26th May, 1960

My dear Ron,

I was very glad to hear from you again. I have your note on the 10 x 10 Graeco-Latin square; I will see this is incorporated in the next edition. I haven't yet received a statement for the sales in 1959 so I don't know how they are going. In 1958 they sold 1028 copies and had 4099 copies in hand at the end of that year. It would seem, therefore that it would be two or three years before a new edition is required.

I shan't be going to Tokyo as I have too much on hand here. Are you likely to be coming to England?

Yours,

Professor Sir Ronald Fisher, F.R.S.,
Division of Statistics, C.S.I.R.O.,
Adelaide University,
S. Australia.
