Burgh le Marsh,  
Lincolnshire.

Dear Fisher

I am returning to  
you the proofs which you  
have already looked over  
in case you should like  
to keep them by you  
when reading the rest of the  
volume. I see you have  
already saved me  
from one or two statistical  
howlers. On page 20 I  
have corrected  $\frac{1}{3}$  into  $\frac{1}{5}$

I take it that this means  
that the correlation coefficient  
in the case of mid-parental  
heights is  $\frac{4}{5}$ . Anyhow if  
you certify that I ought  
to put in  $\frac{1}{5}$  so be it.  
on page 42 I have put  
in a new sentence which  
I hope meets the point.  
I have noticed you other  
corrections and accepted  
nearly every one of them.  
I have still got a bit of a  
cold in my head so will  
write no more for the moment.  
If I have blundered in my  
interpretation of your corrections  
an early reply will greatly  
oblige.

Yours sincerely  
L. Darwin      H. C. D.
