

From MAJOR L. DARWIN, Cripp's Corner, Forest Row, Sussex.

I shall be at Brooks's (west side of St James's St) by 12.30 on Wednesday, if you are kicking your heels about.

Has the correlation between half-sibs (half brothers) been worked out? If so what is it? I mean as a fact and not theoretically. What is the correlation between first cousins? If you happen to know these things, tell me when we meet.

 [4 August 1923]
