MILDENSTONE.

File 30^E { IDLEROCKS,
STONE, STAFFS.

Dear Fisher.

Pennett writes civilly
to say he will bring the
matter before his Society in
July. He adds that his
personally is against the
Geological Society moving in
Engineering matters lest its aims
should be "misunderstood by
the public". I do not see that,
even if that did occur, it would
do much harm!! Tell Cutler
some day, please. All seems to
have gone well at the Council, I
gather. No answer needed
