How and where are they formed, and what office do they perform?
- VI. Where are the following places—Delhi, Odessa, Lima, New Orleans, Dongola, Singapore, St. Helena?  
Describe two of the above.

## LATIN GRAMMAR.

Time—One hour.

- I. Give the meaning, gender, accusative and ablative singular, and genitive plural of *caespes*, *calcar*, *domus*, *faenus*, *femur*, *nubes*, *ordo*, *uis*.
- II. State clearly the rules for the formation of the genitive plural of the 3rd declension, giving examples and taking notice of exceptions.
- III. Give the nominative fem. and neut. in both numbers, the gen. and abl. singular masc., and the meaning of *aliquot*, *acer*, *quisquam*, *quisque*, *quiuvis*, *uigil*, *uterque*.
- IV. Give the 1st person perf. active, the supine, the infinitive, and the meaning of *allicio*, *cado*, *censeo*, *consulo*, *crepo*, *fulcio*, *misceo*, *rado*, *scindo*, *scisco*, and *sterno*, and mark the quantity of each syllable in every form given.
- V. Give rules for the construction of *dum*, and *opus est*, and for the sequence of tenses, illustrating in each case by examples.
- VI. Explain clearly, with examples, *apodosis*, *chiasmus*, *cognate accusative*, *hortative subjunctive*, *inceptive verb*, *objective genitive*.

## LATIN COMPOSITION AND TRANSLATION.

Time—Two hours.

Translate into Latin—

1. The general sent a small detachment of cavalry in advance, to cut off the enemy's supplies.
2. It seems that their army might have conquered the Romans.
3. They said they were afraid that they would not be able to come back before midnight.
4. The doctor maintained that he said nothing of the kind.
5. The boy was unwilling to go home because he knew that his father would be very angry with him.
6. Were you able to hear the remarks he was making?
7. When Caesar reached the camp he gave immediate orders for an attack on the Gauls.
8. He said he would not prevent them from going to Rome.
9. Do you really believe that what he said is true?
10. After killing three thousand of the enemy, they marched sixteen miles in order to take the city before relief came.
11. You ought not to have done that.
12. Surely you don't expect to satisfy the judges, when you write Latin so badly?

(i.) CHARLES XII. AT BENDER.

Dans ce loisir de Bender, qui fut plus long qu'il ne pensait, il prit insensiblement du goût pour la lecture. Le baron Fabrice, gentilhomme du duc de Holstein, jeune homme aimable, qui avait dans l'esprit cette gaieté et ce tour aisé qui plaît aux princes, fut celui qui l'engagea à lire. Il était envoyé auprès de lui à Bender pour y ménager les intérêts du jeune duc de Holstein, et il y réussit en se rendant agréable. Il avait lu tous les bons auteurs français. Il fit lire au roi les tragédies de Pierre Corneille, celles de Racine, et les ouvrages de Boileau. Le roi ne prit nul goût aux satires de ce dernier, mais il aimait fort ses autres écrits. De toutes les tragédies françaises, Mithridate était celle qui lui plaisait davantage, parce que la situation de ce roi vaincu et respirant la vengeance, était conforme à la

sienne. Il montrait avec le doigt à M. Fabrice les endroits qui le frappaient ; mais il n'en voulait lire aucun tout haut, ni hasarder jamais un mot en français.

—VOLTAIRE.

(ii.) Marche deux heures tous les jours, dors sept heures toutes les nuits ; couche-toi dès que tu as envie de dormir ; lève-toi dès que tu t'éveilles ; travaille dès que tu es levé. Ne mange qu'à ta faim, ne bois qu'à ta soif, et toujours lentement. Ne parle que lorsqu'il est nécessaire ; n'écris que ce que tu peux signer, ne fais que ce que tu peux dire. N'oublie jamais que les autres compteront sur toi, et que tu ne dois pas compter sur eux. N'estime l'argent ni plus ni moins qu'il ne vaut ; c'est un bon serviteur et un mauvais maître. Pardonne d'avance à tout le monde, pour plus de sûreté ; ne méprise pas les hommes, ne les hais pas davantage et ne ris pas d'eux outre mesure ; plains-les. Songe à la mort, tous les matins en revoyant la lumière, et tous les soirs en rentrant dans l'ombre. Quand tu souffriras beaucoup, regarde ta douleur en face ; elle te consolera d'elle-même et t'apprendra quelque chose.

(i.) Daguessean was born in sixteen hundred and sixty-eight at Limoges in France. He was very learned and a great orator. He wrote many books. He died at the age of eighty-three, in the year seventeen hundred and fifty-one. . . . He used to dine at twelve o'clock. But his wife always made him wait five or ten minutes in the dining-room. He put some books and his writing materials (*de quoi écrire*) into the dining-room, and wrote every day whilst waiting for his dinner. He thus used the minutes which he would have lost before dinner, and in ten years he wrote one of his most beautiful books.

  1. Give me two pairs of gloves : one brown pair and one white.
  2. Where are the books I lent you ? I don't know.
  3. Do you know my younger brother who has just begun to come to school ?
  4. I have not been able to write you a long letter for I have had to work very hard.
  5. We should try to make as few mistakes as we can.
  6. After breakfast we read the newspapers, and then went for a walk through the streets.
  7. I went into a few shops and bought two bottles of red wine, three pounds of tea, and some bread.
  8. We had them sent home, and returned on foot by the same streets as we had come.
- II. Translate into English—
  1. Der Bauer steht vor seinem Feld  
Und zieht die Stirne kraus in Falten :

„Ich hab' den Acker wohl bestellt  
Auf reine Aussaat streng gehalten;  
Nun seh' mir eins das Unkraut an,  
Das hat der böje Feind gethan.“

Da kommt sein Knabe hoch beglückt,  
Mit bunten Blumen reich beladen,  
Im Felde hat er sie gepflückt,  
Kornblumen sind es, Mohn und Raben.  
Er jauchzt: „Sieh, Vater, nur die Pracht!  
Die hat der liebe Gott gemacht.“

2. **Adelheid.** Wenn Ihnen das Frühstück nicht unangenehm war, so wollen wir für ein zweites sorgen.

**Schm od.** Doch bitte, bemühen Sie sich meinewegen nicht.

**Adelheid.** Können wir Ihnen sonst mit etwas helfen?

**Schm od.** Womit sollen Sie mir helfen? Ich habe jetzt alles im Stande. Mein Unglück ist nur, ich sieße in einem schlechten Geschäft. Ich muß sehen, daß ich aus der Litteratur herauskomme.

**Adelheid (mitleidig).** Es ist wohl recht schwer, sich in der Litteratur wohl zu fühlen?

**Schm od.** Je nachdem. — Mein Redakteur ist ein unge rechter Mensch. Er streicht zu viel und bezahlt zu wenig. Achten Sie vor allem auf Ihren Stil, sagt er, guter Stil ist die Hauptsache. Schreiben Sie gewichtig, Schm od, sagt er, schreiben Sie tief, man verlangt das heutzutage von einer Zeitung, daß sie tief ist. Gut, ich schreibe tief, ich mache meinen Stil logisch. Wenn ich ihm aber die Arbeit bringe so wirft er sie von sich und schreit: Was ist das? Das ist schwerfällig, das ist pedantisch, sagt er. Sie müssen schreiben genial, brillant, müssen Sie sein, Schm od, es ist jetzt Mode, daß alles angenehm sein soll für die Leser. — Was soll ich thun? Ich schreibe wieder genial, ich setze viel Brillantes hinein in den Artikel; und wenn ich ihn bringe, nimmt er den Rotzstift und streicht alles Gewöhnliche und läßt mir nur die Brillanten stehen.

**Oberst.** Ist so etwas möglich?

**Schm od.** Wie kann ich bestehen bei solcher Behandlung? Wie kann ich ihm schreiben lauter Brillantes die Zeile für fünf Pfennig? Dabei kann ich nicht bestehen.

