My dear Barbacki,

I cannot find that you have left any full reference to the paper from which you obtained the records of yields of 15 ft. drill strips. Will you let me know all that you can recall about it, i.e., what crop was used, wheat, oats, or barley, etc, how many strips, if possible the names of the author, journal, and date of publication. What information you are able to send, I hope you will send me at once.

Yours sincerely,
