

June 10 1923

LAMAR CORNER,

FOREST RD.,

SUSSEX.

My dear Fisher,

Thanks for your draft. It is not at all
easy to know what to write. I believe that the
Committee contains some ignorant politicians. We
must therefore, I imagine, put something of a case.
Yet we don't want to teach the scientific men what
they know. I send you my shot, somewhat based on
yours. How would it be to ask Mr. Hodson, armed
with both our drafts, to talk to Scott-Elliott and
Prof. Max Bude? This seems to me the best next step.
I feel so much in the dark. I should add that
I think our action should be such as to give

755815

support to Pearson in great measure.

Yours sincerely,

L. Dawson