3. Die alten Ägypter, unsere Vorläufer und Lehrer in den Anfängen höherer Gesittung, begnügten sich nicht mit dem Braten des Fleisches wie die homerischen Griechen, welche ihre fetten Lämmer und Ochsen über hellem Feuer am Spieße brieten; der Ägypter in standnen Töpfe und Pfannen in verschiedenen Größen zur Verfügung, und sie verstand die Kunst, das Fleisch zu kochen. Wir wissen dies aus der biblischen Geschichte, welche berichtet, daß die Israeliten sich nach den „Fleischtöpfen“ Ägyptens zurücksehnten. Und nicht bloß Töpfer gab es in Ägypten, auch das ehrsame Handwerk der Wöttcher wurde dort bereits ausgeübt, denn Herodot berichtet von 22 Fischarten, die, gesalzen und in Fäßchen verpackt, einen Handelsartikel bildeten. Nur der Wal galt für heilig und wurde nicht gegessen. Enten, Gänse, Wachteln, Rinder lieferten den Ägyptern die Fleischnahrung. Aus dem Samen der Lotusblume buken sie Brot; auch in der Kuchenbereitung waren sie nicht unerfahren, ja selbst

geäuertes Brot war ihnen nicht unbekannt, wie wir aus dem zweiten Buche Moses erfahren. Von ihnen ging die Kunst des Brotbackens auf die Griechen und von diesen auf die Römer über, durch welche letztere unsere heidnischen Vorfahren damit befannt wurden. In den ägyptischen Gärten sproßte und grünte allerlei Gemüse, das die Ägypter gern aßen.

## MATHEMATICS (Algebra).

Time—Two hours.

*Candidates who wish merely to obtain a Pass must attempt the questions in Parts I. and II. only. Candidates who wish to obtain a Credit must attempt the questions in Parts II. and III. only. Should any candidate attempting Parts II. and III. fail to obtain a Credit, he may still be allowed a Pass if his work be good enough.*

*No candidate may attempt questions from all three parts.*

### PART I.

I. Find the value of—

$$\left[ a^3 - b \left\{ c + \frac{bc - a^2(ac - b)}{2b - 3a} \div \frac{ab}{a - b} \right\} \div \frac{a^2c}{bc - 1} \right] \times \frac{a + b}{b + c}$$

when  $a = 2$ ,  $b = 4$ , and  $c = 5$ .

II. Add together  $\frac{2x}{x^2 - 1}$ ,  $\frac{2x^3}{-x^4 + 1}$ , and  $\frac{5}{x^3 + 1}$ , and multiply the sum by  $\frac{x^4 + x^2 + 1}{x + 2}$ .

III. Divide 85 into two parts, so that when the greater is divided by the difference the quotient is 3.

IV. Solve the equations—

$$(i.) \frac{x + \frac{1}{2}}{x - \frac{1}{2}} = \frac{3x + 1}{3x - \frac{7}{4}}$$

$$(ii.) \frac{1}{x + 1} + 2 = \frac{2}{3(x + 1)}$$

### PART II.

V. Find the highest common factor of  $2a^2x + 2x^3 + 3ax^2 + a^3$ , and  $2a^3 + 3a^2x - ax^2 - 2x^3$ .

VI. Resolve into factors—

$$(i.) 3x^2 + 10x + 3$$

$$(ii.) x^2 - y^4 + y^2 - 2xy$$

$$(iii.) a^3 + b^3 + c^3 - 3abc$$

$$(iv.) (x^2 + x - 6)(x^2 + x - 2) + 4.$$

VII. Find the time between 12 o'clock and 1 o'clock at which the hands of a clock are in the same straight line.

### PART III.

VIII. Solve the equations—

- (i.)  $(3x+1)(x-2) = -2$   
 (ii.)  $\sqrt{x+1} + \sqrt{x^2-1} = \sqrt{x^2-x-2}$   
 (iii.)  $\left. \begin{array}{l} \frac{2}{x} + y = 8 \\ \frac{4}{x} - 3y = -14 \end{array} \right\}$   
 (iv.)  $\left. \begin{array}{l} x^2 + x + y = 11 \\ x^2y = 30 - xy \end{array} \right\}$

IX. There are 57 coins in a bag, half-crowns, shillings, and sixpences. The value of the lot is £2 16s. 0d. If florins were put in instead of the half-crowns, the number of sixpences halved, and five shillings taken out, the value would be £1 18s. 0d. Find the number of each kind of coin.

X. Find the square root of—

- (i.)  $7 - 2\sqrt{10}$   
 (ii.)  $2a^2 + 2\sqrt{a^4 - 1}$ .

## 6. MATHEMATICS (Geometry).

Time—Three hours.

*Candidates who wish merely to obtain a pass are required to work from Parts I. and II. only. Candidates who wish to obtain a credit must confine their attention to Parts II. and III. Should any candidates attempting Parts II. and III. fail to obtain a credit, they may still be allowed to pass if their work be up to the requisite standard.*

*No candidate may attempt questions from all three parts.*

### PART I.

I. Draw a straight line perpendicular to a given straight line from a given point without it.

Draw a straight line such that every point on it is equidistant from two given points.

II. Prove that the three interior angles of every triangle are together equal to two right angles.

Hence show that the sum of the interior angles of any five-sided rectilinear figure is equal to six right angles.

III.  $ABC$  is a triangle having an acute angle at  $C$ , and  $AD$  is drawn perpendicular to  $BC$ . Prove that the square on  $AB$  is less than the squares on  $BC$  and  $CA$  by twice the rectangle  $BC, CD$ .

If  $F$  is the middle point of  $BC$  in the above triangle, prove that the sum of the squares on  $AB$  and  $AC$  is double the sum of the squares on  $AF$  and  $FC$ .

#### PART II.

IV. Prove that the angles at the base of an isosceles triangle are equal to one another.

$ABCD$  is a quadrilateral figure such that  $AB = AD$  and  $CB = CD$ . Show that the diagonals intersect at right angles.

V. Prove that triangles on the same base and between the same parallels are equal to one another.

Construct a right-angled triangle equal to a given parallelogram.

VI. If a straight line be divided into any two parts, prove that the square on the whole line is equal to the squares on the two parts together with twice the rectangle contained by the two parts.

Show that the sum of the squares on the two parts has its least value when the parts are equal.

#### PART III.

VII. In equal circles prove that equal angles stand upon equal arcs whether they be at the centres or circumferences.

Through any point  $A$  on the circumference of a circle two chords,  $AB$  and  $AC$ , are drawn. Through any other point  $D$  on the circle two other chords,  $DE$  and  $DF$ , are drawn parallel to  $AB$  and  $AC$  respectively. Prove that  $BF$  is parallel to  $CE$ .

VIII. Prove that the angle in a semicircle is a right angle; the angle in a segment of a circle greater than a semicircle is less than a right angle; and the angle in a segment less than a semicircle is greater than a right angle.

$ABC$  is a right-angled triangle inscribed in a circle. tangents are drawn at  $A$  and  $C$ , meeting at  $D$ . Show that the angle  $BAC$  is half the angle  $ADC$ .

IX. From a point  $P$  outside a given circle a tangent  $PA$  is drawn to the circle, and also a line  $PCD$  cutting the circle in  $C$  and  $D$ . Prove that the angle  $PCA =$  the angle  $PAD$ .

X. Inscribe a circle in a given regular pentagon.

## ELEMENTARY PHYSICS.

Time—Three hours.

(Not more than eight questions are to be attempted.)

- I. Describe the ordinary balance, and explain the precautions that must be taken to make it sensitive.
- II. What is meant by "Centrifugal Force"? Give two practical instances.
- III. Describe a simple form of barometer. Why is mercury used in preference to other liquids? Does the size or shape of the tube make any difference?
- IV. A heavy glass ball is hung by a fine wire from one pan of a balance, and is counterpoised. A beaker of water is then placed under the balance so that the ball is submerged. It requires 3.78 gm. to restore the balance. Then the water is taken away and another liquid is placed under the balance in a similar way. It now requires 5.16 gm. to restore the balance. Find the specific gravity of the liquid, and explain the principle of the experiment.
- V. Describe a way of showing that some metals conduct heat more easily than others.
- VI. Explain what happens when a liquid "boils".
- VII. Describe some form of photometer and the way in which it is used.
- VIII. Colour is often caused by the destruction of colour. In what way? Give examples.
- IX. Explain why electricity will not stay on a conductor that has points sticking out into the air.
- X. An iron retort stand is generally magnetised. Why? Which end is the N. pole?
- XI. Describe the electric glow-lamp, and explain its principle.

