

March 11. 31

CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

My dear Fisher.

I have been extremely interested in this report. It shows what a wonderful advance is now being made. I certainly congratulate you on the effort.

Some few points may, as I think you suggest, be badly reported. Did Husley on p. 5 suggest that to work against underinduction was Eugenio? I guess not.

I do hope that there may be other such meetings.

Yours sincerely,
L. Darwell +

P.T.O

I am rather pleased at being
engaged in giving away copies
of my little book in French,
German, & Spanish!

LD

In future such gifts in the
languages mentioned, I expect, to
be my main personal
contribution to the Eugenic
propaganda.
