

5th December, 1955.

My dear Frank,

You may recall my sending some months ago an offprint from Kolmogoroff in the hope of getting it somehow translated. At the moment I should like it as a reference, for in it K is supposed to have proposed his axiom for the justification of fiducial inference.

Of course in time I hope to check it up more thoroughly, but at the moment it would be useful to have the reference only.

Sincerely yours,
