

12th. April, 1930.

Major Leonard Darwin, Sc.D.,
Cripps's Corner,
FOREST ROW,
Sussex.

Dear Major Darwin,

I am a little cramped next week owing to a meeting at Cambridge of the Experimental Biologists from Monday to Wednesday. I suggest

(a) Monday any time, allowing me to go up to Cambridge that evening,

(c) Wednesday morning;

I shall be coming back for the Eugenics Council, and would catch a train from Cambridge bringing me to town about 11.30, or if you felt like a talk in advance about 10.30.

I have been supplying points to Pease for his Labour Party Committee, and he tells me as you suggested, that we are more likely to get some improvement in Registration with nothing in the Census. I think however we should also press the case for the Census question.

Yours sincerely,
