CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

Dear Fisher.

I think I told you I was passing my time by putting down some of - my ideas. I send you herewith a copy of the results of - my Meditations. I send it to Hazen, so as to mark it as private & unofficial. I will only, I think, have an audience of - two - you & Cattell. Do not trouble to write, unless you really want to, and look on it as my

form of amusement. Things
very quiet here, and life
running on much as usual

Yours sincerely,

Leonard Darwin

Dear Major Darwin,

Many thanks for your letter, and for the photo which is now placed, as you suggest, between the two larger pictures. I am very glad to have the trio in my room here.

I have given your message to Trevor, who has been chiefly working on biometrical material, which I have no great hopes of, but which should certainly help him to explore the nature of the material available.

I shall be interested to hear what you have been thinking about the Swedish investigations, so please do not hesitate to write.

Yours sincerely,