---

## CHEMISTRY.

Time—Two hours.

[Candidates are expected to write formulae and equations wherever possible.]

- I. Explain and illustrate three kinds of chemical action.

- II. How do you know that the oxygen and nitrogen in the air are not chemically combined?
  - III. Explain the manufacture of water-gas. Describe the preparation and properties of its heavier constituent. How can water-gas be utilised for illuminating purposes?
  - IV. Describe the preparation, properties, and uses of hydrogen peroxide.
  - V. Describe the construction of Davy's safety lamp, and explain the principle used in its construction.
  - VI. Describe the preparation, properties, and uses of sulphur dioxide.
  - VII. How is white arsenic prepared from arsenical pyrites? Give some account of its properties.
- 

## BOTANY.

Time—Two hours.

- I. Describe the flower of the Pea.
  - II. Describe the position and number of the stamens in the Wallflower, the Gumtree, and the Lily.
  - III. Describe the calyx of the Sow-thistle and its relation to the fruit.
  - IV. What do you understand by the terms *synantherous*, *monadelphous*, *adnate*, and *versatile*, as applied to stamens.
  - V. Describe the leaf of the *Castor-oil tree*, the *Pea*, the *Gumtree*, and the *Sow-thistle*.
  - VI. Describe the fruit of the Wallflower, and give its botanical name.
- 

## PHYSIOLOGY.

Time—Two hours.

- I. Describe the structure of the skin. What is a mucous membrane, and in what respects does the latter differ from the former?
- II. What does a muscle—say the biceps of the arm—look like to the naked eye? What is its structure, and what happens when such a muscle is made to contract?
- III. Why does blood appear red? Have you ever seen blood

under a high power of the microscope? What can be then seen? What do you mean by coagulation of the blood?

IV. What causes the air to enter the lungs in an inspiration and to leave them in an expiration? What are the differences between the air breathed in and the air breathed out?

V. What are capillary blood vessels? Describe the events that happen to the blood in these capillaries.

# SENIOR PUBLIC EXAMINATION.

## REGULATIONS.

- \* I. There shall be no limit of age for candidates at this Examination but they must either have passed the Preliminary Examination or must satisfy the Examiners in :—
- (a) Dictation
  - (b) Arithmetic
- in addition to the subjects selected by them under Regulation II.
- II. Every candidate shall be required to satisfy the Examiners in at least three of the following subjects, of which one must be No. I. of Division A, and of the remaining two one must be selected from the other subjects of Division A, and one from the subjects of Division B.

### DIVISION A.

#### 1. *English History and Literature.*

(a) History; a period will be prescribed to be studied in detail.

(b) Some standard work or works in English Literature.

#### 2. *Latin*

#### 3. *Greek*

#### 4. *French*

#### 5. *German*

#### 6. *Italian*

} Including, in each case, brief outlines of History.

No candidate shall receive credit in any of the subjects in Division A. unless he shall have satisfied the Examiners in Composition, nor in French or German unless he is able to translate into English at sight any ordinary piece of prose or poetry.

### DIVISION B.

#### 7. *Pure Mathematics.*

\* The standard for a Pass will be—Arithmetic, including the theory of the various processes; the elements of Mensuration; Algebra to Quadratic Equations, including Surds; Euclid, the substance of Books I. to IV., with Exercises.

Questions for Credit only will also be set in Algebra to the Binomial Theorem, for a positive integral exponent; Euclid, the substance of Books I. to IV., VI., and propositions 1 to 21 of Book XI., with Exercises; Plane

\* Allowed 15th December, 1896.

Trigonometry to Solution of Triangles, including Logarithms.

8. *Applied Mathematics.*

Elementary Statics, Dynamics, and Hydrostatics.

9. *Chemistry*, with the cognate portions of Experimental Physics.

10. *Experimental Physics.*

11. *Botany and Physiology.*

12. *Physical Geography and the Principles of Geology.*

III. Persons who have passed the Preliminary Examination may be examined for certificates in any one or more of the subjects of the Senior Public Examination, without being required to take the Examination as a whole.

IV. Schedules fixing the special subjects of examination, and defining as far as may be necessary the range of questions to be set, shall be published not less than fifteen calendar months before the date of the examination to which they are intended to apply.

\* V. (a.) The Examination shall begin on or about the last Monday in November.

(b.) A Special Examination will be held in March, at which only those candidates shall be allowed to present themselves who shall give satisfactory evidence of their intention to become Students in Law or Medicine, and who shall have given at least two months previous notice of their intention to present themselves for that Examination.

\* VI. The following fees shall be paid by each candidate on entering his name for the Examination :—

|                                                                                                                      |        |    |    |   |

| For the Special Examination in March                                                                                 | ... .. | 7  | 7  | 0 |
| Candidates who have not passed the Preliminary Examination will be required to pay in all cases an additional fee of | ... .. | 0  | 10 | 6 |

In no case will the fee be returned ; but if the candidate shall notify to the Registrar, not less than seven days before the Examination, his intention to withdraw, the fee shall stand to his credit for a future examination.

VII. On or before the 31st of October candidates must give notice of their intention to present themselves, and such notice shall be in the following form :—

To the Registrar of the  
University of Adelaide.

I hereby give notice of my intention to present myself

\* Allowed 15th December, 1896.

at the Senior Public Examination. \*I passed the Preliminary Examination held in.....  
 I intend to present myself in the following subjects:—

\*            \*            \*

Name of Candidate in full.....  
 Address.....  
 Date of birth.....  
 Last place of Education.....  
 Signature of Candidate.....  
 Date.....

- †VIII. 1. Lists of successful candidates will be posted at the University.  
 2. The general list of successful candidates shall be arranged in four classes in alphabetical order. The list shall state the last place of education from which each candidate comes, and shall also indicate in which subjects he has passed.  
 3. (a) Candidates who (1) satisfy the Examiners in two subjects of Division A in addition to English History and Literature, and also in Pure Mathematics and one other subject of Division B, and (2) obtain credit in at least two subjects, shall be placed in the First Class.  
 (b) Candidates who (1) satisfy the Examiners in three subjects in addition to English History and Literature, and (2) obtain credit in at least one subject, shall be placed in the Second Class.  
 (c) Candidates who pass in more than three subjects, or in three subjects with one credit, will be placed in the Third Class.  
 (d) Candidates who pass in three subjects without a credit, will be placed in the Fourth Class.  
 4. Special lists will also be issued for each subject, containing the names of candidates who pass with credit, arranged in order of merit.
- IX. Each successful candidate shall be entitled to a certificate signed by the Chairman of the Board of Examiners and countersigned by the Registrar, showing in what subjects the candidate passed, and in what class he was placed on the result of the whole examination and in the separate subjects.
- X. On application to the Registrar, unsuccessful candidates shall be informed in what subjects they have failed.

Allowed the 17th November, 1886.

- ‡XI. Notwithstanding anything contained in the above Regulations the Council may permit Candidates to enter their names for Examination, after the specified date of entry, on payment of an extra fee of 10s. 6d.

\* Candidates who have not passed the Preliminary Examination will strike this out.

† Allowed 15th December, 1896.

‡ Allowed 13th December, 1890.

DETAILS OF SUBJECTS FOR THE SENIOR PUBLIC EXAMINATION  
TO BE HELD IN NOVEMBER, 1897, AND FOR THE SPECIAL  
EXAMINATION IN MARCH, 1898.

COMPULSORY ARITHMETIC.

Easy questions on the elementary processes of Arithmetic, including fractions, decimals, practice, rectangular areas, and volumes, square root, percentages, simple interest, profit and loss, and exchanges.

DIVISION A.

