

June 11. 23.

CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

Dear Fisher

I think Mr. Hodson will
send you a proof of "Male-
Selection". It has a good many
misprints, but that is nothing.
If you should read it before the
meeting will you see if you
agree with the part where I
found what I say on your paper.
I don't want to say more, but
what I do say I want to be
correct. If changing a word or
two would make it more correct,
I should be grateful to know

how.

It you agree to Mrs^{rs} Hodson seeing Elliott Smith with our drafts, please ask her to go ahead. This is re Rockefeller.

It you speak at the meeting I hope you will say what you feel about the balancing of the different forces at work. This is regard to mate selection. The last 2 paras on page 1 and the first two on page 2 are where your work comes in chiefly.

Yours sincerely,

Leonard Darwin
