

14th May, 1935

Dr. G.L.Taylor,
Department of Pathology,
University of Cambridge,

Dear Taylor.

I am very glad to have your letter of acceptance, and look forward to a very pleasant association. I have sent your letter to the Medical Research Council with enquiry as to the date from which we are authorised to spend money and as to the machinery for accounting for our expenditure.

I think it would be quite as well, as soon as possible, to make a first visit, with a view to clearing your head as to the exact use you would like to make of the space available, and the placing of the apparatus needed.

I am seeing the Provost and Rockefeller representatives on Thursday, and if you were free Friday, we could probably get some of the first decisions made.

Yours sincerely,
