

12. GERTON PLACE

S. W. 3

10th June, 1921.

My dear Fisher,

Many thanks for your two letters, although as regards some of the ^{symbols} ~~samples~~ it was putting mathematical pearls before unmathematical swine. I am sorry I cannot tell you anything in the way of statistics about the nature of wide ranging species.

Your name has been put forward for the Statistical Society, seconded by Udney Yule, and I think I may say you are certain to be elected on the 17th instant.

Yours sincerely,

L. Dawkins
