

14th January, 1949

My dear Henry,

Thanks for your note. With respect to the presidency of the Society, I think you ought to know of a letter in a recent, probably the last, issue of The Lancet, in which G. H. Saddington declares that three of the speakers on the Lysenko Controversy abandoned scientific impartiality for party prejudice. I knew he was red, but I did know he was so passionately red as this. Perhaps you would like to see the letter which I have probably quoted incorrectly as I have not a cutting to send you.

I wonder if Harland is eligible for consideration.

Yours sincerely,

S. Wright
