

May 15 - 27

Cripps's Corner. Forest Row. Sussex

Dear Fisher.

In re census calculations, if we deal with fathers, I suppose we also deal with sons. I suppose that emigration, by changing the age distribution, introduces a certain error in the results. But I suppose this cannot be allowed for, and is not large. It must, if so, be stated as an uncorrected error.

It will be important to get Stevenson to understand your views before 1931!

That will be one advantage of any memo. you may write.

I see the R.G. on Thursday May 26. I am sending copies of 2 small memos, which I have written to fortify myself. Don't trouble about them if they are fairly covered. But if you see any glaring error, please let me know.

Yours sincerely

L. Dawson
