

March - 18 - 34
CRIPPS'S CORNER,
FOREST ROW,
SUSSEX.

Dear Fisher.

I much liked getting your long letter of the 12th, but have not replied because I have been rather busy - and it takes mighty little to make me feel that. I agree that it would be a mistake to put in Duffin's article in our Review, but disagree as to possibility of dealing with the Brock Report in the last issue. As I am trying to do it, perhaps I can judge best! It is only you on the Committee who could do it quickly. I agree with what you say about my

Suggested reply to Dafton - I fully
agree also as to a "hidden reserve
of ability owing to the attitude of
mind engendered by inherited wealth"
to quote your words, ~~also~~. To quote
mine p-254 Eugene Reform - "mute
inglorious millions would be hiding
themselves in commerce and in the
hunting field". And commerce is
often another name for inherited
wealth. All these sides of the
question want much more study,
and I hope you will give it to
them. I have just tried to find
an old letter of yours - but failed -
in which you ^{said} something about searching
over and over again for some way
out of the differential birth rate &
acquired inferiority of the better types as
cause of racial decay. I hope you will
return to the search. Give me a scribbly
letter

Yours sincerely
L-Durman
