

October 15th [1926] J.H.B.

CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

My dear Fisher,

I think the enclosed
note to be added to D. Stokes's
article for your Review
went a little wrong in the
copying. Please correct it
as you would like it
corrected and send it back
either to me or to the office.

Did you talk with
MacBride influence you at
all one way or the other

with regard to the review of
homogenesis? He seemed
to me a little bellicose to start
with but to get better as time
went on.

I know you find Mrs. Hodson
troublesome to deal with at times,
and so do I also. I like to tell
you therefore any evidence I get
of her usefulness to us. Yesterday
I was lunching with a financial
adviser to an anonymous
donor; it came out in conversa-
-tion that the said donor
had a few months ago been
in a doubtful frame of mind

CRIPPS'S CORNER,

SUSSEX.

with regard to Eugene's but
that we had somehow
been able to create the
impression that we were
becoming more active
and he thought the danger
of a serious change of mind
had become far less. Last
Spring I sent out to the
donor a number of documents
collected by Mrs. Hodson to
illustrate what we were doing.
The financial adviser also said
without my asking any question

that the doctor had told him
that ^{Dr} Mrs. Hodson had made
a very favorable impression
on him. I never want to pay
too much about the doctor
because I hardly know what
I ought to regard as confidential.
~~The~~ no one but me knows how
much there is at stake. If
you get a chance, will you
show this letter to Cutler
as I should like him to
know.

Yours sincerely
L. Darwin
(per C. M. D.)