1. ENGLISH HISTORY AND LITERATURE.

- (a) *History of England—The Age of Elizabeth* (Creighton), in Epochs of Modern History (Longmans).
- (b) *English Literature*:—  
*Shakespeare—Julius Cæsar* (Pitt Press).  
*Macaulay—Lord Clive* (Pitt Press).

Additional for credit—

*Selections from the Spectator* (Macmillan).

2. LATIN.

- \*(a) Grammar.
- \*(b) Prose Composition.
- \*(c) Unseen passages for translation from Latin into English.
- (d) Cæsar, *De Belle Gallico*, Book I.
- (e) Roman History from 133 B.C. to 14 A.D.

\*Candidates are warned that, however satisfactory their work may be in (d) and (e), it is impossible for them to pass if they fail in the other sections.

3. GREEK.

- \*(a) Grammar.
- \*(b) Prose Composition.
- \*(c) Unseen passages for translation from Greek into English.
- (d) Xenophon, *Anabasis*, Book I.
- (e) Greek History from 479 B.C. to 387 B.C.

\*Candidates are warned that, however satisfactory their work may be in (d) and (e), it is impossible for them to pass if they fail in the other sections.

4. FRENCH.

- (a) Unseen passages. Two of prose and two of verse. Only one of each kind need be taken by candidates for a pass.
- (b) Grammar and Prose Composition (unusual words and phrases supplied).  
*French History—Yonge's Primer* (Macmillan).

5. GERMAN.

- (a) Unseen passages. Two of prose and two of verse. Only one of each kind need be taken by candidates for a pass.
- (b) Grammar and Prose Composition (unusual words and phrases supplied).  
*German History—Simes's*, from page 172 (Macmillan).

6. ITALIAN.

- (a) *D'Azeglio*. Ettore Fieramosca.
- (b) Prose Composition (unusual words and phrases supplied).  
*Italian History—W. Hunt* (Macmillan).

DIVISION B.

7. PURE MATHEMATICS.

*Arithmetic*, including the various processes; the elements of mensuration, including the areas of parallelograms, triangles, circles, and the surfaces of spheres and cones, the volumes of parallelpipeds, prisms, pyramids, spheres and cones.

*Algebra*—To Quadratic Equations, Surds (both inclusive).

\* Questions will also be set in Algebra up to and including the Binomial Theorem for a positive integral exponent.

*Geometry*—The substance of Euclid, Books I., II., III., IV., with Exercises.

\* Questions will also be set in the substance of Euclid, Book VI., and Propositions 1 to 21 of Book XI.; and in Plane Trigonometry up to and including Solution of Triangles and Logarithms.

\* Candidates for a Pass only need not attempt these.

8. APPLIED MATHEMATICS.

*Elementary Statics, Dynamics, and Hydrostatics.*

Text Books recommended—

J. B. Lock : Mechanics for Beginners, omitting Section VIII.

J. Hamblin Smith : Hydrostatics.

9. CHEMISTRY, WITH THE COGNATE PORTION OF EXPERIMENTAL PHYSICS.

Laws of Gases. Specific gravity and the modes of determining it. Barometer. Thermometer.

Specific Heat. Latent Heat.

The elementary Chemistry of the more commonly occurring elements and their compounds, based upon Remsen's Elements of Chemistry.

N.B. An intelligent knowledge of the Chemical principles will be required as far as they are explained in the above named text book.

10. EXPERIMENTAL PHYSICS.

Elements of Light, Heat, Sound, Electricity, and Magnetism. Text Book recommended—Wright's Physics (Longmans).

NOTE.—Candidates should make experiments such as may be found in Worthington's First Course of Laboratory Practice, or Gregory's Elementary Practical Physics (Macmillan).

1. BOTANY AND PHYSIOLOGY.

*Botany*.—The more conspicuous morphological variations of the sexual organs in each of the following orders, with particular reference to the more commonly occurring genera of the local flora: Ranunculaceæ, Leguminosæ, Myrtaceæ, Proteaceæ, Goodeniaceæ, Compositæ, Scrophulariaceæ, Epacridæ, Orchidæ, and Liliaceæ.

Questions may be set in reference to the type plants enumerated in the Syllabus for the Junior Examination of the previous year.

Candidates will be required to classify specimens (with or without the aid of the "Flora") illustrative of any of the above-mentioned orders. They should also provide themselves with forceps and magnifying glass.

Text-books—

*Oliver*—Lessons in Elementary Botany.

*Tate*—Flora of South Australia; or

*Dendy & Lucas*—Introduction to Botany.

Questions relating to obscure characters, or those not readily determined without the aid of a microscope, will not be set.

*Physiology.*

Text-book recommended—Elementary Physiology (Foster & Shore).

Candidates will be required to show a practical acquaintance with the position, appearance, and structure of the most important tissues and organs, and may be called upon to perform some easy exercise in dissection.

12. PHYSICAL GEOGRAPHY AND THE PRINCIPLES OF GEOLOGY.

*Physical Geography.*

The following synopsis includes the various branches of the subject required:—

- (a) Relation of continents and islands. Grouping of islands. Influence of the form of a coast line. Characteristic features of the various great masses of land.
- (b) Details of the great mountain systems of the world. Nature and position of high plains. Low plains, their relations to geological structure, their position, distribution, and characteristics. Different kinds of valleys.
- (c) Ocean—Divisions, depth, density, temperature, and colour. Form and nature of the ocean floor. Movements of the ocean. Waves and currents.
- (d) Distribution of rain. Subterranean circulation of water. Springs, their origin, temperature, and mineral contents.
- (e) River systems of the world. Deltas. Extent and peculiarities of lakes
- (f) Snow line. Glaciers. Icebergs.
- (g) Distribution of winds in both hemispheres. Special local winds and their causes.
- (h) Phenomena of and causes that produce or modify climate.
- (i) Volcanic and earthquake phenomena.
- (j) The simple facts of the vertical and horizontal distribution of plants and animals on the land and in the sea; the influence of physical and climatic circumstances on the distribution of terrestrial life.

Text-book recommended—Geikie's Elementary Lessons in Physical Geography.

*Geology.*

Questions will be confined to the undermentioned topics in the elements of physical geology:

Proofs of the origin of stratified rocks resulting from the degradation of the land produced by the action of rain, rivers, frosts, glaciers, icebergs, accumulations of organic debris, &c.

The transport of matter by rivers, the formation of the deltas, &c., and the general accumulations of great deposits of marine and freshwater strata.

The theory of the origin of salt lakes.

Proofs that large areas of the earth's surface are now being slowly elevated above or depressed beneath the sea. The relations

of coral reefs and of earthquake and volcanic phenomena to this branch of the subject.

Explanation of common geological terms—as clay, sand, gravel, horizontal and inclined strata, anticlines and synclines, unconformability, dip, joint, fault.

The candidates will also be required to make sketches, and name unlabelled specimens of the commoner rocks of this country. They should provide themselves with scales and compasses.

Text-book recommended—Tate's Students' Class Book of Physical Geology.

# EXAMINATION PAPERS, 1896.

## ENGLISH HISTORY.

Time—Two hours.

- I. Name, with dates, the Prime Ministers of the period beginning with Earl Grey, and state concisely the reasons for their retiring.
  - II. Give the history of the passage of the Reform Bill, in 1832, into the Reform Act.
  - III. Describe the state of pauperism investigated by the Poor Law Commissioners. State the essential features of the Poor Law Act.
  - IV. State and explain the points of the People's Charter. Which of these are law in South Australia?
  - V. *Either* give in outline the Revolutions of 1848, *or* show on what grounds the question is discussed whether a country thrives better under Free Trade or under Protection.
- 

## ENGLISH LITERATURE.

Time—Two hours.

