

February 2, 1937

Dear Major Darwin,

Among the pictures in the Galton Laboratory is one of your father, and another of Erasmus Darwin, which I have now in my room. The latter is $9\frac{1}{2} \times 10\frac{3}{4}$ " and the first $10\frac{1}{2} \times 13$ ", set in frames of about 15×18 ". I wonder if, by any chance, you have a photograph of yourself of about the same size which I could add to make a third picture of members of your family. Please do not put yourself to any special trouble about it.

With best wishes for the New Year,

Yours sincerely,
