

8th. January 1947.

My dear Henry,

I enclose two references to recent work in which largish seasonal changes have been demonstrated, either in gene ratios or in inversion frequencies. It might be useful to give these references in our paper.

Yours sincerely,

N.W. Timofeef Rensovsky (1946). Zur Analyse des Polymorphismus bei Adalia bipunctata. Biol. Zbl 60 130-137.

T. Dobzhansky (1943) Temporal changes in the composition of populations of Drosophila pseudoobscura. Genetics 28, 162-186.