- I. Write an essay on the death scene of John of Gaunt, quoting where you can.
- II. State concisely the part taken by the Duke of York in the play, after the departure of Richard for Ireland.
- III. "There are four points of metre in which Shakespeare's earlier and later practice are wholly unlike or even diametrically opposed."  
Explain this as far as you can, and say how they appear in Richard II.
- IV. Explain in detail (by paraphrase or otherwise) the following passage:—

Each substance of a grief hath twenty shadows  
Which shows like grief itself but is not so;  
For sorrow's eye, glazed with blinding tears,  
Divides one thing entire to many objects;

Like perspectives, which rightly gazed upon  
 Show nothing but confusion, eyed awry  
 Distinguish form : so your sweet Majesty,  
 Looking awry upon your lord's departure,  
 Find shapes of grief more than himself to wail ;  
 Which look'd on as it is, is nought but shadows  
 Of what is not.

V. Explain the meaning of the following lines, and write notes on the words in italics :—

- (1) The *apprehension* of the good  
 Gives but the greater feeling to the worse.
- (2) We see the wind sit sore upon our sails,  
 And yet we strike not, but *securely* perish.
- (3) How *fondly* dost thou spur a forward horse.

VI. What qualities in the character of Louis are brought out in Scott's *Quentin Durward*?

VII. (a) Explain what you understand by *feudal system*, and *times of chivalry*. Who was *Charlemagne*?

or

VII. (b) Show how the character *Le Balafre* gives humour to the story.

---

## LATIN.

Time—Three hours.

*Candidates for a Pass only may omit either (a) or (b) in question II. and any five sentences in V.(c).*

I. Translate into Latin Prose—

The English were besieging Orleans ; Joan the Maid drove them from its walls. How did it happen that a girl of seventeen, who could neither read nor write, became the greatest general on the side of France? How did a woman defeat the hardy English soldiers who were used to chase the French before them like sheep?

We must say that France could only be saved by a miracle, and by a miracle she was saved. This is a mystery ; we cannot understand it. Joan the Maiden was not as other men and women are. But, as a little girl, she was a child among children, though better, kinder, stronger than the rest, and, poor herself, she was always good and helpful to those who were poorer still.

II. Translate into English Prose—

- (a) Haec mea, si casu miraris, epistula quare alterius digitis scripta sit : aeger eram.

aeger in extremis ignoti partibus orois,  
 incertusque meae paene salutis eram.  
 quem mihi nunc animum dira regione iacenti

 nullus Apollinea qui leuet arte malum,  
 non qui soletur, non qui labentia tarde  
 tempora narrando fallat, amicus adest.

- i. Why are *sit*, *putes*, and *leuet* in the subjunctive?
  - ii. Classify the ablatives *digitis*, *dira regione*, and *arte*.
  - iii. What case is *aegro* and why?
  - iiii. Scan lines 6 and 9.
- (b) Per eosdem dies ab Hierone classis Ostia cum magno comteatu accessit. legati in senatum introducti nuntiarunt caedem C. Flamini consulis exercitusque allatam adeo aegre tulisse regem Hieronem, ut nulla sua propria regni que sui clade moueri magis potuerit. itaque, quamquam probe sciat magnitudinem populi Romani admirabiliorem prope aduersis rebus quam secundis esse, tamen se omnia, quibus a bonis fidelibusque sociis bella iuari soleant, misisse; quae ne accipere abnuant, magno opere se patres conscriptos orare. iam omnium primum omnis causa Victoriam auream pondo ducentum ac uiginti adferre sese: acciperent eam tenerentque et haberent propriam et perpetuam. aduexisse etiam trecenta milia modium tritici, ducenta hordei, ne comteatus deessent, et quantum praeterea opus esset, quo iussissent, subuecturos.

- (i.) For what word does C. stand? Why should this letter be used?
- (ii.) In what case is *modium*? Give parallel forms.
- (iii.) Why are *acciperent* and *esset* in the subjunctive?

### III. Translate—

(a) His constitutis rebus et consilio cum legatis et quaestore communicato, ne quem diem pugnae praemitteret, opportunissime res accidit, quod postridie eius diei mane eadem et perfidia et simulatione usi Germani frequentes omnibus principibus maioribusque natu adhibitis ad eum in castra uenerunt, simul, ut dicebatur, sui purgandi causa, quod contra, atque esset dictum et ipsi petissent, proelium pridie commississent, simul ut, si quid

i. Why is *commisissent* in the subjunctive?

ii. Why is the character *j* not used now in any well-edited text of a classical Latin author?

(*b*) *Hostes postero die multo maioribus coactis copiis castra oppugnant, fossam complent. eadem ratione, qua pridie, ab nostris resistitur. hoc idem reliquis deinceps fit diebus. nulla pars nocturni temporis ad laborem intermittitur; non aegris, non uulneratis facultas quietis datur. quaecumque ad proximi diei oppugnationem opus sunt, noctu comparantur; multae praeustae sudes, magnus muralium pilorum numerus instituitur; turres contabulantur, pinnae loricaeque ex cratibus attexuntur. ipse Cicero, cum tenuissima ualitudine esset, ne nocturnum quidem sibi tempus ad quietem relinquebat, ut ultro militum concursu ac uocibus sibi parcere cogeretur.*

Why is *esset* in the subjunctive?

III. Give the Latin for hostages, a foot and a-half thick, triangular, not more than 800 horsemen, nearer the west, on this side of the Rhine, tin, to enrol, to weigh anchor, a beam; and the English for amentum, testudo, turma, essedarii, pagus, fibula, and confluens.

V (*a*) Give the perfect, supine, infinitive (marking the quantity of the penultimate vowel), and meaning of *sancio*, *expergiscor*, *ordior*, *uello*, *fodio*, *uro*, *cresco*, and *caueo*.

(*b*) Give the abl. sing., gen. plur., and gender of *calcar*, *fur*, *accipiter*, *ordo*, *femur*, *frons* (2), *hiemps*, *praedo*, *iusiurandum*, *requies*.

(*c*) Translate into Latin—

ii. I hope to come before daybreak.

iii. Do you really suppose that he does not know that his grandmother died last year?

iiii. He asserted that he could not believe the king at all.

v. There can be no doubt that the infantry will leave the camp to-morrow.

vi. He broke his leg while travelling to Rome.

vii. I am afraid you will not tell me what you think.

- viii. I am waiting till my father comes.  
 viii. The Romans pitched two camps in order to occupy the enemy's territory.  
 x. To which of the two boys did he give the book?  
 To both. It is easy for anyone to say that.  
 Each man has his own house.

(d.) Give the main rules for *Oratio Obliqua*.

- VI. (a) Give a clear but very brief account of Caesar's second invasion of Britain.  
 (b) Give the dates of the following events :—the battle of Cannae, the death of Augustus, the Latin war, the accession of Vespasian, the second Punic war, the fall of Carthage, the capture of Rome by Alaric, the conspiracy of Catilina, the dictatorship of Sulla, the Licinian laws?  
 (c) What is meant by the Eastern Roman Empire and the Western Roman Empire? Distinguish between the legitimate and the illegitimate use of these terms, and give the date of the coronation of Charles the Great.

- (a). i. They offered to give him the horse.  
 ii. He returned from exile without any one noticing it.  
 iii. They succeeded in none of the objects of their expeditions.  
 iii. He said that he could do nothing himself, but that his friends were willing to go on the voyage.  
 (β). Of this war we know all the events in great detail, because we have the history of it from writers who lived at the time. The history of the greater part of the war was written by Thucydides, who was not only living at the time, but himself held a high command in the Athenian army. And the history of the latter years of the war was written by Xenophon, another Athenian writer, who also lived at the time.

### DÉCOUVERTE.

J'étais enfant. J'aimais les grands combats,  
 Les chevaliers et leur pesante armure,  
 Et tous les preux qui tombèrent là-bas  
 Pour racheter la Sainte-Sépulture.

L'Anglais Richard faisait battre mon cœur ;  
 Et je l'aimais, quand après ses conquêtes  
 Il revenait, et que son bras vainqueur  
 Avait coupé tout un collier de têtes.

D'une Beauté je prenais les couleurs.  
 Une baguette était mon cimenterre ;  
 Puis je parlais à la guerre des fleurs  
 Et des bourgeons dont je jonchais la terre.

