Professor R.A. Fisher,
Galton Laboratory,
University College,
Gower Street,
London, W.C.1.

Dear Fisher,

I am enclosing my note on the tests of 2 samples. They are intended to be merely supplementary to the notes you have already written. I do not know whether you will think they are worth publishing. They have helped to clear up my own ideas considerably and may be of similar use to others.

In case of publication the diagrams will want drawing out properly. I can have this done here whenever convenient.

Yours sincerely,

Mather
