CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

Dear Fisher, I am
delighted to see from
nature that you have been
giving the Herbert Spencer
lecture. I am very glad
of this both for your sake
and for the sake of Eugenics
because it will help to
call attention widely to the
subject. You have been
speaking twice I think
on family allowances the
results of which I have

heard nothing about so far
and there is your scientific
Committee. Your hands
must be very full and
as regards the last mentioned
Committee you will have very
delicate steering. But I
am very glad of it all.

I have been in the sick
bed for about a couple of
months and am getting up
the hill a bit slowly and am
still leading an invalid
life. I am growing a long
white beard & no one will
know me.

Yours sincerely
J. Darwin