Je possédais au vent libre des cieux  
 Un banc de mousse où s'élevait mon trône.  
 Je méprisais les rois ambitieux,  
 De rameaux verts j'avais fait ma couronne.

J'étais heureux et ravi. Mais un jour  
 Je vis venir une jeune compagne.  
 J'offris mon cœur, mon royaume et ma cour,  
 Et les châteaux que j'avais en Espagne.

Elle s'assit sous les marronniers verts ;  
 Or, je crus voir, tant je la trouvais belle,  
 Dans ses yeux bleus comme un autre univers,  
 Et je restai tout songeur auprès d'elle.

Pourquoi laisser mon rêve et ma gaîté  
 En regardant cette fillette blonde ?  
 Pourquoi Colomb fut-il si tourmenté  
 Quand, dans la brume, il entrevit un monde ?

DE MAUPASSANT.

(iii.) L'hôtel de Rambouillet, fort de l'appui de Richelieu, devint une cour littéraire où fut admis quiconque eut le talent de se faire passer pour un bel esprit ; et dans cette noble maison il n'était nul besoin, pour être accueilli, d'étaler des titres de noblesse. Le roturier y marchait de pair avec le gentilhomme, et tous les parchemins généalogiques n'y valaient pas l'humble feuille de papier qui contenait un madrigal ou un sonnet. C'était un grand avantage, pour le perfectionnement de la société française, que cette égalité dans un salon aristocratique, entre gens de divers états et de diverses conditions. La roture ne songeait point alors à se soulever contre la noblesse ; elle lui rendait sans peine des hommages en échange des égards qu'elle en recevait. Tous les genres de supériorité étaient également reconnus : l'homme de lettres était reçu familièrement dans l'hôtel du grand seigneur, qui ne dédaignait à son tour de le visiter dans son humble logis. Il existait enfin une sorte de fraternité entre le gentilhomme qui versait son sang pour son pays sur les champs de bataille et le poète qui célébrait ses triomphes dans ses vers.

—MENNECHET : Littérature moderne.

(iv.) LES JONGLEURS JAPONAIS.

Plusieurs de nos lecteurs ont sans doute vu le célèbre jeu des papillons, qui n'est pas un tour d'escamotage, mais un simple tour d'adresse. Le jongleur prend devant le public une feuille de papier, en déchire un petit morceau auquel il donne en quelques coups de doigt la forme d'un papillon, puis il le lance en l'air, et en agitant son éventail, il le fait monter, descendre, tourner, se reposer, reprendre son vol, comme le peut faire un vrai papillon voltigeant librement dans un jardin. Puis il en fabrique un second qu'il lance à la poursuite du premier, et voilà les deux bestioles artificielles qui se recherchent, s'évitent, se rapprochent, s'éloignent l'une de l'autre, et continuent leurs jeux charmants jusqu'à ce qu'il plaise à leur créateur d'arrêter le mouvement de l'éventail dont le vent, savamment dirigé, suffisait à leur donner la vie.

II. Translate into French—

The brother of Arminius had assumed the Roman name of Flavius, and had gained considerable distinction

in the Roman service, in which he had lost an eye from a wound in battle. When the Roman outposts approached the river Weser, Arminius called out to them from the opposite bank, and expressed a wish to see his brother. Flavius stepped forward and the brothers began a conversation from the opposite sides of the stream, in which Arminius questioned his brother respecting the loss of his eye, and what battle it had been lost in, and what reward he had received for his wound. Flavius told him how the eye was destroyed, and mentioned the increased pay that he had on account of its loss, and showed the collar and other military decorations that had been given him. Arminius mocked at these as badges of slavery; and then each began to try to win the other over; Flavius boasting the power of Rome, and her generosity to the submissive; Arminius appealing to him in the name of their country's gods, of the mother who had borne them, and by the holy names of fatherland and freedom, not to prefer being the betrayer to being the champion of his country.

- III. 1. "Déracine en passant ces chênes orgueilleux,  
Qui bravaient les hivers, et qui touchaient les cieux."  
Scan these two lines in accordance with the rules of French metre, by numbering the different syllables which count and bracketing the others.
2. Examine the italicized words in I. i. with regard to the rule of the agreement of the present participle, and state the rule: Is *fuyants* correct?
3. *Orageux, orgueilleux, poursuit, foudroyant, moissonne, fuyaient*. What are the nouns corresponding to these adjectives or verbs?
4. What is the feminine of *vengeur*?
- IV. Tell shortly what you know of the following:—the "Jacquerie"; the character and reign of Louis XI.; the battle of Ivry; the States General; the Wars of the Spanish succession; the Jacobins; the Third Republic.

## GERMAN:

Time—Three hours.

(Credit Candidates will answer the whole paper, Pass Candidates will answer Part I. and may afterwards attempt other questions.)

### PART I.

- I. (a.) Name the prefixes of verbs which are always inseparable, and give an example of each with the meaning.

- (b.) Write the 1st singular perfect indicative of *übergehen* and *übersetzen* when the prefix is separable and when it is not, and give the meaning.
- (c.) Write these 3rd singular preterites in a column and then put beside each its meaning and its infinitive:—  
bat, bot, blies, lag, log, flog, floh, hob, hieb, riet, lud, schuf.
- (d.) Give the rule for the mood of the principal verb in oblique narration, and translate:—He thought the pen might be lying on the table, but I asked him how that was possible, and bade him go and find it.

II. Translate into English:—

(a) Ich gehe durch eine Schule der Geduld, sie ist hart, langwierig, grausam, ja barbarisch. Ich rette mich daraus, indem ich das Universum im Ganzen ansehe, wie von einem fremden Planeten. Da erscheine mir alle Gegenstände unendlich klein, und ich bemitleide meine Feinde, daß sie sich so viel Mühe um so Geringes geben. Ist es das Alter, ist es das Nachdenken, ist es die Vernunft? ich betrachte alle Ereignisse des Lebens mit viel mehr Gleichgiltigkeit als sonst. Gibt es etwas für das Wohl des Staats zu thun, so setze ich noch einige Kraft daran, aber unter uns gesagt, es ist nicht mehr das feurige Stürmen meiner Jugend, nicht der Enthusiasmus, der mich sonst beseele. Es ist Zeit, daß der Krieg zu Ende gehet denn meine Predigten werden langweilig, und bald werden meine Zuhörer sich über mich beklagen. So schrieb und trauert, der König, aber er hielt aus. Und wer durch die finstere Energie seines Entschlusses erschüttert wird, der möge sich vor der Meinung hüten, daß in ihr die Kraft dieses wunderbaren Geistes ihren höchsten Ausdruck finde.

Je milder, je mehr gebrochen  
Ein edles Herz von Pein,  
Um so tiefer und stiller sein Bösen.  
Wem ein großes Leid gesch'hen  
Der muß ewig elend sein.  
Blumen kann man wieder säen,

(a.) Diese Zeit ist vorbei! Ich bin jetzt mehr erleuchtet, als ehst. Solche kühle Erleuchtung kommt aber immer zu spät bei den Menschen. Ich sehe jetzt im klarsten Lichte die Steine über welche ich gestolpert. Ich hätte ihnen so leicht ausweichen können, ohne darum einen unrechten Weg zu wandeln. Jetzt weiß ich auch, daß man in der Welt sich mit allem be-fassen kann, wenn man nur die dazu nötigen Handschuhe an-zieht. Und dann sollten wir nur das thun, was thunlich ist und wozu wir am meisten Geschick haben, im Leben wie in der Kunst. Ach! zu den unseligsten Mißgriffen des Menschen gehört, daß er den Wert der Geschenke, die ihm die Natur am bequemsten entgegen trägt, kindisch verkennt, und dagegen die Güter, die ihm am schwersten zugänglich sind, für die kostbarsten ansieht. Den Edelstein, der im Schoße der Erde festgewachsen, die Perle, die in den Untiefen des Meeres verborgen, hält der Mensch für die besten Schätze; er würde sie gering achten, wenn die Natur sie gleich Kiesel und Muscheln zu seinen Füßen legte. Gegen unsere Vorzüge sind wir gleichgültig; über unsere Gebrechen suchen wir uns so lange zu täuschen, bis wir sie endlich für Vortrefflichkeiten halten. Als ich einst nach einem Konzerte von Paganini diesem Meister mit leidenschaftlichen Lobsprüchen über sein Violinspiel entgegentrat, unterbrach er

mich mit den Worten: „Aber wie gefielen Ihnen heute meine Komplimente, meine Verbeugungen?“

Wie mächtig auch mein stolzer Mut sich blähe,  
In deiner selig süßen, trauten Nähe  
Ergreift mich oft ein demutvolles Zagen.  
Ist es dein Geist, der heimlich mich bezwinget,  
Dein hoher Geist, der alles kühn durchdringet,  
Und blitzend sich zum Himmelslichte schwinget?  
Quält mich Erinnerung, daß ich verübet  
So manche That, die dir das Herz betrübet,  
Das schöne Herz, das mich so sehr geliebet!

