18th June, 1918.

Dear Fisher,

Thank you for your criticisms on my article. I have written something which may serve as a note at the end, and I send a copy in the hope that you will look through it now the matter is fresh in your mind. I see that I must put the contrast between the benefits in somewhat more doubtful language, than that which I have adopted.

I hope you have written to Professor Knott as I requested in my last letter. I should be glad to hear of this point for fear my letter to you went wrong.

Yours sincerely,

L. Dawin
