FOREST ROW,
SUSSEX.

Jan 10. 1921

My dear Fisher.

Would you be so very
^{attracted}
kind as to look ^{at} page
10 and 11, as far as "hereditary
cultments", and take me
frankly if I am talking
bosh. I wanted to be
sure of my ^{own} medical phrases,
and I therefore asked
Dyler White to read it.
He said he failed to
understand the first of

These two paragraphs. I
should like to know if I
am right. But don't take
much trouble. I may have
to cut down the article
anyhow, and if you
think it doubtful or too
cryptic, I shall deal
drastically with it by
cutting it all out.

Yours sincerely

L. Darwin
