

THE VICE-CHANCELLOR'S LODGE, LENNOXVALE, BELFAST

29.10.55

I am doing a little thinking about the history of theories of hybridisation. I would very much like to read your paper in which you examine Mendel's data + have evidence that he started his experiments with some preconceived ideas. Can you spare me a reprint, please? Or failing that will you send me the reference.

Yours sincerely
Eric Ashby
