CRIPPS'S CORNER,  
FOREST ROW,  
SUSSEX.

My dear Fisher.

Just a line to greet you on taking up your new job, in which I am sure that you will do excellent scientific work. I hope that on the practical side you will be able to continue to press for the Census being made as useful as possible in regard to Eugenic problems. If you can move, as I think you contemplate, in regard to National stock taking, so much the better. All this work

with hang together, and help  
to keep you busy. But this  
note is really only to wish  
you good luck in all the  
directions in which you may  
strive to advance.

Yours sincerely,

Linnaeus Darwin

P.S. My letter appeared in  
the current issue of the  
Englewood News.

P.P.S. And I forgot to post  
it !!! Thanks for your long  
letter since received to which  
I may reply some day.
