CRIPPS'S CORNER,

FOREST ROW,

SUSSEX.

Dear Fisher

AV Hill brings up the  
Parnett figures once again in  
the weeks Nation. I am  
thinking of trying to write a  
letter to Nation about it. I am,  
as you know, against controversy;  
but it is not an answer to  
an attack on me. If I do, I will  
show it to you in advance. Let  
me know if you hear of anyone  
~~else~~ answering him. Then I shall  
not do so.

It can be proved  
that only about 5 or 10 %  
of Society Form. Certificates are

descended from genuine  
controllable form, what then?  
I believe I see where the apparent  
discrepancy arises.

No answer necessary

Yours faithfully

J-D

P.S. - I am not sure if I am  
statistician enough for the job.  
He says 11% in the 1<sup>st</sup> generation,  
what would it be in the 2<sup>nd</sup>  
generation on the same assumption?  
What say in a century or 3  
generations? Is this easy to  
calculate?
