

July 9, 1941

Dear Taylor,

Here is a very brief summary. The only new fact suggested is that A's may be more frequent in the South West than in South Eastern and Central England. I do not know how much attention it is worth giving to the Welsh evidence, but I have briefly summarised it.

I have written to Newton ^{offering} ~~about~~ the cages.

Perhaps we may hear more later when Stanbury has heard from Dr Phelan.

Yours sincerely,
