

August 27, 1937

Dear Taylor,

I enclose a note from a referee about Dr Anyos, which does not make me any more inclined to have him up for an interview.

I saw Race the other day, and find that he can give a month's notice, so that, if you approved of him at the end of September, he could start work with you at the end of October. He is very modest in manner, but I could not get evidence that he would make an original research worker on his own, though he might well be fitted to act under your direction and inspiration as assistant. Of course he may also have qualities not yet developed.

Yours sincerely,