#### VI. Translate into German—

He lived about four years longer, in the enjoyment of good spirits and of health such as is rarely enjoyed by those who attain such an age. At length, on the 22nd of August, 1818, in the 89th year of his age, he met his death with the same tranquil and decorous fortitude which he had opposed to all the trials of his various and eventful life. He had at length gone down to his grave in peace and honour after so many troubles and so much obloquy. He was deficient in respect for the rights of others and in sympathy for their sufferings. But while his principles were somewhat lax and his heart somewhat hard, we must admire his rare talents, his dauntless courage, his honourable poverty and his fervent zeal for the interests of the state.

## 7. PURE MATHEMATICS (I.)

Time—Three hours.

*Candidates who wish merely to obtain a Pass are required to work from Parts I. and II only. Candidates who wish to obtain a Credit must confine their attention to Parts II. and III. Should any Candidates attempting Parts II. and III. fail to obtain a Credit, they may still be allowed to pass if their work be up to the requisite standard.*

*No Candidate may attempt questions from all three Parts.*

### PART I.

- I. The area of a square field is  $30\frac{1}{4}$  acres. Find to the nearest foot the length of a diagonal.
- II. A farmer buys 120 sheep, and sells 40 of them at a profit of 10 per cent., 50 at a profit of 12 per cent., and the

remaining 30 at a loss of 5 per cent. On the whole he gains £5 2s. What did he give for each sheep?

III. Simplify

$$\frac{bc(a-1)^2}{(a-b)(a-c)} + \frac{ca(b-1)^2}{(b-c)(b-a)} + \frac{ab(c-1)^2}{(c-a)(c-b)}$$

IV. Find the G.C.M. of

$$3x^5 + 5x^4 + 4x^3 - 2x - 1, \text{ and } 3x^5 + 4x^4 + 3x^3 + x^2 + 1.$$

V. Solve the equations

$$(i.) 3x^2 - 2x - 1 = 0.$$

$$(ii.) ax^2 - bx + c = 0.$$

#### PART II.

VI. A cylindrical tank is to be built 20 feet in diameter to hold 20,000 gallons of water. What must be its depth, given that a gallon of water measures  $277\frac{1}{4}$  cubic inches?

VII. If  $2s = a + b + c$

Prove that

$$(a-b) \sqrt{\frac{s-c}{(s-a)(s-b)}} + (c-a) \sqrt{\frac{s-b}{(s-c)(s-a)}} + (b-c) \sqrt{\frac{s-a}{(s-b)(s-c)}} = 0.$$

VIII. Solve the equations—

$$(a) \frac{3}{x} - \frac{2x-1}{2x+1} = \frac{1-x}{x - \frac{6}{23}}$$

$$(b) \begin{cases} 2x^2 + xy + 2y^2 = 8 \\ x^2 - 3xy + y^2 = 11 \end{cases}$$

IX. Two trains, one 80 feet and the other 74 feet long, when travelling in opposite directions, take  $1\frac{1}{2}$  secs. to completely pass one another. Also, the first travels over one mile in half a minute less time than the other. Find the speeds of the trains in miles per hour.

#### PART III.

X. Show that a ratio of greater inequality is diminished, and a ratio of less inequality is increased, by the addition of the same quantity to each of its terms.

$$\text{If } \frac{a}{b} = \frac{c}{d} = \frac{e}{f}$$

Prove that

$$\frac{la^2}{b^2} + \frac{mc^2}{d^2} + \frac{ne^2}{f^2} = (l+m+n) \left( \frac{a+c+e}{b+d+f} \right)^2$$

- XI. Find the sum and also the continued product of  $n$  terms forming a Geometrical Progression, the first term being  $a$  and common ratio  $r$ .
- Four quantities in Harmonical Progression are such that the product of the first and fourth is 1, whilst the sum of the second and third is  $1\frac{2}{3}$ . Find the quantities.
- XII. State and prove the Binomial Theorem for a positive integral exponent.
- Find the coefficient of  $x^2$  in the expansion of  $\left(3x - \frac{2}{x}\right)^{12}$
- XIII. Show geometrically that  $\cos(180^\circ - A) = -\cos A$ , and that  $\tan(270^\circ + A) = -\cot A$ .
- Prove that  $\cos 40^\circ + \cos 80^\circ + \cos 160^\circ = 0$ .
- XIV. A man standing on a level plain on which a tower is erected observes the angle of elevation of the top of the tower to be  $43^\circ$ . He then walks a distance of 20 yards directly towards the tower and observes the angle of elevation of a mark on the tower to be  $35^\circ$ . The distance of this mark from the top of the tower he knows to be one-third of the height of the tower. Find the height of the tower, given  $\tan 35^\circ = .7$  and  $\tan 43^\circ = .93$ .

## MATHEMATICS II.

Time—Three hours.

*Candidates who wish merely to obtain a pass must attempt the questions in Parts I. and II. only. Candidates who wish to obtain a credit must attempt the questions in Parts II. and III. only. Should any candidate attempting Parts II. and III. fail to obtain a credit, he may still be allowed a pass if his work be good enough. No candidate may attempt questions from all three parts.*

### PART I.

- I. If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles included by those sides equal, the triangles are equal in all respects.

In what other cases, certain facts being given about two triangles, can you deduce that they are equal in all respects?

- II. If of two sides of a triangle one is longer than the other, then the angle which is opposite the longer side is greater than the angle which is opposite the shorter.

$ABCD$  is a quadrilateral figure.  $AB$  is the longest side,  $CD$  the shortest. Show that the angle  $BCD$  is greater than the angle  $BAD$ . Is it also greater than  $CBA$ ?

III. In any triangle the square on the side opposite an acute angle is less than the squares on the sides containing it, by twice the rectangle contained by either of these sides and the straight line intercepted between the perpendicular let fall on it from the opposite angle and the acute angle.

IV. In equal circles equal angles, whether at the centres or at the circumferences, stand on equal arcs.

A triangle  $ABC$  is inscribed within a circle. Chords  $AX$  and  $AY$  are drawn, either both within, or both without the angle  $BAC$  so that the angle  $BAX$  is equal to the angle  $CAY$ . Show that  $XY$  is parallel to  $BC$ .

#### PART II.

V. The base  $BC$  of a triangle is produced both ways to  $D$  and  $E$  so that  $DB, BC$ , and  $CE$  are equal.  $AD$  and  $AE$  are joined. Show that the sum of the squares on the sides of the triangle  $ADE$  is greater than the sum of the squares on the sides of the triangle  $ABC$  by twelve times the square on  $BC$ .

VI. Show that two circles cannot touch one another at more than one point.

VII.  $P$  and  $Q$  are two points within a given circle. Show how to find a point  $O$  on the circumference of the circle such that  $OP$  and  $OQ$  being produced to meet the circles  $R$  and  $S$ ,  $RS$  may be equal to a given straight line.

VIII. Show how to inscribe a circle in a given triangle.

Show that the angle between the bisector of the vertical angle of a triangle and the perpendicular on the base is equal to half the difference between the base angles. Hence show how to construct a triangle given the angle at the vertex, the perpendicular from the vertex on the base, and the difference between the base angles.

