

September 4th. [1927?]

CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

My dear Fisher,

Many thanks for
letting me see the enclosed.
It seems to me you have
been doing a very good
work in putting this kind
of investigation on better
lines. What you say
about the little effect of
the inferior conditions
necessary in the case of

triplets scores me for nature
over nurture. I have been
reading a book about insanity
and I wish they would investigate
twins when only one is insane

Yours sincerely
I. Darwin
(per. S.D.)
