S. Barbacki
Pulawy, Institute for Agric. Research
Poland

Dear Barbacki:

test
fail to me

Thanks for sending me on Gosset's letter. I notice that he does not allude to the two statements of his which I wrote the paper to ~~find~~ the truth of. He still seems to claim the bias of the systematic arrangements as a virtue, and to ~~find it~~ *me* that if the error is over-estimated as must sometimes happen, then a random arrangement will give a more sensitive test of significance.

Yours truly,

Prof. R. A. Fisher
