DEPARTMENT OF
ZOOLOGY AND COMPARATIVE ANATOMY,
UNIVERSITY MUSEUM, OXFORD.

February 27th 1947.

My dear Ron,

Thank you so much for the redraft
of paragraphs 15 & 16 of our summary. They
are a decided improvement, so I hope you will
substitute them for my draft: I return them
herewith.

I heard from Darlington this
morning, and enclose his letter for you to see
(I have taken a note of the details). So this
seems nicely arranged, and it will be a
material advantage to have one paper illustrated
with a colour plate.

I am writing today to Braufoy -
who is I believe the man best qualified to do
the work, and I remember you were in
agreement with the suggestion that I should
approach him. I think we might well keep
to our original suggestion of 4 specimens, which

Should fit the space quite nicely, for there is considerable advantage in showing one of the less, and one of the more, extreme heterozygotes.

I quite agree with all you say about Race, and you know how delighted I shall be to sign the certificate. I feel sure that Hardy will gladly do so and I will, in addition, mention the matter to him myself.

Will let you know as soon as I hear from Braufog.

Yours son,
Henry

27th. February 1947.

My dear Henry,

I have now been all through the paper and agree with everything that you have done. I hope you will find my own little alterations to be no more than was intended, namely, a clarification of phrases which might not have conveyed what was meant.

You will, I think, find it convenient to have the paper complete and available while you are dealing with the figure and plate.

I am so glad you suggested Hardy for Race's certificate.
Characteristically enough Haldane refused, though Hogben has accepted.
What do you think of Julian?

Yours sincerely,
