
6th June, 1956.

My dear Frank,

The paper on New Tables of Behrens' Test of Significance has been sent to Irwin under the names of Fisher and Healy with the addition to Healy's remarks, as on his sheet returned herewith. He will notice I have altered θ to d in two places.

I have just finished a visit from Geary and Goudswaard on I.S.I. statutes, of which I am thoroughly tired, but thank God M. Vincent was prevented from attending our conference!

For your interest I am enclosing a letter just received from one Steen Rasmussen in Denmark. I have not yet answered it, so I shall be glad to have it back with your comments.

Sincerely yours,

Encs.
