CRIPPS'S CORNER,  
FOREST ROW,  
SUSSEX.

My dear Fisher,

I have just been reading  
your Essay Review with very  
great satisfaction. I will not  
pause to enquire whether  
it is too getting on to my  
efforts, but I will say  
without doubt that as a  
brief general essay on  
Eugenics it seems to me  
quite admirable. ]]

Scienca Progress does not care  
to let us have it for our  
Review we must see if  
they will at all events let  
us have a considerable  
number of reprints.

There is only one line  
to which I want to call attention,  
tho' only with reference to  
the rating of our premises!!  
You say "not a science"  
possibly you would re-consider  
this phrase with a view  
to possibly substituting words

some what like the following—  
"Not all Science but all its in-  
-spiration drawn from..."

Now if you are the slightest  
objection on the grounds of morals,  
style, or science to such an  
alteration please put it en-  
-tirely out of your thoughts.

I have been very  
anxious to arrange an office's  
meeting at which Hazell  
and Lady C. could attend,  
the former for financial reasons  
and the latter as I hope she  
will help in the choice of a  
new member of the Staff.  
If the date selected should  
unfortunately be one in which

You cannot attend it - occurs  
to me to suggest the possibility  
of your being able to talk the  
matter over with Lady Chambers  
so that she should be thoroughly  
acquainted with your views.  
If you see Cutler will you say  
much the same thing to  
him.

Again thanking you for  
the more than kind way in  
which you speak of my book

Yours sincerely  
Leonor Dawson
