

July 14. 29

CRIPP'S CORNER,

FOREST ROW,

SUSSEX.

My dear Fisher

I am sorry I did not stay to the end of the Council meeting, because now I don't know what occurred. But I was glad to go, for I came away with the belief that my presence had done more harm than good! Mallet writes to me on the subject, and I may have to give him my advice. To think over the matter as well as I can I have here written down what I now think I should propose if we had to start quite de novo. What I have written is very unlikely to be of any use whatever, but if you would scribble your comments on the margin and return to me, I should know what-

you are thinking. I have the order
of the 2 headings wrong. If of
the slightest use, keep a copy.
What we want now is some
solution which will end the
matter. I agree with you quite
about family allowances, but I
think we are now in a
minority.

There are a lot of things I
should like to write to you about,
but I will spare you today.

Yours sincerely
Lemuel Darwin