#### PART III.

IX. Show that, if the bisectors of the angles at the base of a triangle meet in the straight line drawn from the vertex to the middle point of the base, the triangle is isosceles.

X. Equiangular parallelograms have to one another the ratio which is compounded of the ratios of their sides.

Two circles, whose centres are  $O$  and  $Q$ , meet one another at right angles at  $P$  and  $R$ . Through  $P$  a straight line  $APB$  is drawn meeting one circle in  $A$  and  $P$ , the other in  $P$  and  $B$ , and  $AP$  is equal to  $PB$ . Show that the rectangle contained by  $AB$  and  $OQ$  is equal to the rectangle contained by the diameters of the circles.

- XI. If a solid angle be contained by three plane angles, any two of them are together greater than the third.
- XII. Given  $\log 33 = 1.51851$ , find  $\log 33^{1/3}$  and also  $\log (.00033)^{1/3}$ .  
Also given  $\log 2 = .30103$  and  $\log 3 = .47712$  find  $x$  from the equation

$$2^{3-x} = 15^{2-2x}.$$

XIII. Show that in any triangle

$$(i.) \cos \frac{A}{2} = \sqrt{\frac{s(s-a)}{bc}}$$

$$(ii.) \frac{b-c}{a} + \frac{c-a}{b} + \frac{a-b}{c}$$

$$= \frac{c-b}{a} \cos A + \frac{b-a}{c} \cos C + \frac{a-c}{b} \cos B.$$

XIV. What is the difference between an "identity" and an "equation"?

Find all the values of  $\theta$  and  $\phi$  that satisfy

$$\left. \begin{aligned} 2 \sin \theta &= 2 \sin \phi - \cos \phi \\ 2 \cos \theta &= 2 \cos \phi - \sin \phi \end{aligned} \right\}$$

## APPLIED MATHEMATICS.

THE BOARD OF EXAMINERS,

Time—Three hours.

- I. A body is projected with a velocity of 20 ft. per sec., and is acted upon by an acceleration of 4 ft. sec. units in the direction of its motion. How far will it have gone, and what velocity will it have, at the end of 10 seconds?
- II. Enunciate and prove the proposition known as "The Parallelogram of Velocities."

From a carriage of a railway train moving at the rate of 30 miles an hour a missile is projected at right angles to the train with a velocity of 33 ft. per sec. Find the initial velocity of the missile relative to the ground.

- III. Prove that the sum of the moments of two forces acting at a point about any given point in the plane of the forces is equal to the moment of their resultant about the same point.
- IV. A uniform beam 10 ft. long and weighing 60 lbs. is supported at its ends. At a point 3 ft. from one end a weight of 90 lbs. is hung. Find the pressures on the supports.
- V. Find the position of the centre of gravity of a uniform triangular lamina.
- VI. Find the relation between the Power and the Weight in the system of pulleys in which all the pulleys are arranged in two blocks, one block fixed, the other moveable; the same string going round all the pulleys, and all the strings being parallel.  
Show also that if the weight is raised any given distance that the work done by the Power is equal to the work done in raising the weight, neglecting friction.
- VII. Three pounds of alcohol (specific gravity .79) are mixed with two pounds of water. What is the specific gravity of the mixture? What will be the apparent weight of one pound of lead, specific gravity 11.35, when immersed in the mixture?
- VIII. The height of the barometer column being 30 inches and the specific gravity of mercury 13.6, find the pressure per square inch at a depth of 50 ft. below the surface of a fresh water lake exposed to atmospheric pressure.
- IX. Describe and explain the action of the ordinary suction pump. Draw a diagram in illustration.

---

## CHEMISTRY.

Time—Three hours.

[Candidates are expected to write formulae and equations wherever possible.]

- I. Describe an apparatus for obtaining oxygen and hydrogen by means of an electric current. In what proportions by volume are these gases obtained?
- II. Write what you know of the different kinds of natural waters.
- III. Describe the Weldon process for the manufacture of chlorine. How is bleaching powder made, and what are its uses?

- IV. Describe the various steps in the manufacture of mercuric cyanide and cyanogen.
- V. Explain how you would prepare
- (a). Caustic potash.
  - (b). Superphosphate of lime.
  - (c). Magnesia usta.
  - (d). Cupric oxide.
  - (e). Calomel.
  - (f). Lunar caustic (from a silver coin)
  - (g). Red lead.
- VI. Write what you know of the preparation and properties of oxalic acid.
- VII. Ten grammes of steam at  $100^{\circ}\text{C}$  are passed into 100 grammes of water at  $15^{\circ}\text{C}$ , to what point will the temperature of the water be raised ?

## EXPERIMENTAL PHYSICS.

Time—Three hours.

*(Not more than nine questions are to be attempted.)*

- I. Define the terms "heat," "temperature," "specific heat," "dew-point."
- II. What is an air-thermometer ? What are its advantages and disadvantages ?
- III. Explain carefully the principle of "Papin's digester."
- IV. Describe a way of finding the number of vibrations per second in a sound of given pitch.
- V. What is a "pinhole camera" ? Explain its principles and method of use.
- VI. Explain the way in which a simple lens is used to magnify objects.
- VII. What is the "spectrum" ? State what you know of ether-waves other than those that are visible.
- VIII. What is the purpose of the "keeper" of a magnet ?
- IX. How would you show experimentally that when a piece of ebonite is rubbed with flannel, the electricity developed on the ebonite is equal in quantity, though opposite in sign, to that developed on the flannel ?
- X. What effect has the thickness of the glass of a Leyden jar on its usefulness ?
- XI. State Ohm's law. If five Daniel cells, each of E.M.F. one

volt, and internal resistance four ohms, be connected in series with a coil of wire of twenty ohms resistance, what will be the current generated?

XII. What is electrolysis? Give two examples.

## BOTANY.

Time—Two hours.

- I. Describe the arrangement of the carpels of *Ranunculus*, and what is the botanical name of the fruit of this plant?
- II. Describe the arrangement and insertion of the stamens of the flower of the *Gum-tree* as regards the calyx and ovary.
- III. What meaning do you attach to the terms *pappus*, *tubular*, *ligulate*, *synantherous*, *bifid*, and *phyllaries*, as applied to flowers of various *Compositæ*?
- IV. Describe the number and position as regards the ovary of the stamens in *Orchidææ* and *Liliacææ*.
- V. What is the difference between a *legume*, a *follicle*, and a *siliqua*?
- VI. Describe the flower of a plant belonging to the *Goodenovicæ*.

---

## 7 (c). PHYSIOLOGY.

Time—Two hours.

- I. Describe—
  - a. What you have seen,
  - b. What you have learnedof the constitution of blood?

What can be observed when freshly-drawn blood is allowed to stand in a glass vessel? What are the events which have taken place, say, within an hour?
- II. What do you know concerning the digestion and absorption of the fat of the food?
- III. In what respects, physiologically considered, does a dead body differ from a living body?
- IV. Describe the structure of a large nerve such as the sciatic. How would you proceed to show this nerve in a dead rabbit? What are the functions of this nerve?

- V. The iris. What is the use of this structure? Under what circumstances does the pupil dilate and contract?
- 

## PHYSICAL GEOGRAPHY AND GEOLOGY.

Time—Three hours.

- I. To what causes are we to attribute the difference between continental and insular climates?
  - II. Explain the various processes by which the surface soil is produced.
  - III. What part do rivers play in the transport of materials, and how are such materials disposed of?
  - IV. On the south coast of Australia rain falls most plentifully in winter, and, in the central and northern regions of the continent, in summer. Explain why this is the case.
  - V. How is the atmosphere warmed? Why does heat diminish with altitude?
  - VI. In what way do coral reefs indicate movements of the earth's crust?
  - VII. How can the irregular contour of a coast-line, such as headlands, isolated masses of rock, and bays, be accounted for?
  - VIII. Explain the following terms as applied to rocks:—dip, cleavage, false bedding, fault. Illustrate by sketches.
  - IX. Give the origin and composition of the following rocks:—granite, limestone, clay, sandstone.
